# SOLUTION DELIVERY DIVISION

DELIVERING SOLUTIONS, ADVANCING HEALTH CARE

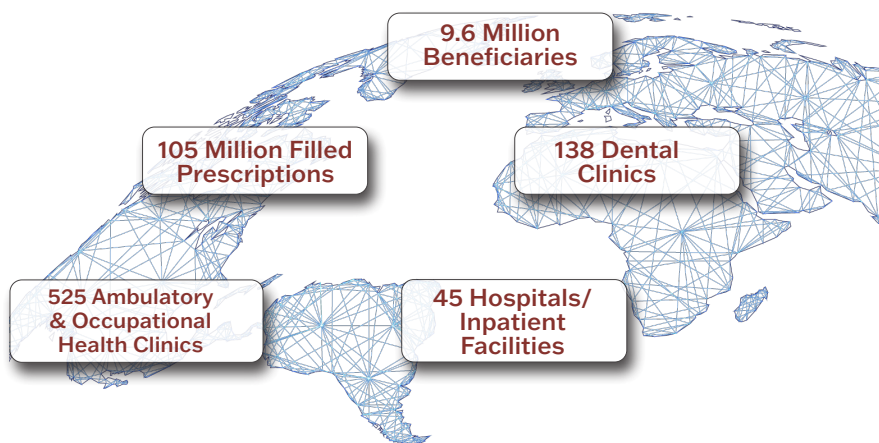

The Solution Delivery Division serves as the premier provider of information and technology, simulation, and acquisition program management for the Defense Health Agency. In support of the DHA mission – to support our Nation by improving health and building readiness – making extraordinary experiences ordinary and exceptional outcomes routine, SDD leverages an innovative acquisition culture, acquisition-trained workforce, and a business-oriented mindset that drives continuous rationalization, optimization, cost reduction, and modernization.

As a division of the DHA Program Executive Office for Medical Systems, SDD's Program Management Offices and Branches provide logistical, administrative, and technological applications and support to internal and external DHA and Military Health System stakeholders and customers. In this role, SDD supports the Combatant Commands by supplying robust medical logistical support, lifecycle management, information technology infrastructure, and health delivery applications to provide globally integrated health services.

Additionally, SDD provides:

- ▶ Project and program management with enterprise-wide master scheduling, standardized workflow, and role-based training development and implementation
- ▶ Organizational change management services and operational systems integration to all military hospitals and clinics

## SDD Portfolio Offerings (not all Inclusive):

- ▶ **Aeromedical Service Information Management System (ASIMS)**
  - » management of Air Force Individual Medical Readiness and associated requirements, including immunizations
- ▶ **Defense Medical Accessions Computing Systems (DMACS)**
  - » enables processing of medical components for officer accession programs including the U.S. Service Academies, Reserve Officer Training Corps, and Uniformed Services University
- ▶ **Defense Medical Logistics-Enterprise Solution (DML-ES)**
  - » integrated global medical logistics capabilities
- ▶ **Enterprise Imaging**
  - » centralized and standardized administration of image producing modalities, associated management systems, and high dollar surgical and radiation oncology solutions
- ▶ **Individual Longitudinal Exposure Record (ILER)**
  - » web-based application that allows the DOD and the VA to link individuals to known exposure events
- ▶ **Legacy Clinical Systems**
  - » support for Armed Forces Health Longitudinal Technology Application (AHLTA), Composite Health Care System (CHCS), TRICARE Online, etc.
  - » ensures data is available via Health Information Archive and Legacy Data Consolidation Solution as sites decommission and transition to MHS GENESIS
- ▶ **Medical Simulation and Training**
  - » center of excellence for acquisition management of medical simulation, training, and education solutions
- ▶ **Mobile and Progressive Web Applications**
  - » provides user-friendly apps for medical teams and beneficiaries (medication, access to care, mental health, contraceptive counseling, etc.) available for free download
