- Common issues with SIT/OHI

- Impact on billing processes

- Helpful Tips & Resources

- DoD Third Party Collections Program (TPCP) activities involve the billing of insurance, medical service, or health plan contracts or agreements on behalf of covered beneficiaries for both Inpatient and Outpatient services provided in Military Treatment Facilities (MTFs) and Dental Treatment Facilities (DTFs), to the fullest extent allowed under 10 U.S.C. 1095, CFR 32, part 220.

- TRICARE is the secondary payer when a covered beneficiary has OHI.
  - OHI does not limit beneficiary's access to care. But if he/she intentionally fails to provide OHI information, he/she could be disqualified for health care services from MTFs

- DoD is authorized to collect "reasonable charges" less the covered beneficiary's appropriate deductible or copayment amount.
  - Cannot balance bill the covered beneficiary

- Funds collected from TPCP payers are returned and used to enhance health care delivery at the MTF providing the care.

Data flow between Defense Enrollment Eligibility Reporting System (DEERS) and MHS GENESIS.
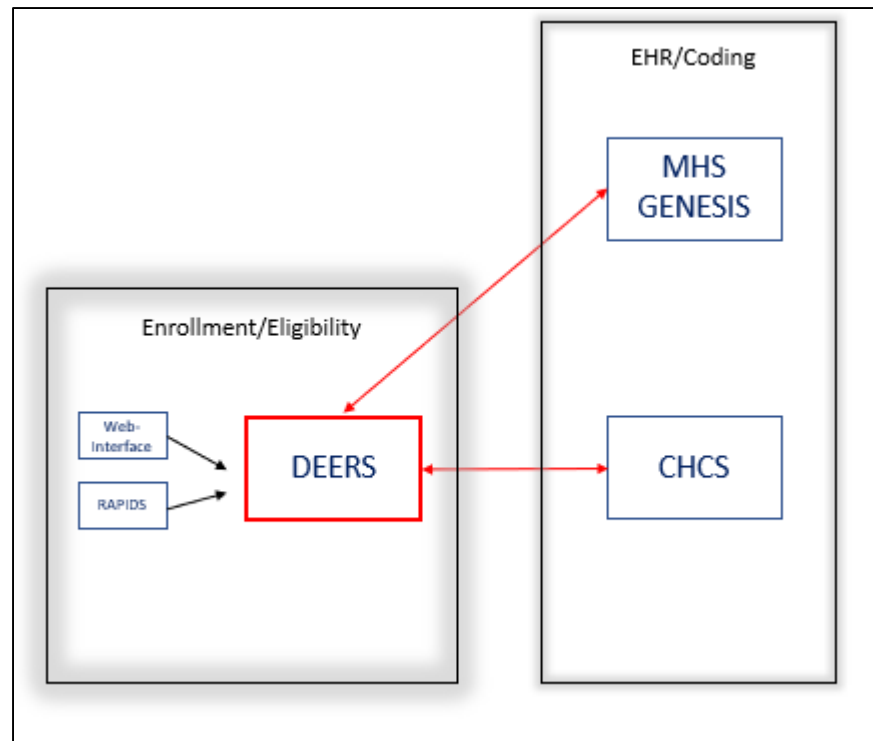

- **What is Other Health Insurance (OHI)?**
  - OHI is any health insurance policy that a TRICARE beneficiary may carry which covers medical, dental, pharmacy, etc. established through an employer, private insurance company or by agreement
  - OHI excludes TRICARE, TRICARE Supplemental plans, Medicare, Medicaid, and certain government-sponsored programs
  - OHI data includes information about a patient's policy such as policy name and number, coverage type, and effective dates of coverage
  - OHI is stored in the SIT in the form of Health Insurance Carrier (HIC) IDs. The HIC ID is assigned by Defense Enrollment Eligibility Reporting System (DEERS) and composed of:
    - First 3 characters of insurance company's name
    - Plus 2-character state abbreviation
    - Plus 4-digit number assigned by DEERS
   - E.g., Aetna of California = AETCA0001

