**c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.**

The Armed Forces Billing and Collection Utilization Solution (ABACUS) provides a standard patient accounting system for health care billing practices. It assists Department of Defense (DoD) military treatment facilities (MTFs) in the collection, tracking, and reporting of data required for the DoD Third Party Collection Program billing process by the adoption of standard commercial medical billing practices to MTFs. ABACUS replaced the Third Party Outpatient Collection System (TPOCS), as well as the Medical Services Account (MSA) and Third Party Inpatient billing modules housed in the Composite Health Care System (CHCS). This solution included the migration of current and historical data from both TPOCS and CHCS; help desk support for end users, end user training, maintenance, clearing house services and an electronic "Other Health Insurance" discovery. ABACUS is now the single source of financial information for the accounting of Services Uniform Business Office (UBO) receivables.

Utilizing data from CHCS and Military Health System (MHS) Genesis, ABACUS develops claims and invoices to aid the UBOs in the recovery of revenue for services rendered at MTFs from third party payers and other federal agencies. In addition, the United States (US) Treasury uses information maintained in ABACUS to collect from person(s) or organization(s) with outstanding delinquent debts on behalf of MTFs.

The types of personally identifiable information (PII) collected consists of patient demographic data, Social Security Numbers (SSNs,) employment information, and encounter information such as clinical, ambulatory, inpatient, laboratory, radiology, and pharmacy visits.

Categories of individuals PII is collected from include active duty DoD, their dependents and former spouses, non-active duty DoD, non-DoD beneficiaries (such as member of the legislative and executive branches), Reservists, National Guard, Public Health Services, as well as civilian or Federal agency personnel treated at DoD MTFs.

**d. Why is the PII collected and/or what is the intended use of the PII?** (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII collected is used for administrative and mission-related purposes primarily to identify beneficiaries and authenticate eligibility in support of the Third Party Collection (TPC), Medical Services Account (MSA), and the Medical Affirmative Claims (MAC) Programs.

**e. Do individuals have the opportunity to object to the collection of their PII?**  Yes  No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

ABACUS is not the initial point of collection for PII. PII is obtained from existing systems, and therefore the opportunity to object is only available at the source systems.

f. Do individuals have the opportunity to consent to the specific uses of their PII?  Yes  No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

ABACUS is not the initial point of collection for PII. PII is obtained from the source system (MHS GENESIS), and therefore the opportunity to consent to use is only available at the source systems.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)
