

FACT SHEET

DML-ES – SAP (TEWLS)

INNOVATIVE, INTEGRATED, INTELLIGENT

The Defense Medical Logistics – Enterprise Solution (DML-ES) – SAP Legacy Theater Enterprise-Wide Logistics System (TEWLS) is an information technology capability within the DML-ES portfolio. The DML-ES portfolio provides a continuum of medical logistics support for the Defense Health Agency (DHA). TEWLS is a centralized capability supporting Military Health System operational logistics functions.

DML-ES is the program and portfolio name for all Medical Logistics (MEDLOG) information technology (IT) applications. DML-ES – SAP follows industry standards and best practices, reduces complexity and consolidates numerous military logistics functions into a single application. The system addresses centralized business level functions such as: depot operations, life cycle assemblage management, combat developer planning and supply chain distribution. The integrated functionality improves information standardization and visibility, supports joint and coalition forces and relieves tactical units from some complex processes of inventory management and supplier relationships.

Background

DML-ES-SAP will fully transition to LogiCole by 2025. LogiCole moves all legacy MEDLOG applications into a single, web-based environment.

Key Benefits

- ▶ Replaces several legacy systems
- ▶ Standardizes multiple medical logistics functions
- ▶ Supports medical logistics on the battlefield
- ▶ Permits the DHA to be compliant with federal standards

Key Features

- ▶ Consolidates multiple medical logistics functions into a single portal
- ▶ Provides materiel distribution and transportation management, medical life cycle assemblage management and depot level bio-medical maintenance management
- ▶ Implements just-in-time logistics, eliminating large stocks of inventory
- ▶ Provides real-time enterprise-level view of assets
