

Prime Enrollees Consumer Watch

EAST • Quarter 2 FY 2020

DIRECTORATE OF STRATEGY, PLANNING AND FUNCTIONAL INTEGRATION (J-5)

Inside Consumer Watch

TRICARE Consumer Watch shows what TRICARE Prime enrollees in your region say about their healthcare in the Health Care Survey of DoD Beneficiaries (HCSDB). Every quarter, a representative sample of adult TRICARE beneficiaries are asked about their care in the last 12 months and the results are adjusted for age and health status and reported in this publication. This publication reports results for beneficiaries under age 65 and compares responses for beneficiaries with a military primary care manager (PCM) (direct care) to those with a TRICARE-authorized civilian provider (purchased care). These results are compared to civilian benchmarks which are adjusted for age and health status to match the population of TRICARE beneficiaries.

The HCSDB includes questions from the Consumer Assessment of Healthcare Providers and Systems (CAHPS), a survey designed to help consumers choose among health plans. Benchmark data comes from the National Committee for Quality Assurance (NCQA) for 2018 as well as the U.S. Department of Health and Human Services Healthy People 2020 (HP2020) goals.

Results

Source: **Health Care Survey of DoD Beneficiaries**

This section displays a series of charts showing percentages of beneficiaries who rated a certain aspect of their care highly in the surveys fielded in the second quarter of fiscal year 2020, describing the period January 2019 to December 2019, and each of the 2 previous quarters. These ratings are compared to the civilian benchmark indicated with a horizontal line. Percentages that differ significantly from the benchmark are indicated with filled points and percentages that do not differ significantly from the benchmark are indicated with open points.

The same information displayed in Figures 1-9 is given in tabular form in the corresponding figures in the appendix.

How to read the charts:

●	▲	Percentage of respondents giving a high rating
●	▲	Value differs significantly from benchmark
○	△	Value does not significantly differ from benchmark
—	Benchmark (horizontal red line without point)

Health Care

Prime enrollees were asked to rate their healthcare from 0 to 10, where 0 is worst and 10 is best. Figure 1 shows the percentage of direct care users and purchased care users who rated their healthcare 8 or above for each reporting period. Health care ratings depend on things like access to care, and how patients get along with the doctors, nurses, and other care providers who treat them.

Figure 1: High Rating of Health Care

Health Plan

Prime enrollees were asked to rate their health plan from 0 to 10, where 0 is worst and 10 is best. Figure 2 shows the percentage of direct care users and purchased care users who rated their plan 8 or above for each reporting period. Health plan ratings depend on access to care and how the plan handles things like claims, referrals and customer complaints.

Figure 2: High Rating of Health Plan

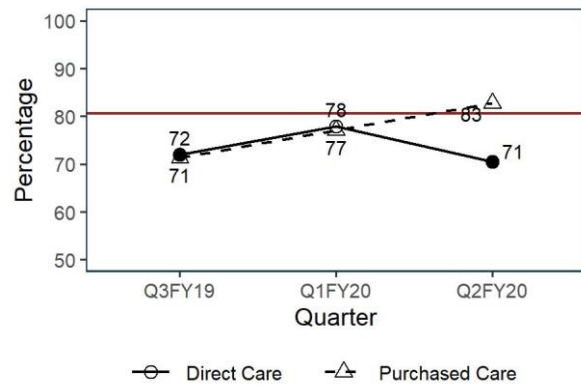

Specialist

Enrollees who have consulted specialist physicians were asked to rate from 0 to 10 the specialist they had seen most in the previous 12 months.

Figure 4 shows the proportion of direct care users and purchased care users who rated their specialist 8 or above for each reporting period. Specialist ratings depend on beneficiaries' access to doctors with the special skills they need.

Figure 4: High Rating of Specialty Care

Personal Provider

Prime enrollees who have a personal provider were asked to rate their personal provider from 0 to 10, where 0 is worst and 10 is best.

Figure 3 shows the percentage of direct care users and purchased care users who rated their doctor 8 or above for each reporting period. Personal doctor ratings depend on how the patient gets along with the one doctor responsible for their basic care.

Figure 3: High Rating of Personal Provider

Health Care Topics

Health Care Topics scores average together results for related questions. Each score is the percentage who “usually” or “always” got treatment they wanted or had “no problem” getting a desired service.

Figure 5 (Getting Needed Care) includes getting referrals to a specialist and getting needed treatments.

