FACT SHEET
EKTROPY II
TOOL FOR STREAMLINING PROGRAM MANAGEMENT

DHA
Defense Health Agency ®
**SOLUTION DELIVERY DIVISION**

Ektropy II is an information technology (IT) solution used across the Defense Health Agency J-6 directorate to support program and portfolio management. The solution provides insight into personnel, programs, cost and contracts across all activities. It improves the management of cross program dependencies and the IT manpower footprint.

Ektropy II facilitates information sharing and real-time monitoring throughout the Planning, Programming, and Budgeting Execution (PPBE) processes. Containing modules on Program/Project Management, Financial and Resource management and Human Capital Management, it supports data-driven and informed decision making through insightful metrics, assessments and analysis. Access Ektropy II at: https://ektropy.health.mil.

Background:

In November 2020 SDD deployed Ektropy II. Ektropy II was developed to give users a more modern and user friendly IT interface. Ektropy II has all of the same great features and benefits as the previous Ektropy system but now features enhancements including "drag and fill-down" capabilities, "drag and drop" grouping for better in-system review of data and additional flexibility to accommodate nuanced security requirements.

Check Out the Ektropy SharePoint for Announcements, Forms, Training Resources, FAQs, and Other Key Resources at: https://go.usa.gov/xy3bc.

Key Features

▸ Balances Enterprise Portfolio Management across business in alignment with goals.

▸ Provides support in achieving IT Governance to optimize technology investments with critical business requirements.

▸ Rationalizes improvements to technology assets by identifying duplication and cost-saving opportunities.

▸ Provides real-time visibility into performance, enabling responsive resource shifting and strategy adjustments to better manage changing fiscal constraints.

▸ Helps to attain transparency and establish accountability through each step of PPBE.

Key Benefits

▸ Standardizes processes to maintain uniformity across the organization

▸ Eliminates redundancy to improve costs and availability for value-added tasks

▸ Provides audit controls to drive increased accountability

▸ Centralizes planning and execution data for a comprehensive view and analysis

▸ Streamlines reporting and oversight through dashboards and analytics

SDD is a component of the DHA DAD IO (J-6). For more information, visit www.health.mil/SDD. To subscribe for SDD product news, please visit https://public.govdelivery.com/accounts/USMHSDHSS/subscriber/new.
