Surveillance Items of Note:

- Influenza A/H3 cases continue at border surveillance sites in Imperial County, CA.
- Norovirus outbreak at NRTC Great Lakes has slowed down.

FEBRILE RESPIRATORY ILLNESS CASES:

Military Recruits

CDC-BIDS (Border)

DoD Beneficiaries

Legend:
- Adenovirus
- Flu A/H1
- Flu A/H3
- Flu B/Victoria
- Flu B/Yamagata
- Rhinovirus
- RSV
- M. pneumoniae
- C. pneumoniae

AGE RECRUIT SURVEILLANCE:

Among 127 FRI/SARI samples received from Imperial County in November, 51(40%) were positive for influenza A/H3.

There were two influenza A/H3 cases at Naval Branch Clinic Yuma on 14-15Nov, the first influenza outside California in NHRC surveillance this season.

US MEXICO BORDER ILLI CASES:

Outbreak of AGE due to Shiga toxin-producing *E. coli* (STEC) among recruits at MCRD San Diego and Camp Pendleton has ended. There were a total of 55 confirmed cases, 57 probable cases, 130 suspected cases and 14 confirmed hemolytic uremic syndrome cases.

NHRC testing showed *E. coli* O157 expressing the Stx2 Shiga toxin to be responsible for the STEC outbreak.