Figure 5: High Rating of Getting Needed Care

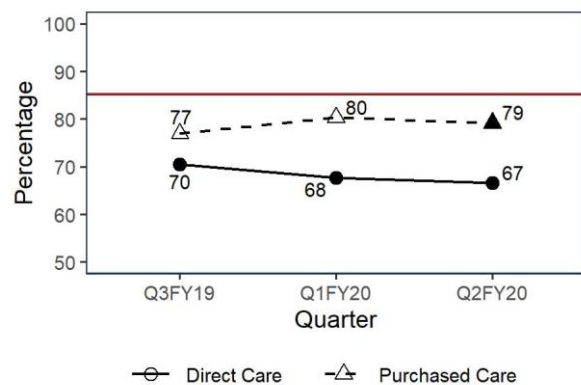

Figure 6 (Getting Care Quickly) concerns how long patients wait for an appointment or urgent care.

Figure 6: High Rating of Getting Care Quickly

Figure 9 (Claims processing includes both the timeliness and correctness of plan’s claims handling.

Figure 9: High Rating of Claims Processing

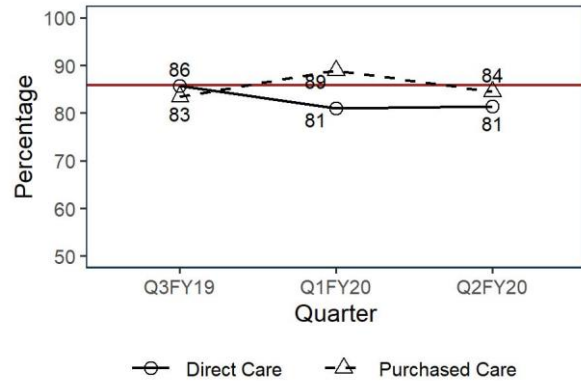

Figure 7 (Doctor’s Communication) includes the composite for “How well doctors communicate.” Scores in “How well doctors communicate” are based on whether the personal doctor spends enough time with patients, treats them respectfully and answers their questions.

Figure 7: High Rating of Doctor Communication

Preventive Care

Table 1 compares direct care users and purchased care users’ rates for diagnostic screening tests and smoking cessation with goals from Healthy People 2020, a government initiative to improve Americans’ health by preventing illness.

The mammography rate shown is the proportion of women 40 or above with a mammogram in the past two years. Pap smear is the proportion of adult women screened for cervical cancer in the past three years.

Hypertension is the proportion of adults whose blood pressure was checked in the past two years and who know whether their pressure is too high. Prenatal care is the proportion of women pregnant now or in the past 12 months who received prenatal care in their first trimester. Percent not obese is the proportion with a body mass index below 30. The non-smoking rate is the proportion of adults who currently do not smoke. Counseled to quit is the number of smokers or tobacco users whose doctor told them to quit, over the number of smokers and tobacco users with an office visit in the past 12 months.

Figure 8 (Customer service) includes patients’ ability to get courteous service and information about their health plan.

Figure 8: High Rating of Customer Service

Table 1: Preventive Care

Type of Care	Group	Q3FY19	Q1FY20	Q2FY20	HP2020 Goal
Mammography	Direct Care	83 (600)	84 (641)	83 (630)	81
Mammography	Purchased Care	92 ^a (41)	79 (62)	86 (138)	81
Pap Smear	Direct Care	72 ^b (1104)	79 ^b (1208)	73 ^b (1152)	93
Pap Smear	Purchased Care	88 (59)	75 ^b (83)	78 ^b (255)	93
Hypertension	Direct Care	90 ^b (2620)	91 ^b (2806)	91 ^b (2863)	95
Hypertension	Purchased Care	98 (95)	96 (158)	93 (403)	95
Prenatal Care (in 1st trimester)	Direct Care	94 ^a (98)	94 ^a (101)	95 ^a (86)	85
Prenatal Care (in 1st trimester)	Purchased Care	-	-	-	85
Percent Not Obese	Direct Care	77 ^a (2419)	78 ^a (2628)	77 ^a (2653)	69
Percent Not Obese	Purchased Care	55 ^b (92)	67 (139)	73 (364)	69
Non-Smokers (adults)	Direct Care	94 ^a (2519)	93 ^a (2710)	92 ^a (2750)	88
Non-Smokers (adults)	Purchased Care	97 ^a (90)	96 ^a (155)	94 ^a (383)	88
Counseled To Quit (adults)	Direct Care	80 (270)	86 ^a (298)	69 (340)	76
Counseled To Quit (adults)	Purchased Care	-	-	79 (33)	76

^a significantly exceed the Healthy People 2020 goal (p < .05).

