

The mission of the Program Executive Office, Defense Healthcare Management Systems (PEO DHMS) is transform the delivery of healthcare and advance data sharing through a modernized electronic health record for service members, veterans and their families.

The Program Executive Office, Defense Healthcare Management Systems (PEO DHMS) is an acquisition organization that oversees three program offices. These offices acquire, deliver and support information technology and services that enable data sharing and modernization of the electronic health record (EHR). PEO DHMS oversees the DoD Healthcare Management System Modernization (DHMSM®) program office, the Joint Operational Medicine Information Systems (JOMIS) program office and the Enterprise Intelligence and Data Solutions (EIDS) program office.

We strive to achieve our purpose via four key strategies:

**Innovation** - We value innovation, new ideas and creative approaches to problem solving. We achieve results by looking beyond the “now” to formulate strategies for future success. We foster inventive methods, anticipate risks and prepare for contingencies.

**Superior Execution** - We deliver high quality solutions applying acquisition best practices with speed and efficiency. We maintain a high-achieving culture to deliver timely, customer-focused results.

**Responsiveness** - We value transparency and honest communication with our stakeholders, including but not limited to: our functional community, beneficiaries, Health IT partners, Congress and auditors.

**Fiscal Accountability** - We strive to maintain efficient, effective fiscal stewardship, making every dollar count. We commit to competition and openness to ensure prudent decision-making and responsible stewardship.

Transforming Healthcare Through  
Acquisition Excellence

PROGRAM EXECUTIVE OFFICE  
DEFENSE HEALTHCARE MANAGEMENT SYSTEMS

1700 N. Moore Street, Suite 2300  
Arlington, VA 22209

## ENTERPRISE INTELLIGENCE AND DATA SOLUTIONS (EIDS)

EIDS supports the strategic goals of the Military Health System and facilitates informed decision-making through the delivery of robust information services and data in a timely, relevant and actionable manner.

-  Delivers first-class data platforms for advanced analytics, business intelligence, registries and data discovery capabilities
-  Enables data availability to providers when and where they need it

## DoD HEALTHCARE MANAGEMENT SYSTEM MODERNIZATION (DHMSM)

DHMSM oversees DoD's deployment of the single common record, known in DoD as MHS GENESIS.

-  Refines deployment and sustainment to optimize delivery of MHS GENESIS
-  Manages engineering, testing, logistics, business operations, change management, and communications to ensure a successful deployment of MHS GENESIS

## JOINT OPERATIONAL MEDICINE INFORMATION SYSTEMS (JOMIS)

JOMIS provides interoperable medical information technology capabilities to the warfighter across the full spectrum of military operations. JOMIS deploys joint software solutions to operational medicine providers, decision-makers, medical logisticians, planners and others.

-  Modernizes solutions encompassing health care delivery, patient movement, medical situational awareness, medical command and control and medical logistics
-  Manages Medical Common Operating Picture (MedCOP), which provides real-time health surveillance and medical operations visibility
