

DMVL Update - UpToDate Anywhere

Users have access to the mobile app for UpToDate Online; it's called UpToDate Anywhere.

UpToDate Online is an evidence-based, physician-authored clinical decision support resource to make point-of-care decisions. Access peer-reviewed, fully-referenced topical reviews in primary care, internal medicine, family practice, ob/gyn & women's health, plus the following subspecialties: cardiovascular medicine, endocrinology & diabetes, gastroenterology & hepatology, hematology, infectious disease, nephrology & hypertension, neurology, oncology, pulmonary & critical care medicine, and rheumatology. UpToDate Online is accessible via the DMVL portal at www.health.mil/dmvl.

Because our subscription to UpToDate Online is through the US Army Medical Command (AMEDD), you will need to register for an UpToDate Anywhere account through the AMEDD link. One caveat--This type of access does require you to re-verify your affiliation with Army Medical Command once every 30 days.

If you wish to register for UpToDate Anywhere, follow these steps:

1. Go to <http://medlinet.amedd.army.mil>.
2. Scan down column of Databases along left hand side till you reach UpToDate.
3. Click on UpToDate.
4. You should be authenticated via your CAC.
5. Click on 'My Account' from the task bar along the top of the page. The page will have the following message:
"Welcome to My Account.
You must register with UpToDate before using the features of My Account. Click here to register."
6. Register as a New User.
7. You'll receive an email with instructions on how to get the app after registration.

To access previous DMVL Updates, go to our homepage at www.health.mil/dmvl and click on the DMVL Updates button on the left side of the page.
