## East-South ♦ Quarter 2 FY 2018

Defense Health Cost Assessment & Program Evaluation

### Inside Consumer Watch

TRICARE Consumer Watch is a brief summary of what TRICARE users in your region say about their healthcare. Data are taken from the Health Care Survey of DoD Beneficiaries (HCSDB). The HCSDB includes questions from the Consumer Assessment of Healthcare Providers and Systems (CAHPS), a survey designed to help consumers choose among health plans. The survey for quarter four of FY2017 was canceled.

Benchmark data, from the National Committee for Quality Assurance (NCQA) for 2017, are used in calculating benchmarks. Rates differing significantly from the benchmark are in italics and shown in red or green.

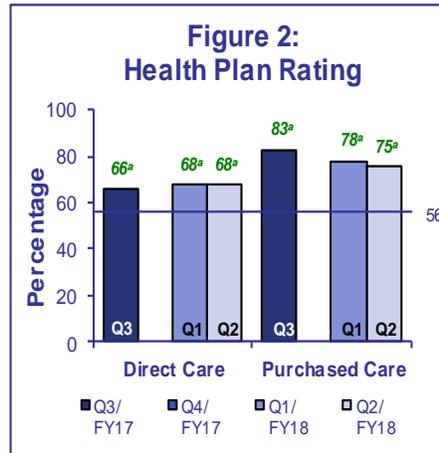

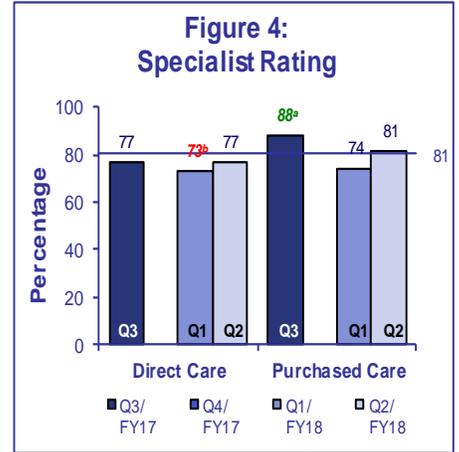

**Legend:**

- Direct Care
- Purchased Care
- Benchmark

**a** Significantly exceeds benchmark ( $p < .05$ )

**b** Significantly falls short of benchmark ( $p < .05$ )

Figures 1 through 4 show the proportion of Prime enrollees with a military PCM (direct care), or enrolled to a civilian PCM, or using Standard/Extra for most of their care in the past year (purchased care) who respond 8 or above when asked to give a rating on a 0 to 10 scale (0 is bad, and 10 is good), for Health Care, Health Plan, Personal Doctor, or the Specialist they see most often. Rates are adjusted for age and health status.

