DEFENSE HEALTHCARE MANAGEMENT SYSTEMS
OPERATIONAL MEDICINE CARE DELIVERY PLATFORM

PRODUCT OVERVIEW

OpMed CDP enhances clinical decision support, streamlines patient management, and improves trauma documentation. The interoperable solution will optimize battlefield medical care and integrate with the Federal Electronic Health Record, MHS GENESIS. It enhances combat casualty care and operates in a disconnected, intermittent and low-bandwidth environment, enabling medical providers to make faster, more-informed decisions. Developed with OpMed providers and subject matter experts, OpMed CDP puts end users at the center of the development process, supporting providers in offering quality care through intuitive, fit-for-purpose applications.

HIGHLIGHTS

- Trauma, surgery and mass casualty software
- Intuitive and guided workflows that support adult, pediatric, and military working dog care
- 24/7 access to patient data for deployed medical personnel
- Clinical practice guidelines

CAPABILITIES

- Ensures secure transfer of data in both connected and low-bandwidth/intermittent/disconnected environments, supporting real-time documentation and improving the accuracy of patient records
- Supports ambulatory care and medical readiness sustainment in combat and pre-hospital environments
- Minimizes documentation burden for deployed users at Roles of Care 1 and 2
- Supports seamless care continuity through ongoing collaboration from point of injury to en-route care
- Enhances clinical decision support, patient management, and trauma documentation

FEATURES

- Users can utilize this evidence-based solution to enhance operational care delivery through current Joint Trauma Systems medication guidelines and references
- Decreases delays in patient data transfer while simultaneously increasing data protections
