MDG Facts/Accomplishments

- Currently: #3/75 MTFs in AF w/ 40.1K enrolled
- Jun 15 - Obtained 3 Year AAAHC Accreditation
- Jun 15 - 6 AMW “Effective” UEI Inspection
- May 14 - Aced 1st in DoD, AAAHC no-notice inspection w/ zero findings
- Dec 13 - Obtained Lvl-3 NCQA Certification

Prepare, Prevent, Heal, Deploy (P2HD)
Mental Health Flight

Customer Snapshot:
- Non 6 AMW units account for 70% of substance referrals & 72% of maltreatment cases & 72% of mental health referrals.
- Top Diagnoses include:
  - PTSD
  - Anxiety
  - Depression

Access to Care Process:
- No referral needed (outpatient clinic)
- MH Clinic--Active Duty only
  - Self, Medical, Command referrals
- Urgent walk-in during clinic hours
- Post Crisis Hospitalization

Mental Health Clinic
Customer Snapshot by Service

Prepare, Prevent, Heal, Deploy (P2HD)
PTSD

- FY15: PTSD was top diagnosis and consumed 20% of clinical encounters; if you consider other pre-PTSD anxiety diagnoses it would be up to 35%.

- Established PTSD clinic to enhance training, treatment and oversight of this condition.
  - Weekly staffing; managing co-morbid and complex cases; use of virtual reality equipment; emphasizes evidence based interventions and discussion on providing quality care with positive outcomes.
  - Ensure providers trained on evidence based interventions; partnered with Center for Deployment Psychology.
STRATEGY: Full implementation of the AF Suicide Prevention Program 11 Elements in order to cultivate a fit and ready force by reducing instances of self-directed violence.

Key Factors:
- Leadership role & messaging
- Active Integrated Delivery System (Helping Agencies) resiliency efforts
- Accessible mental health consultation & timely response for crisis situation

Highlights:
- 2 years with No Active Duty suicide
- Jun 15 - UEI Inspection noted program compliant with no noted deficiencies
- 6 MDG/CC participated in AF Suicide Prevention Summit in September

| Established internal DVBIC Clinic within the Mental Health Flight. The partnership provides internal access to a neuropsychologist and social work case manager 2 days per week. | - Grow internal DVBIC clinic  
- Maintain and improve VA & 6 MDG training collaboration  
- Monitor for complications & streamline process when service members separate and transition from 6 MDG care to VA care (i.e. timely follow-up) |

---

**Prepare, Prevent, Heal, Deploy (P2HD)**
Challenges

- “Joint Base” environment
  - Services have different view on Mental Health
  - Different profiling/duty limiting condition processes
  - Integrating prevention services with effective unit saturation
  - Providing mental health consultation; as COCOMS & tenant unit leadership structures vary; creating variation in value and acceptance of input.

- Patient population acuity
  - Rolling average of 20 to 30 patients on High Interest Log
  - ~70 referred to higher care in last year (inpatient/residential)
  - Limited local TRICARE residential treatment with TRUE emphasis on military specific trauma & culture. Drives utilization of regional/national facilities that have good outcomes.
Successes

- “Joint Base” environment
  - We have good relations with COCOMS/tenant units but it requires targeted maintenance; could be enhanced with funding support for Top Secret mental health provider/technician billets, developing an embedding provider concept with CENTCOM (like SOCOM model) and/or funding-authorization for clinic to have one Army mental health provider on staff.

- Internal DVBIC Clinic; March 2015 established MOU with the DVBIC to enhance in identification of TBI patients to ensure appropriate referrals and follow-up care.

- Internal PTSD Clinic; where the treatment of PTSD receives targeted staffing and attention.