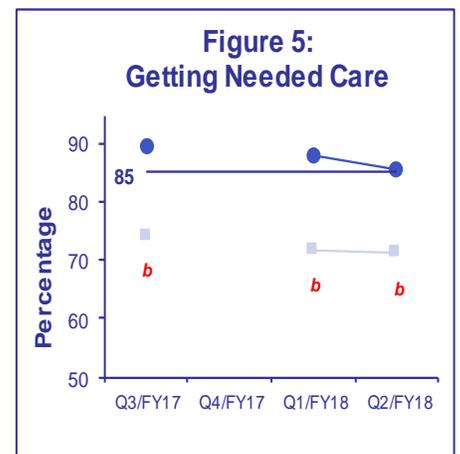

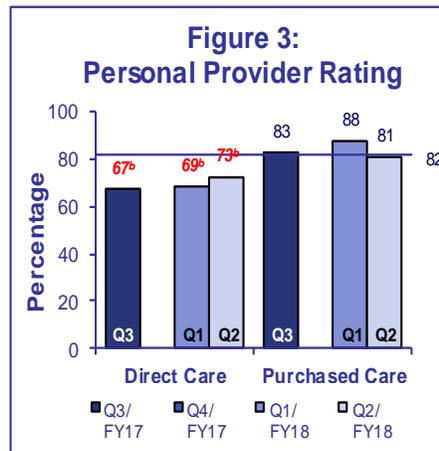

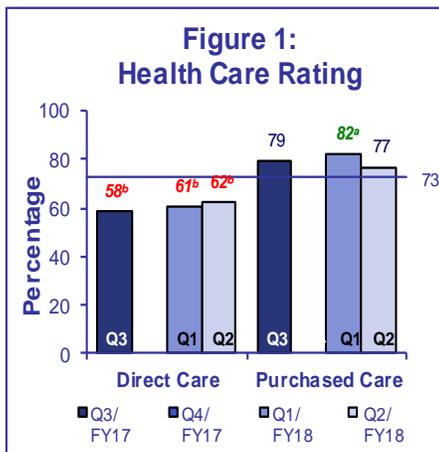

### Health Care Topics

Health Care Topics scores average together results for related questions.

Each score is the percentage who “usually” or “always” got treatment they wanted. Asterisks show values significantly different from the benchmark ( $p < .05$ ).

Figure 5 presents the composites “Getting needed care”. Scores are based on patients’ problems getting referrals and approvals and getting needed treatment.

“Getting care quickly” shown in Figure 6 scores concern how long patients wait for an appointment or wait in the doctor’s office.

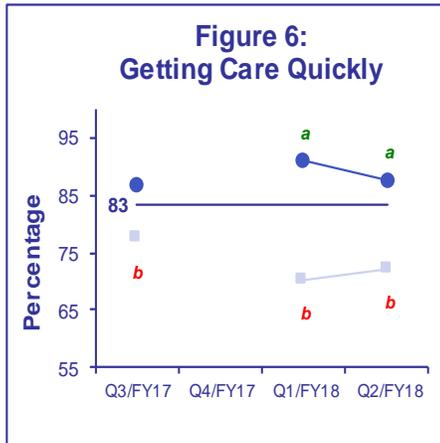

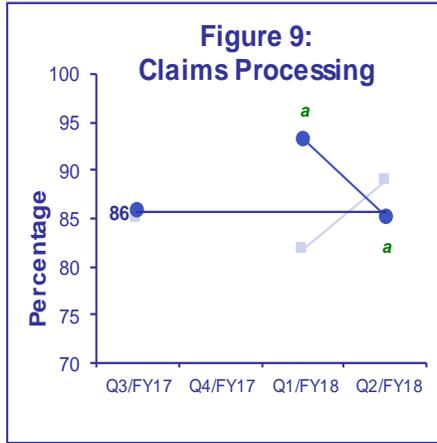

Figure 8 shows “Customer service” scores, which concern patients’ ability to get information about their health plan.

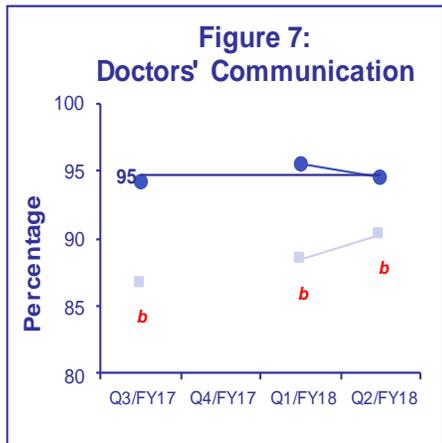

“Claims processing” scores in Figure 9 are based on the timeliness and correctness of plan’s claims handling.

### Preventive Care

The preventive care table compares TRICARE users’ rates for diagnostic screening tests and smoking and tobacco use cessation with goals from Healthy People 2020, a government initiative to improve Americans’ health by preventing illness.

Scores in Figure 7, “Doctor’s communication” are based on whether the doctor spends enough time with patients, treats them respectfully and answers their questions.
