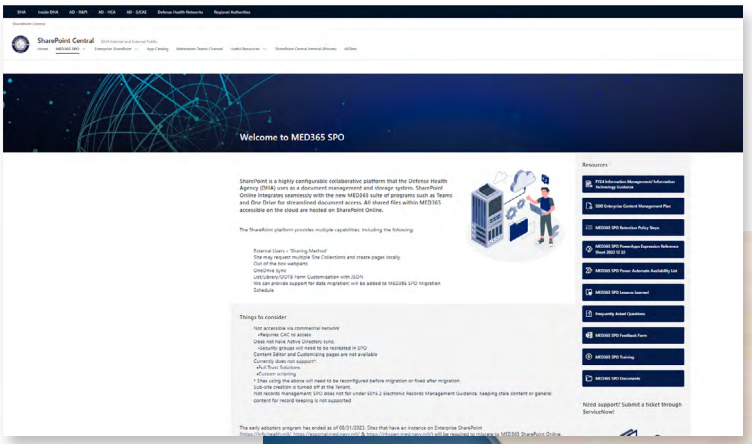
MED365 SharePoint Online
FACT SHEET

Defense Health Agency
SOLUTION DELIVERY DIVISION

MED365 SPO is a web-based platform that enhances collaboration among 200,000 medical staff, contributing to the Defense Health Agency's efforts to develop a modernized, integrated, and resilient healthcare delivery system.

MED365 SPO contains features that prioritize security and streamline administrative practices. It allows users to effortlessly share documents and files within their organization, ensuring seamless communication and collaboration. Users can also connect and work from anywhere that has an internet connection or without internet access (offline), synching files once they are back online.



Key Features

- A modern personal cloud storage experience
- Improved file-sharing capabilities
- Supports mobile browsers
- Simple navigation and commands

Key Benefits

- Improves security and reduces data loss through secure cloud storage
- Facilitates collaboration of geographically separated teams via expanded collaboration tools

MED365 SPO is managed by the **Solution Delivery Division** Web & Mobile Technology Program Management Office.
