c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

Siemens Rapid Point Version 5.X_AI measures blood gases in whole blood samples. Rapid Point operates in complete isolation but requires the use of networking protocols. Connection Type: Serial over recommended standard (RS)-232 and RJ-45 Networked. Personally identifiable information (PII) in this system is obtained through an interface with the electronic health record (EHR). PII is collected for identification purposes to match individuals with their records and reports and is used as a unique identifier to distinguish results from one patient to another.

Siemens Rapid Point Version 5.X_AI collects PII which includes demographic, medical information, and Protected Health Information (PHI). The categories of individuals on whom PII is collected include active duty military, retirees, and their family members.

CyberLOG is responsible for the Risk Management Framework (RMF) process and gaining an approval from Defense Health Agency Joint 6 Risk Management Executive Division (DHA J6 RMED). Local sites are responsible for day to day operations, maintenance, and management of the Siemens Rapid Point Version 5.X_AI system. Sites are responsible for ensuring the software is configured to meet CyberLOG and RMED approved configurations.

Siemens Rapid Point Version 5.X_AI system is owned and operated by the Defense Health Agency.

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII is collected for mission-related purposes to support the delivery of health care services. The intended use of PII is to ensure the tests results that were generated by the medical durable equipment (MDE) were generated for the correct individual and inserted into the correct medical record.

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Individuals do not have the opportunity to object to the collection of their PII as Siemens Rapid Point Version 5.X_AI is not the initial point of collection for PII.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

Individuals do not have the opportunity to consent to the specific uses of their PII as Siemens Rapid Point Version 5.X_AI is not the initial point of collection for PII.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)

Privacy Act Statement Privacy Advisory Not Applicable

Siemens Rapid Point Version 5.X_AI does not collect PII directly from individuals. Therefore, no Privacy Act Statement or Privacy Advisory is required.