6
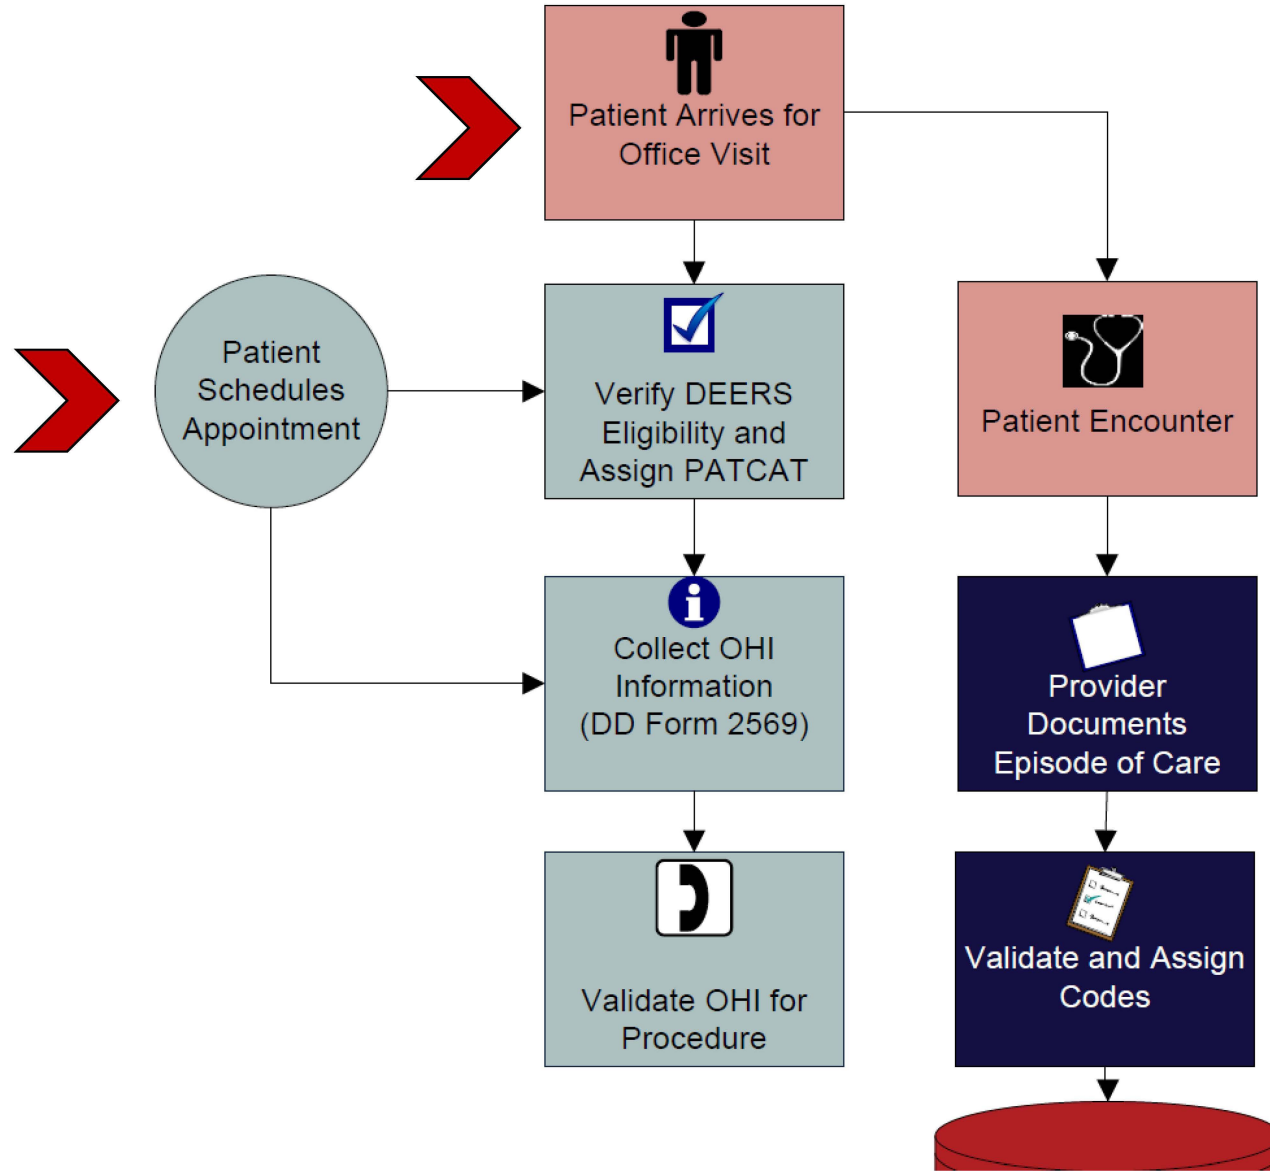

- The DD Form 2569, "Third Party Collection Program/Medical Services Account/Other Health Insurance," is used to collect OHI information from all patients on an annual basis.
  - Form must be verified or updated with the beneficiary at each visit
- Each signed and completed form must be placed in the patient's medical record or stored electronically.
- The DD Form 2569 (v Sep 2016) was recently renewed with an added question #7 to determine if a patient is eligible for Veterans Affairs (VA) benefits.

- Overseen by the Other Health Insurance (OHI) Program Office.

- Identifies OHI for beneficiaries with purchased care experience; discovered OHI shared with direct care if patient was also seen at an MTF.

- OHI Discovery Process:
  - Potential billable encounters are pulled from the MHS Data Repository (MDR) if patients with OHI have direct care experience
  - OHI is linked to each encounter
  - Data is uploaded into DEERS
  - MTFs receive information and bill encounters as is feasible and appropriate

- ABACUS eOHI Discovery searches patients associated with actual transactions.
