

Blast Overpressure—A Panel Discussion

TBICoE EDUCATION SERIES

Traumatic Brain Injury Center of Excellence

Friday, Sept. 18, 2026

2 to 4 p.m. ET

This session will bring together operational, safety, medical, and scientific leaders in the field of blast overpressure to address its effects on service members, military operations, and long-term health. Panel members will discuss real-world exposure, current safety standards, risk mitigation strategies, and best practices to reduce blast-related risk while maintaining mission readiness. Bring your questions and join the conversation!

Registration is not required. Click the "Join on MS Teams" button below to attend.
