

Program Executive Office Defense Healthcare Management Systems

The mission of the Program Executive Office, Defense Healthcare Management Systems is to transform the delivery of healthcare and advance data sharing through a modernized electronic health record for service members, veterans, and their families.

PROGRAM OVERVIEW

The Program Executive Office, Defense Healthcare Management Systems (PEO DHMS) is an acquisition organization that oversees three program management offices (PMO). These three offices acquire, deliver, and support information technology and services that enable data sharing and modernization of the electronic health record (EHR). PEO DHMS oversees the Department of Defense (DoD)/Department of Veterans Affairs (VA) Interagency Program Office (IPO), the DoD Healthcare Management System Modernization (DHMSM) PMO, and the Joint Operational Medicine Information Systems (JOMIS) PMO.

Together, these offices transform the delivery of healthcare for active duty military, veterans, and their families by achieving nationwide interoperability and modernization of the DoD's EHR, MHS GENESIS. MHS GENESIS integrates inpatient and outpatient records, replacing select legacy DoD healthcare systems and connecting medical and dental information across the continuum of care.

MODERNIZATION

- Ensures and enables sustainability, flexibility, and interoperability to improve the continuity of care
- Enables system improvements through upgrades of hardware, software, and interfaces
- Promotes efficiencies in a safe, high quality healthcare delivery

INTEROPERABILITY

- Engages the private sector
- Continues to partner with the VA
- Collaborates with the Office of the National Coordinator for Health Information Technology
