The MedCard app allows Defense Health Agency (DHA) pharmacies to capture and verify the validation dates of third party payers for Department of Defense (DOD) beneficiaries. Additionally, the app provides the user a way to capture information on themselves and family members that may be helpful when interacting with a pharmacist.

The app also allows users to manage prescription pickup authorizations by taking a picture of a note giving an individual authorization to pick up their prescriptions.

Currently this application is only supported at Hill Air Force Base (AFB), Mountain Home AFB, Tinker AFB, Grand Forks AFB, and Joint Base McGuire-Dix-Lakehurst.

The DHA MedCard App was developed by the U.S. Air Force but is now managed by the Web & Mobile Technology Program Management Office within the Solution Delivery Division (SDD, J-6).

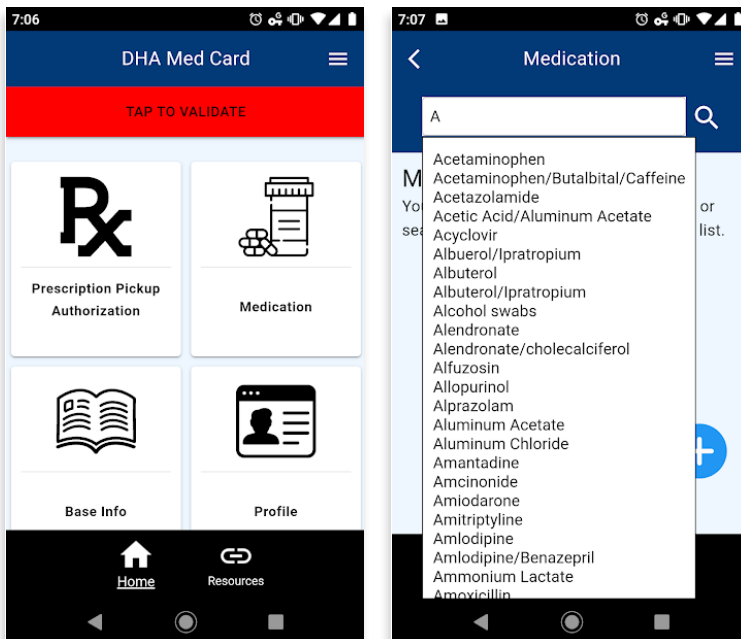

Key Benefits

▸ Allows DHA pharmacies to capture and verify the validation dates of third party payers for DOD beneficiaries

▸ Users can capture and track information for themselves and their family members that can be helpful with interacting with pharmacists

▸ Manage prescription pickup authorizations

Key Features

▸ User-created profiles

▸ Medication lists

▸ Resources like FDA Information, Poison Control and the Tricare Formulary Search Tool

▸ Available on Google Play and the Apple App Store

SDD is a component of the DHA DAD IO (J-6). To subscribe for SDD product news, please visit https://public.govdelivery.com/accounts/USMHSDHSS/subscriber/new.
