Supplemental Slides

Questions Tasked to the Psychological Health Subcommittee

- **Request by Dr. Kelley, the Deputy Assistant Secretary of Defense (DASD) for Health Affairs and Clinical & Program Policy to review the scientific evidence surrounding Applied Behavioral Analysis (ABA) and provide comments on the following:**
 - Treatment intensity and duration
 - Short-term and long-term effects associated with ABA
 - Alternative treatments for autism that may provide comparable benefit to ABA therapy
- **Request by Ms. Embrey, the DASD for Force Health Protection and Readiness Programs to review the Automated Neurocognitive Assessment Matrices (ANAM), which is a Pre-Deployment Neurocognitive Assessment Testing tool**
 - Provide recommendations on use
 - Determine added value of sections on language, memory, attention, executive function, and cognition
 - Examine inclusion of symptoms and patient history, mood, and sleepiness scales, as well as, measures of response inhibition and effort
