

The Extremity Trauma and Amputation Center of Excellence (EACE)
is proud to host the monthly

Limb Trauma Educational Series

R. Glenn Gaston, MD

Bryan J. Loeffler, MD

Topic: *Targeted Brain Rehabilitation
Using Virtual Reality to Solve Phantom Limb Pain*

Presenters:

R. Glenn Gaston, MD
Bryan J. Loeffler, MD

Live Session: August 26, 2026, at 12:00 PM ET

This session will highlight Drs. Gaston and Loeffler, who have developed Targeted Brain Rehabilitation (TBR) as a treatment option for amputees suffering from phantom limb pain. This novel virtual reality solution is now registered with the FDA as a Class 2 SaMD. This technology has demonstrated an over 50% reduction in phantom limb pain for chronic pain patients and has been highly effective in preventing phantom limb pain when used acutely.
