

The Alexander T. Augusta Military Medical Center App is a searchable directory for navigating the military hospital located at Fort Belvoir, Virginia.

The app features an easy-to-use home screen that enables users to quickly find their way to and around the facility, saving time, reducing confusion, and improving the overall patient and visitor experience. It also contains links to the hospital pharmacy and laboratory, patient resources, and contact information.

The directions section includes a parking diagram to help patients navigate from the parking lot to specific departments inside the hospital. These visual and written cues help prevent appointment delays, enhance accessibility, improve efficiency, and offer beneficiaries a more welcoming experience. This app is available for free download to iPhone and Android devices.

This app is managed by the **Solution Delivery Division Web & Mobile Technology Program Management Office**.

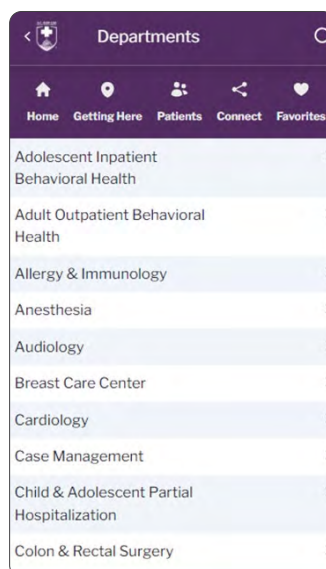

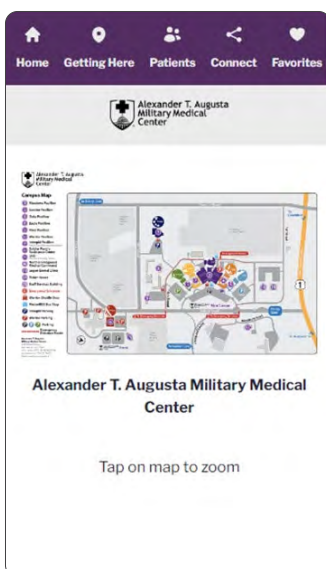

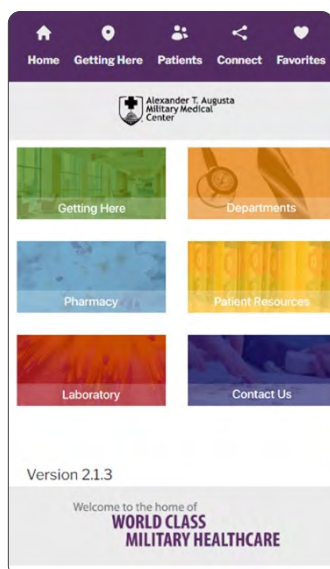

Key Features

- Includes information on how to locate the main facility and other branches
- Contains campus maps for parking and public floor plans

Key Benefits

- Enables users to quickly find their way around the facility
- Helps patients find their way from the parking area to specific departments inside the hospital
- Instant access to key patient services — Pharmacy and Laboratory — right from the home screen
