

TMA DoD Pharmacoeconomic Center Fort Sam Houston, TX

MTF Quarterly Webcast

LTC Stacia Spridgen
Director, DoD Pharmacoeconomic Center

Introduction

- Greetings from the PEC
- Purpose of the Quarterly MTF Webcast
- DCO Ground Rules
 - Type questions into DCO system
 - Put on mute, not on hold
 - Contingency plan if DCO system quits working

Review of P&T Activities

Teresa M. Anekwe, PharmD, BCPS
Clinical Pharmacist

Basal insulins

Uniform Formulary (UF) Basal Insulins		Non-Formulary Basal Insulins
Basal Insulins on BCF MTFs <u>must</u> have on formulary	Basal Insulins not on BCF MTFs <u>may</u> have on formulary	Basal Insulins MTFs <u>must not</u> have on formulary
Insulin glargine 100 u/ml 10 ml vial (Lantus) 3 ml pens (SoloStar)	Insulin detemir 100 u/ml 10 ml vial (Levemir)	Insulin detemir 100 u/ml 3 ml pen (Flexpen)

Clotting Factors

- **The factor VIII product Xyntha be designated as ECF on the UF.**
- **The factor IX product BeneFIX be designated as ECF on the UF.**

Items retain formulary status on the UF

- **Guanfacine ER (Intuniv)**
- **Morphine ER/naltrexone (Embeda) retained**

- a. **The following drugs were designated non-formulary on the Uniform Formulary (UF):**
 - i. **Telmasartan/amlodipine (Twynsta)**
 - ii. **Aliskiren/valsartan (Valturna)**
 - iii. **Zolpidem sublingual (Edluar)**

All have 60 day implementation dates

Other items

- **PDE-5 use for post prost – up to 1 year**
- **Sumavel (sumatriptan needleless) QL**
- **VA-DoD insulin contact**
- **703 update**
- **Prices take 2 weeks to load**

Ongoing and future meetings

- **May – expect signing late June/early July**
 - Lipids
 - BPH drugs

- **Aug**
 - ARB/ACE/DRI and combos
 - Eye NSAID/Mast Cell Stabilizers/Antihistamines

What's New

New TRICARE Formulary Search Tool

TRICARE Formulary Search Tool

Please enter your search criteria below:

The medication is for:

Active duty personnel
 Spouse, dependent or retired military personnel

Enter all or partial search criteria for brand or generic name:

For supplies, [click here](#) for more information.

Visit the **new TRICARE Formulary Search Tool** for details about medications on TRICARE's Uniform Formulary. The new tool contains features that will be pertinent to pharmacists in the MTFs and beneficiary focused for ease of use. There is now a Basic Core Formulary (BCF) indicator that links to the BCF page as well as an Extended Core Formulary (ECF) indicator that links to the "new" ECF page. There is also the "new" Non-formulary (NF) page that has a link to individual agents. The "new" **Formulary Search Tool** has integrated the Prior Authorization and Medical Necessity forms and criteria into the search engine while still maintaining a page with a complete list of all criteria and forms. Any restrictions such as quantity, age and gender limits as well as customized notes will be displayed in the "Notes" section. This should make it easier to find all relevant information about a specific drug instead of trying to click on links to other web pages and sort through vast amounts of information.

PEC Webcast

The PEC webcasts provides a forum to better communicate to the MTFs about P&T activities, plans for future P&T meetings, answer questions regarding VA/DoD National contracts, formulary implementation, and tools/programs available - PMART, Deployment Prescription Program, Controlled Drug Medication Analysis and Reporting Tool (CD-MART), and pharmacy restriction program. Future webcasts will also be conducted to provide deployment information and tool/program updates. We welcome the input from the pharmacy community to provide worthwhile information you can use in your practice settings.

Formulary Information - Extended Core Formulary (ECF)

Text Size: **A+** | **A-**

The **Extended Core Formulary (ECF)** includes medications in therapeutic classes that are used to support more specialized scopes of practice than those on the Basic Core Formulary (BCF). MTFs may choose whether or not to include an ECF therapeutic class on formulary, based on the clinical needs of its patients. However, if an MTF chooses to have an ECF therapeutic class on formulary, it must have all ECF medications in that class on formulary.

Medications are selected for the ECF because they offer significant clinical or cost-effectiveness advantages to MTFs compared to other medications in a therapeutic class. MTFs should utilize BCF or ECF medications to the greatest extent consistent with the clinical needs of their patients.

