**c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.**

AFMOWAP is a family of five (5) applications used by the Air Force Medical community to manage information in direct support of active Air Force units, Air National Guard, and Air Force Reserves, and deployed locations during both peace and wartime operations. AFMOWAP applications are designed to use a flexible architecture tailored to meet a range of medical user needs. The system accomplishes its mission by providing a database for the collection of information and a web server for browsing, collecting, and manipulating that information. The data collected within the AFMOWAP applications contain Protected Health Information (PHI) and Personally Identifiable Information (PII).

1. Aeromedical Information Management Waiver Tracking System (AIMWTS): AIMWTS is a web application that tracks waivers and exceptions to policy (ETP) through their entire lifecycle for Air Force flying personnel, special operational duty personnel, and applicants for these duties into a single data repository. - The owner is Air Force Medical Support Agency (AFMSA), Physical Standards Development (SG3PF)
2. Medical Planning and Programming Tool (MPPT): MPPT is an application used to submit the Program Objective Memorandum (POM) up through the Line of the Air Force to the DoD and Defense Health Agency (DHA) for future manpower/funding. - The owner is Air Force Medical Support Agency (AFMSA), Medical Plans & Programs (SG8P)
3. Physical Examination Processing Program (PEPP): PEPP application manages and tracks physical examination actions for AF flying personnel, special ops and applicants for these duties. - The owner is Air Force Medical Support Agency (AFMSA), Physical Standards Development (SG3PF).
4. Radioactive Materials Management Information System-Web (RAMMIS-W): RAMMIS-W is an application used to maintain Nuclear Regulatory Commission (NRC) compliance allowing user to manage all licensed USAF non-weaponized radioactive materials. - Owned by Air Force Medical Support Agency (AFMSA), Medical Radiation Health Operations, United States Air Force (USAF) Radioisotope Committee Secretariat.
5. Refractive Surgery Management System (RSMS): RSMS is an application, used as an approval process for aviators, war fighters and select members seeking LASIK surgery, without compromising their medical readiness posture.

PII collected includes: personal descriptors, ID numbers, employment information, Social Security Numbers (SSNs), ethnicity, and health information.

AFMOWAP is owned and managed by United States Air Force School of Aerospace Medicine (USAFSAM), Force Enhancement Clinical Ophthalmology (FECO).

d. **Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)**

Verification to ensure member is eligible to receive care at the military treatment facility.

Upon initial data collection, (face-to-face, phone or other means of documentation) the individuals have the opportunity to object to the collection of PII/PHI. However, failure to provide necessary information such as PII/PHI will cause a delay or possible rejection of services. By agreeing to an appointment or treatment/procedure, the individual is providing implied consent.
