Steps to take for Potentially Compromised Vaccine Event

1. **Vaccine compromise identified; outside temp range 2-8°C refrigerator or above -15°C freezer**

   - **Green arrow = Yes**
   - **Red arrow = No**

2. **Plug-in/close door or power restored?**
   - Yes: **Temp within range?**
   - No: **Is refrigerator/freezer unplugged, door ajar or power out?**

3. **Temp within range?**
   - Yes: **Keep vaccines in storage unit**
   - No: **Move vaccine to working storage unit and label vaccine as “DO NOT USE” (do not discard); label storage unit as nonworking**

4. **Is refrigerator/freezer unplugged, door ajar or power out?**
   - No: **Notify leadership and Medical Equipment Repair Office**
   - Yes: **Contact Immunization Healthcare Specialist (IHS) to initiate the reporting process for potentially compromised vaccine**

5. **Notify leadership and Medical Equipment Repair Office**
   - **Prepare Potentially Compromised-TSMP Worksheet (DHA Form 177) with all required information**

6. **Contact Immunization Healthcare Specialist (IHS) to initiate the reporting process for potentially compromised vaccine**
   - **Submit completed worksheet with copies of temp data to DLA-TSM, USAMMA-DOC, DHA-IHD, and IHS**

7. **Stand-by and await disposition from DLA-TSM and/or USAMMA-DOC; do not use or discard vaccine until released.**

8. **Discard vaccine by using the Pharmaceutical Reverse Distributor program or per local policy/guidelines.**

9. **Report loss to leadership per command/local policy (i.e. DCIR, etc.)**

10. **Vaccine cleared by DLA-TSM or USAMMA-DOC?**
    - Yes: **Vaccine released for use; place back in inventory**
    - No: **Discard vaccine by using the Pharmaceutical Reverse Distributor program or per local policy/guidelines.**