The **TRICARE Uniform Formulary** and **national pharmaceutical contracts** also affect what medications MTFs are allowed to have on formulary. The following table outlines MTF formulary requirements:

MTFs MUST have on formulary	MTFs MAY have on formulary	MTFs MUST NOT have on formulary
All BCF medications All ECF medications if the therapeutic class is on the MTF formulary	Medications that are on the Uniform Formulary, but not on the BCF or ECF Medications in classes not yet reviewed by the DoD P&T Committee for the Uniform Formulary, unless not allowed by a national pharmaceutical contract	Medications designated as non-formulary under the Uniform Formulary Medications that are not allowed on MTF formularies due to a national pharmaceutical contract .

The DoD P&T Committee is reviewing therapeutic classes for the UF on a class by class basis. For information on classes to be reviewed at upcoming meetings, please visit the **DoD P&T Committee schedule page**. The **DoD P&T Committee** makes recommendations regarding the formulary status of medications on the BCF, ECF, and UF to the Director, TRICARE Management Activity (TMA). The Director, TMA, makes final decisions after considering comments of the **Beneficiary Advisory Panel (BAP)**.

References: **HA policy 04-032, TRICARE Pharmacy Benefit Program Formulary Management**, provides additional information about the BCF, ECF, and Uniform Formulary.

Special Notes

Listings for classes already reviewed by the DoD P&T Committee also include:

Medications designated as non-formulary under the Uniform Formulary. MTFs are not allowed to have these medications on their formularies.

Medications on the Uniform Formulary (UF), but not on the BCF or ECF. MTFs are not required to have any of these medications on formulary, but may choose to add one or more depending on local needs.

Brand names are provided for reference purposes and do not imply the recommendation of a specific product except when noted. For multi-source items, it is expected that the most favorably priced product will be used.

Uniform Formulary (Not BCF or ECF)

Possible Cost Avoidance

- **Compare: Pricing**
- **Twinject**
- **Epipen**
- **Adrenaclick**

- **Shortage due to Apotex (30% of market) no longer making generic product**
- **Prasco stopped making 31 May 2010**
- **Large price disparity**
- **Alternatives:**
 - **Flunisolide is now on National Contract**
 - **Mometasone (Nasonex)**

Warfarin

- **National Contract item**
- **Hazardous waste**
- **Unit dose is for inpatient use only**

MTF Prescription Restriction Program

Hector Morales
Deputy Director, TMA Pharmacy Operations Center

MTF Prescription Restriction Process

- 1. MTF providers identify beneficiary who may have “drug seeking behavior” or high risk of harming self or others**
 - 2. Use Pharmacy Data Transaction Service (PDTs) to set restriction**
 - 3. The provider has the option to:**
 - 1. Restrict all meds to a specific pharmacy and/or provider**
 - 2. Restrict controlled meds to a specific provider or list of providers**
 - 3. Exclude controlled substances or specific non-controlled substance(s) at mail order or retail pharmacy**
- **The restriction form is available on the PEC website:**
- https://rxnet.army.mil/pec/pdts/pdts_mtfs.php?submenuheader=0**

MTF Rx Restriction Request Form

Fax this form to the DoD Pharmacy Operations Center (POC) at (210) 295-2567
To contact the POC dial 1-866-275-4732, option 8

Print Form

Medication Restriction Program

- **MTF communicates to the POC which restriction type to manage pharmacy benefit**

- **Requires signature and coordination of the “Triad Team” comprised of the Provider, Nurse Case Manager, and the MTF Pharmacist**

Coordination between Triad Team and POC when SM is on leave or transfers for care

Civilian-Based Pharmacy Restriction Program

- AD Members assigned to CBWTU
- Community-based Pharmacy Restriction Form
 - Specific retail network pharmacy
 - Specific network provider

For Restriction Removal or temporary lift:

- Contact the POC at 1-866-275-4732 option 8 or send e-mail to:
pds.ameddcs@amedd.army.mil

Retail Medication Restriction Program (1-1-1)

- **Express Scripts, Inc. (ESI) identifies members quarterly**
- **ESI sends data to Managed Care Support Contractor (MCSC) to examines medical & pharmacy claims to include / exclude in program**
- **ESI generates letters to members to select pharmacy, provider & medical facility**
 - Letters not returned in 60 days or undeliverable are set at 100% Prepayment on all control meds
 - Member returns letter with selections
- **ESI sends information to POC to enter selections in PDTS**

Future initiatives

- **Enhanced messaging (PRODUR Warnings) between PDTs and CHCS for MTFs**
 - Providers/Pharmacy will receive warning of beneficiary restriction

OCONUS Restriction on Mail Order Pharmacy