^b significantly fell short of the Healthy People 2020 goal (p < .05).

- Indicates suppressed due to small sample size.

The numbers in parentheses indicate number of respondents.

Appendix

The appendix displays the same information displayed in Figures 1-9 and Table 1, in tabular form.

Table A.1: High Rating of Health Care

Group	Percentage	Significance
Benchmark Q2FY20	73	NA
Direct Care Q3FY19	56	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	54	Significantly lower than benchmark (p < .05)
Direct Care Q2FY20	54	Significantly lower than benchmark (p < .05)
Purchased Care Q3FY19	78	Value is not significantly different than benchmark
Purchased Care Q1FY20	73	Value is not significantly different than benchmark
Purchased Care Q2FY20	72	Value is not significantly different than benchmark

Table A.2: High Rating of Health Plan

Group	Percentage	Significance
Benchmark Q2FY20	56	NA
Direct Care Q3FY19	61	Significantly higher than benchmark (p < .05)
Direct Care Q1FY20	62	Significantly higher than benchmark (p < .05)
Direct Care Q2FY20	57	Value is not significantly different than benchmark
Purchased Care Q3FY19	61	Value is not significantly different than benchmark
Purchased Care Q1FY20	72	Significantly higher than benchmark (p < .05)
Purchased Care Q2FY20	68	Significantly higher than benchmark (p < .05)

Table A.3: High Rating of Personal Provider

Group	Percentage	Significance
Benchmark Q2FY20	81	NA
Direct Care Q3FY19	71	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	69	Significantly lower than benchmark (p < .05)
Direct Care Q2FY20	70	Significantly lower than benchmark (p < .05)
Purchased Care Q3FY19	88	Significantly higher than benchmark (p < .05)
Purchased Care Q1FY20	75	Value is not significantly different than benchmark
Purchased Care Q2FY20	77	Value is not significantly different than benchmark

Table A.4: High Rating of Specialty Care

Group	Percentage	Significance
Benchmark Q2FY20	81	NA
Direct Care Q3FY19	72	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	78	Value is not significantly different than benchmark
Direct Care Q2FY20	71	Significantly lower than benchmark (p < .05)
Purchased Care Q3FY19	71	Value is not significantly different than benchmark
Purchased Care Q1FY20	77	Value is not significantly different than benchmark
Purchased Care Q2FY20	83	Value is not significantly different than benchmark

Table A.5: High Rating of Getting Needed Care

Group	Percentage	Significance
Benchmark Q2FY20	85	NA
Direct Care Q3FY19	70	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	68	Significantly lower than benchmark (p < .05)
Direct Care Q2FY20	67	Significantly lower than benchmark (p < .05)
Purchased Care Q3FY19	77	Value is not significantly different than benchmark
Purchased Care Q1FY20	80	Value is not significantly different than benchmark
Purchased Care Q2FY20	79	Significantly lower than benchmark (p < .05)

Table A.6: High Rating of Getting Care Quickly

Group	Percentage	Significance
Benchmark Q2FY20	83	NA
Direct Care Q3FY19	72	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	64	Significantly lower than benchmark (p < .05)
Direct Care Q2FY20	70	Significantly lower than benchmark (p < .05)
Purchased Care Q3FY19	96	Significantly higher than benchmark (p < .05)
Purchased Care Q1FY20	83	Value is not significantly different than benchmark
Purchased Care Q2FY20	84	Value is not significantly different than benchmark

Table A.7: High Rating of Doctor Communication

Group	Percentage	Significance
Benchmark Q2FY20	95	NA
Direct Care Q3FY19	89	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	89	Significantly lower than benchmark (p < .05)
Direct Care Q2FY20	87	Significantly lower than benchmark (p < .05)
Purchased Care Q3FY19	97	Value is not significantly different than benchmark
Purchased Care Q1FY20	91	Value is not significantly different than benchmark
Purchased Care Q2FY20	94	Value is not significantly different than benchmark

Table A.8: High Rating of Customer Service

Group	Percentage	Significance
Benchmark Q2FY20	84	NA
Direct Care Q3FY19	80	Significantly lower than benchmark (p < .05)
Direct Care Q1FY20	80	Significantly lower than benchmark (p < .05)
Direct Care Q2FY20	78	Significantly lower than benchmark (p < .05)
