

# Mosquitoes? Not in my backyard!

Backyard mosquitoes can transmit diseases such as  
**Chikungunya, Dengue Fever, and Zika**

Mosquitoes can develop in a spoon-full of water  
**Empty any standing water around your home**

**Clogged Gutters**

**Toys left outside**

**Rain Barrels**

**Pools & Tarps**

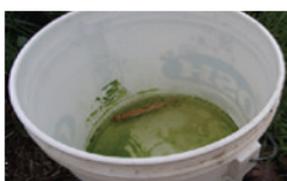

**Plant Pots & Saucers**

**Bird Baths**

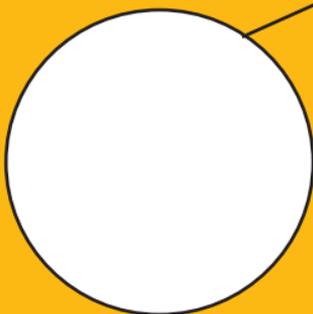

**Tires**

**Buckets**

These mosquitoes do not fly far from where they're breeding  
**If you are being bitten, they're breeding nearby!**

# Protect yourself and your family

1. Remove any standing water in your yard
2. Use a lotion or spray with an EPA approved insect repellent with at least 20% Picaridin or DEET and/or IR3535.
3. Wear clothing treated with a long-lasting insecticide such as Permethrin
