The Honorable John Boozman  
Chairman  
Subcommittee on Military Construction, Veterans Affairs, and Related Agencies  
Committee on Appropriations  
United States Senate  
Washington, DC  20510

Dear Mr. Chairman:

Please find enclosed a report addressing the status of active hospital construction projects for the third quarter of fiscal year (FY) 2019. This report is in response to the Joint Explanatory Statement accompanying the Consolidated Appropriations Act, 2018 (Public Law 115–141), which requests the Department to provide quarterly updates on the progress of all hospital construction projects, including any settlements reached for contractor error or project management deficiencies.

The military construction of medical facilities is progressing. The Defense Health Agency and its construction agents, the United States Army Corps of Engineers and Naval Facilities Engineering Command, have provided increased oversight and project management to limit exposure of both cost and schedule. Since the Committee report was published, two hospitals and clinics completed construction and opened for business, and two commenced construction activities as of July 2019. The enclosed report on the progress of hospital construction projects provides construction timelines and working estimates of active hospital and clinic construction projects for the third quarter of FY 2019.

Thank you for your interest in the health and well-being of our Service members, veterans, and their families. A similar letter is being sent to the other congressional defense committees.

James N. Stewart  
Assistant Secretary of Defense for Manpower and Reserve Affairs, Performing the Duties of the Under Secretary of Defense for Personnel and Readiness

DEFENSE HEALTH AGENCY'S HOSPITAL CONSTRUCTION PROGRAM
STATUS OF ACTIVE CONSTRUCTION PROJECTS

EXECUTIVE SUMMARY

The third quarter report for fiscal year (FY) 2019 is in response to the Joint Explanatory Statement, accompanying the Consolidated Appropriations Act, 2018 (Public Law 115-141), which requests the status of active medical military construction projects. Specifically, the committee requests the Defense Health Agency (DHA) to report to the congressional defense committees “on the progress of all hospital construction projects to include any settlements that have been reached for contractor error or project management deficiencies.” The data presented below, as reported by design and construction agents, reflects data submitted with the 10 U.S.C. § 2851 report through July 15, 2019, representing the third quarter in FY 2019. As of the submission of this report, there are 22 active hospital and clinic projects in construction. In addition to active construction projects, there are 30 projects in the design phase as of July 15, 2019.

BACKGROUND

The DHA is responsible for facility life-cycle management of U.S. military medical facilities worldwide, to preserve ready and resilient facilities that sustain military medicine’s mission assurance of world-class health care for America’s warfighters and their families. These military medical facilities include medical centers, hospitals, ambulatory care centers, medical training facilities, medical research facilities, and veterinary facilities in the Military Health System. In accordance with section 2851 and Department of Defense Directive 4270.5, military construction of such facilities is to be carried out under the direction and supervision of the U.S. Army Corps of Engineers and Naval Facilities Engineering Command as the design and construction agents for the current active projects identified in this report. Therefore, data herein corresponds with that provided by the construction agents. Section 2851 further requires reporting project data at a frequency no less than once a month, which provides a foundation for information within this report.

RESULTS

Current Status of Active Construction Projects

The active hospital and clinic projects in construction identified in this report include projects that have been awarded through projects that reached substantial completion and are in transition. The status, including a construction timeline and current working estimate of the active hospital and clinic projects, in construction, is included in Table 1, which represents the third quarter of FY 2019. Other projects reported in the section 2851 report include projects that are complete and waiting for financial closeout by the construction agents. No settlements were requested or reached for contractor error or project management deficiencies during the third quarter of FY 2019.

CWE – Current Working Estimate  NTP – Notice to Proceed  BOD – Beneficial Occupancy Date
CONCLUSION

As of the submission of this report, there are currently 22 active hospital and clinic projects in construction. In addition to active construction projects, there are currently 30 projects in the design phase. Since the last report for the defense committee was published, two hospitals and clinics completed construction and opened for business, and two commenced construction activities as of July 2019. The data presented above delineates status, construction timeline, and the current working estimate of the active construction projects, and reflects updated data provided by the design and construction agents of each respective project, which was also submitted with the section 2851 reports in July 2019. This data will be appropriately updated in future quarterly reports.