  - Patient is in LOB billable to third-party insurer
  - Insurance is not already in ABACUS
- Searches 2 weeks worth of patient transactions that are 21 days or older.
- ABACUS Navigation:
  - Patients > OHI Discovery > OHI Discovery Maintenance

- **What is the SIT?**
  - Centralized database in DEERS of commercial HIC IDs and their claims addresses and the types of coverage (XM, MD, RX, DN, VI, etc.) that each HIC offers
  - The centralization of SIT data allows for insurance company claim addresses to be managed and standardized throughout the MHS
  - Excludes insurance companies billed *only* under Medical Affirmative Claims (MAC) and Medical Services Account (MSA) Program
  - SIT has valid HIC name and claims address. OHI policy is "pointed" to the appropriate HIC address

- DHA UBO POGRAM Office (PO) has current process in place for adding Health Plans into MHS GENESIS.

| 1. Health Plan information sent to DHA Global Help Desk* | 2. Escalated to Tier 3 | 3. Production confirmed in MHS GENESIS |
|---|---|---|
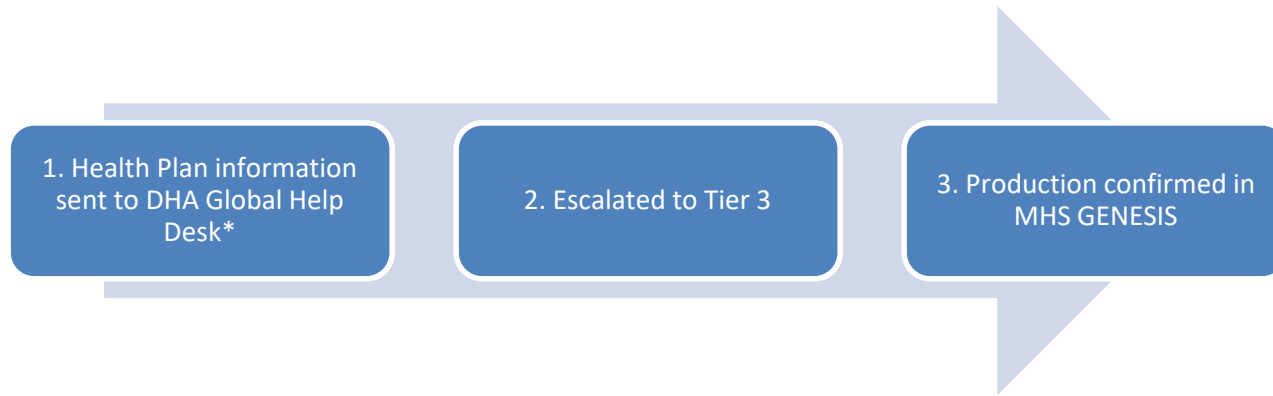

