Mission

To provide independent advice and recommendations to maximize the safety and quality of, as well as access to, health care for Department of Defense (DoD) health care beneficiaries.

Ut Omnes Viverent

“That all might live”
Purpose

To provide independent advice and recommendations on matters relating to DoD health care policy and program management; health research programs, treatment and prevention of disease and injury; promotion of health and wellness within the DoD and the delivery of efficient; effective high-quality health care services to DoD beneficiaries; and other health-related matters of special interest to the DoD.
The Defense Health Board (DHB) is a Federal Advisory Committee, subject to requirements of the Federal Advisory Committee Act, Government in the Sunshine Act, and DoDI 5105.04, “DoD Federal Advisory Committee Management Program.”

The DHB charter authorizes up to 19 members and additional members assigned to its five subcommittees; all are recognized experts in the areas of health and health care addressed by the DHB.

All Board members and subcommittee members are appointed by the Secretary of Defense.

The Under Secretary of Defense (Personnel and Readiness) [USD(P&R)] is the DHB’s Sponsor; certain responsibilities are delegated to the Assistant Secretary of Defense (Health Affairs) [ASD(HA)].
Who can task the Board?
• The Secretary of Defense
• The Deputy Secretary of Defense
• The Board’s Sponsor, USD(P&R)
• ASD(HA)
• Other organizations must funnel requests through the USD(P&R) (i.e.: Chairman of the Joint Chiefs of Staff)

No Board-initiated taskings
Board assigns tasking to a Subcommittee if not directed in the Terms of Reference (TOR).

Subcommittee gathers information via:

- Member expertise
- Literature reviews
- Site visits
- Briefings from experts in DoD and civilian sectors

Subcommittee meets regularly up to 1 year or until tasking is completed.

- Tasking (the TOR) may include a response suspense date.
All findings and recommendations are deliberated among subcommittee members - independent of consultation with outside resources.

Subcommittee members with divergent viewpoint may submit an alternate opinion to the Board.

All findings and recommendations proposed to the Board must be presented and deliberated in an open forum (public meetings).

Board meets quarterly to provide updates on taskings and receive briefings on various military health topics (meetings alternate between DHHQ and off-site locations).
Site Visits 2006-2016
History
(1 of 3)

- **1941:** Board for the Investigation and Control of Influenza and other Epidemic Diseases established by Secretary of War
- **1946:** Influenza Board becomes the Army Epidemiological Board (AEB)
- **1946:** Navy and Air Force are included in the AEB
- **1949:** Armed Forces Epidemiological Board (AFEB) is chartered
- **December 1972:** Congressional action dissolves the AFEB
- **January 1973:** New AFEB charter with elimination of the Board’s responsibility for the conduct and oversight of field investigations and contract research
- **2006:** SECDEF initiated top to bottom review of all Federal Advisory Committee boards
  - 60 boards reduced to 37 boards;
  - Combined existing health-related boards: “DoD Health Advisory Board” to be modeled after the Defense Science Board, and became the Defense Health Board (DHB), incorporating AFEB, Armed Forces Institute of Pathology (AFIP), and Board of Directors for Amputee Patient Care Program, and using the AFEB structure.
AFEB Board and Committee Members February 1989

  Director, Mayo Vaccine Research Group; Director for Strategy, Center for Innovation, Mayo Clinic and Foundation

- **Allergy, Infectious Disease, Immunology, Clinical Research**
  Venture Partner, Frazier Healthcare Ventures; Adjunct Professor, Department of Internal Medicine, University of Michigan Medical School
DHB Subcommittees

- **Health Care Delivery:** operational programs, policy development, and research needs in those areas related to delivery of health care to DoD beneficiaries. Subcommittee areas include disease management, health promotion, health care delivery personnel, infrastructure, patient safety, quality management, and prescription formulary issues.

- **Medical Ethics:** specific emphasis on medical ethics, the study of moral values as they apply to medicine, and their practical application in clinical settings.

- **Trauma and Injury:** research and operational policy regarding trauma and injury. The subcommittee shall focus on various matters pertaining to trauma and injury, including prevention, recognition, clinical management, and treatment, and provide external advice and recommendations to the Board.

- **Neurological/Behavioral Health Subcommittee:** research and operational policy regarding psychological health and disorders of the body's nervous system. The Subcommittee’s scope includes the prevention, recognition, clinical management, and treatment of psychological/mental health issues and neurological symptoms or conditions among military Service members and family caregivers.

- **Public Health:** operational programs, policy development, and research programs affecting Service members and their families in U.S. military communities around the globe to promote health and prevent outbreaks.
Current Taskings

- **Improving Defense Health Program (DHP) Medical Research Processes (expected Feb 2017):** examining the processes for conducting DHP medical research and Clinical Investigation Programs within DoD to provide recommendations that will improve visibility of ongoing DHP medical research across DoD, improve efficient of initiating and conducting high quality research without compromising safety or data protection standards, and encourage more professionals to become engaged in research.

- **Deployment Health Centers (DHCs) Review (expected Jun 2017):** conducting a program review and coordination of ongoing research and clinical efforts at the DHC. The DHCs are to be evaluated against their goal to “improve [the] ability to identify, treat, and minimize or eliminate the short and long-term adverse effects of military service on the physical and mental health of veterans” by expanding on current clinical, surveillance, and research efforts.

- **Pediatric Health Care Services (expected Aug 2017):** examining opportunities to improve the overall provision of health care and related services for children of members of the Armed Forces to better promote the health of this beneficiary population and potentially realize cost savings for the Military Health System.

Recently Completed Reports

- Review of the Scientific Evidence of Using Population Normative Values for Post-Concussive Computerized Neurocognitive Assessments (February 2016)
- Continuing Education for Department of Defense Health Professionals (November 2015)
- Sustainment and Advancement of Amputee Care (April 2015)
- Combat Trauma Lessons Learned from Military Operations of 2001 through 2013 (March 2015)
- Deployment Pulmonary Health (February 2015)
Since 2006:

- 40 Quarterly Board meetings
- 279 Subcommittee meetings (in-person/teleconferences through end of calendar year 2016)
- 55 Reports with 684 recommendations
Impact of DHB Reports

Deployment Pulmonary Health (February 2015): Fiscal year 2015 policy direction for DHP medical research, development, test, and evaluation appropriation prioritizes funding of “deployment-related respiratory health with alignment to the latest recommendations from the Defense Health Board.”
Impact of DHB Reports

(2 of 2)

- **Ethical Guidelines and Practices for U.S. Military Medical Professionals** (March 2015): Led to creation of a Medical Ethics Integrated Product Team, which is assessing the status of MHS infrastructure, policies, and training related to ethics and providing advice on needed training, policy, program enhancements as recommended by the Board.

- **Combat Trauma Lessons Learned from Military Operations of 2001 through 2013** (March 2015): DoD developing two major policies supporting the report recommendations, including a policy for the Joint Trauma System Center of Excellence to establish and maintain a global trauma care capability that supports the full range of military operations, and updated guidance for Military Readiness Training, addressing training in Tactical Combat Casualty Care.
