

# National Museum of Health and Medicine

## Otis Historical Archives

### OHA 73 Anatomical Photographs

**Date of Records:** 1870s

**Size:** 2 cubic feet, 4 boxes

**Finding Aid:** Revised by Eric W. Boyle (2014)

**Access and Use:** The Otis Historical Archives is committed to providing open access to its collections as far as possible within the limits of privacy and confidentiality. Access to this collection is at the discretion of the Otis Historical Archives and material contained within the records may be subject to review before access is granted.

**Series/Scope and Content Note:** This collection consists of a set of photographs of 32 crania collected by the Museum for anthropological study. In the late 19th century the Museum was involved in anthropological research on American Indians but left the field and transferred much of its collection (including these crania) to the Smithsonian Institution. Related documents are located at the Smithsonian's National Anthropological Archives. The following inventory of photographs includes the photograph title, number of copies, cataloging numbers associated with the object, and key words associated with each item.

## BOX AND CONTENT LIST

Photo #	Title	Cat. #s	Keywords
01	Cranium of an aged male Kanaka, Side	AS 433	Anthropology, Sandwich Islands