- For additions to the MHS GENSIS Health Plan Database, please send requested HIC ID to the DHA UBO Help Desk at UBO.Helpdesk@altarum.org.
  - Request will be vetted for accuracy and possible duplication

- **What is the SIT/OHI impact on billing processes?**
  - Standardized and centralized SIT and OHI data across the MHS information systems allows MTFs to bill OHI for services rendered. SIT and OHI information is shared with Direct Care and Purchase Care
  - Allows for straightforward changes to the Local SIT
  - Increases potential for Third Party Collections
  - If a patient has OHI and is covered by TRICARE, federal law requires MTFs to collect reasonable payments
  - If a third party payer pays any portion or all of a claim, it will be considered as satisfying the normal medical services or subsistence charges

- Incomplete queries with duplicate HIC entries.

- Use of "RX" prefix: "RXAetna" for insurance carrier.

- Use of commas, periods, symbols: 1.800.234.5678 or 1-800-234-5678- It must look like: **8002345678.**

- Use of Defense Switched Network (DSN) instead of commercial telephone number.

- Invalid insurance carrier telephone number.

- Incorrect Coverage Type: XM, MD entered and insurer is clearly Pharmacy (RX).

- Failure to "cancel" an incorrect entry.

- Loss of connectivity with DEERS:
  - MTF did not subscribe to DEERS during a 7-day period, and local CHCS became out of sync with the central SIT
- MTF must request a full subscription:
  - Menu path:  DAA -> CFT -> CFM -> STM -> SIT -> Subscribe action
  - Select the DOD HIC Full Inquiry secondary menu option
  - Answer "yes" to the question, "Proceed with Full Subscription?"
  - The system will confirm that a Full Subscription has been tasked
  - The data returned from DEERS will be integrated automatically into CHCS

- Use of Placeholder Policies
  - Temporary OHI entry with preliminary/incomplete payer information
  - The word "Placeholder" or either one or a series of 9s is entered into the Insurance Payer field
  - Managed Care Support Contractors routinely create Placeholders as a method to identify potential OHI
  - UBO staff members are **discouraged** from using Placeholder as a valid SIT/OHI entry
- OHI Report
  - MSA -> IFM -> IOR -> OHI
  - Select DMIS ID
  - Select Placeholder

- Remember to:

  - Query the local CHCS SIT table and MHS GENESIS Health Plan Database first before adding a new entry to avoid duplicates
  - Use the commercial telephone number for POC
  - Obtain a valid insurance carrier telephone number
  - Use local comment field for additional information
  - Cancel an entry when it is a mistake
  - **Do not deactivate any Health Insurance Carriers (HICs)**
  - When in doubt, contact the VPOC
    - UBO.Helpdesk@altarum.org

- Decision Tree: When to add a new HIC ID
    1. Perform a search
        - Consider any found carrier as a potential match
    2. Do NOT add a new HIC ID or Health Plan if the search matches:
        - Insurer Name, Address, City, State, and Zip
        - If current telephone # differs, there may be more than one which is considered acceptable
        - A variation in Insurer Name is acceptable
    3. Add a new HIC ID or Health Plan if differences in:
        - Insurer Name, Address, City, State, and Zip

- Pharmacy (Rx), Vision (VI), and Dental (DN) Options

  1. Enter information as a Coverage Type Code under an existing HIC ID or Health Plan

     HIC ID:              FIRPA0001

     HIC NAME:            First Choice

     Coverage Type:      XM

                         123 Capital Street Harrisburg, PA

                         Rx Pharmacy

                         658 Marymount Ave Hershey, PA

- Pharmacy (Rx) Options

2. The Pharmacy Benefit Manager (PBM) as a new HIC ID or Health Plan (e.g., Caremark or Express Scripts)

| | |
|---|---|
| HIC ID | CARAZ0001 |
| HIC NAME | Caremark |
| Coverage Type | Rx |

- All PBMs must be entered as an independent HIC ID or Health Plan with an Rx Coverage Type
