SUBJECT: DoD Procurement of Ruminant Products from Overseas Origin

References: See Attachment (1).

This Defense Health Agency-Interim Procedures Memorandum (DHA-IPM), based on the authority of References (a) and (b), and in accordance with References (c) through (h), establishes the Defense Health Agency’s (DHA) procedures to authorize the procurement of all ruminant meat (beef, sheep, goat, bison, etc.) and edible products from ruminants of overseas origin. DoD procurement of ruminant meat and meat products will align with current United States Department of Agriculture (USDA) restrictions and residual risk mitigation measures for Bovine Spongiform Encephalopathy (BSE) in accordance with the most current edition of Reference (h). Overseas procurement of ruminant meat and meat products by DoD will be limited to sources listed in References (h) and (i) as a negligible or controlled risk for BSE.

In addition to the listing of the final processor and any sub-contractors supplying ruminant meat products to the primary contractor in Reference (g), the final ruminant meat processor delivering product to DoD requires food protection audits in accordance with References (d) and (f) and listing in Reference (j). Veterinary Service Food Protection Audits will verify the sanitary conditions of the manufacturing plant are equivalent to USDA sanitary requirements. Personnel from the U.S. Army Veterinary Service will coordinate the inspection systems necessary to ensure required public health lot certification and traceability of subject product.
This DHA-IPM is effective upon signature. It will expire 1 year from the date of signature in accordance with Reference (c). The point of contact for this DHA-IPM is COL Nicole A. Chevalier who may be reached at (703) 681-3062 or nicole.a.chevalier.mil@mail.mil.
