

FACT SHEET PHIMT

PROTECTED HEALTH INFORMATION MANAGEMENT TOOL

PHIMT is an enterprise workflow and compliance system used across Defense Health Agency facilities as the primary system for processing, managing, reporting, and tracking of Protected Health Information provisions and guidelines, and a host of legal requirements related to the Health Insurance Portability and Accountability Act (HIPAA) Privacy Act.

PHIMT processes, manages, and maintains related disclosures, authorized and unauthorized releases, restrictions, complaints, accounting requests, and confidential communications.

Key Features

- ▶ Compiles and centrally manages all retrieved PHI into an automated single consolidated
- ▶ Dashboard displays real-time information on an entity's HIPAA activities and status
- ▶ Provides administrator import capability to load multiple request for information records
- ▶ Automates routing tasks and generates the proper outcome or correspondence letter

Key Benefits

- ▶ Facilitates enterprise data coordination, consistency, and efficient processing of patient PHI-related requests and authorized releases
- ▶ Provides automated, cost-effective measures to ensure DHA-wide compliance with HIPAA regulations and the Health Information Technology for Economic and Clinical Health Act rule
- ▶ Automates and simplifies PHI activities regarding health care operations and patient health information processes such as treatment and payment
- ▶ Serves as the primary tool for obtaining Authorization for Disclosure of Medical and Dental Information (DD Form 2870)
