

Contract No.: 233-02-0086
MPR Reference No.: 6077-500

2005 Health Care Survey of DoD Beneficiaries:

Adult Codebook and User's Guide

Quarter I

Submitted to:

TRICARE Management Activity
5111 Leesburg Pike, Suite 810
Falls Church, VA 22041
(703) 681-4263

Task Order Officer:

Richard Bannick, Ph.D. FACHE

Submitted by:

Mathematica Policy Research, Inc.
600 Maryland Ave., SW, Suite 550
Washington, DC 20024-2512
(202) 484-9220

Project Director:

Eric Schone, Ph. D.

Table of Variables

		Page
QUARTERLY FREQUENCIES		
SAMPLING VARIABLES		
MPRID	- Unique MPR Identifier	91
SVCSMPL	- Branch of Service Sampling Variable.....	91
SEXSMPL	- Sex Sampling Variable	91
STRATUM	- Sampling STRATUM.....	91
CACSMPL	- Catchment Area	100
ENBGSMPL	- Enrollment by beneficiary category	102
MPCSMPL	- Military Personnel Category	103
NHFF	- Stratum Sample Size	103
SERVAREA	- Service Area.....	103
QUARTER	- Survey Quarter	104
DCATCH	- Catchment Area	104
ENRID	- Enrollment DMIS ID	107
DMIS_ID	- DMIS ID.....	114
MSM	- Multiple Service Market Areas	122
D_FAC	- Facility Type Code.....	123
D_PAR	- DMIS Parent ID	123
D_HEALTH	- Health Service Region.....	128
TNEXREG	- TRICARE Next Generation of Contracts Region grouping	128
E1	- Eligibility indicator for period = 1.....	128
E2	- Eligibility indicator for period = 2.....	128
E3	- Eligibility indicator for period = 3.....	129
E4	- Eligibility indicator for period = 4.....	129
E5	- Eligibility indicator for period = 5.....	129
E6	- Eligibility indicator for period = 6.....	129
E7	- Eligibility indicator for period = 7.....	129
E8	- Eligibility indicator for period = 8.....	130
E9	- Eligibility indicator for period = 9.....	130
E10	- Eligibility indicator for period = 10.....	130
E11	- Eligibility indicator for period = 11.....	130
E12	- Eligibility indicator for period = 12.....	130
E13	- Eligibility indicator for period = 13.....	131
E14	- Eligibility indicator for period = 14.....	131
E15	- Eligibility indicator for period = 15.....	131
E16	- Eligibility indicator for period = 16.....	131
E17	- Eligibility indicator for period = 17.....	131
SERVAFF	- Service Affiliation.....	132
BWT	- Basic Sampling Weight	132
DEERS VARIABLES		
MRTLSTAT	- Marital Status	132
RACEETHN	- Race/Ethnic Code	133
PNSEXCD	- Person Gender	133
LEGDDSCD	- DDS Code	133
DAGEQY	- Age at time of data collection	134
FIELDAGE	- Age at start of fielding period	134
PCM	- Primary Manager Code (Civilian or Military).....	134
DBENCAT	- Beneficiary Category	135
DMEDELG	- Medical Privilege Code.....	135
DSPONSVC	- Derived Sponsor Branch of Service	135
MBRRELCD	- Member Relationship Code.....	136

MEDTYPE	- Medicare Type.....	136
PATCAT	- Aggregated Beneficiary Category	136
PNLCATCD	- Personnel Category Code (Duty Status)	137

QUESTIONNAIRE RESPONSES

H05001	- Are you the person listed on envelope	137
H05002A	- Health plan(s) covered: TRICARE Prime.....	137
H05002C	- Health plan(s) covered: TRICARE Ext/Stnd.....	137
H05002F	- Health plan(s) covered: MEDICARE	138
H05002G	- Health plan(s) covered: FEHBP	138
H05002H	- Health plan(s) covered: Medicaid.....	138
H05002I	- Health plan(s) covered: Civilian HMO	138
H05002J	- Health plan(s) covered: Other civilian	138
H05002K	- Health plan(s) covered: USFHP	139
H05002L	- Health plan(s) covered: Not sure	139
H05002M	- Health plan(s) covered: Veterans.....	139
H05002N	- Health plan(s) covered: TRICARE Plus	139
H05002O	- Health plan(s) covered: TRICARE For Life.....	139
H05003	- Currently Covered Medicare Part A	140
H05004	- Currently Covered Medicare Part B	140
H05005	- Currently Covered Medicare Supplemental	140
H05006	- Which health plan did you use most in the past 12 months?	141
H05007	- Years in a row with health plan	141
H05008	- Have one person you think of as personal doctor.....	141
H05009	- Rating of your personal doctor or nurse.....	142
H05010	- Had same personal Dr/nurse before joining health plan.....	142
H05011	- Health plan: problem to get a personal doctor or nurse you are happy with.....	142
H05012	- In last year: you or a doctor or nurse think you needed to see a specialist.....	143
H05013	- In last year: how much of a problem to see a specialist you needed to see.....	143
H05014	- In last year: did you see a specialist.....	143
H05015	- Rating of specialist seen most often in last year	144
H05016	- In last year: called a doctor's office or clinic during regular office hours to get help or advice for yourself.....	144
H05017	- In last year: when you called during regular office hours how often got help or advice you needed.....	144
H05018	- In last year: have illness/injury/condition that needed care right away.....	145
H05019	- In last year: when needed care right away for an illness or injury got care as soon as wanted.....	145
H05020	- In last year: wait between trying to get care and actually seeing a provider for an illness or injury	145
H05021	- In last year: made any appointment for regular or routine health care.....	146
H05022	- In last year: how often made appointments for regular or routine health care as soon as you wanted	146
H05023	- In last year: days between making an appointment for regular or routine care and actually seeing a provider	146
H05024	- In last year: times went to an emergency room for own care.....	147
H05025	- In last year: times went to a doctors office or clinic for yourself (not counting times went to an emergency room)	147
H05026	- In last year: did you/Dr believe you needed any care, tests, or treatment.....	147
H05027	- In last year: problem to get necessary care	148
H05028	- In last year: need approval from health plan for any care, tests, or treatment.....	148
H05029	- In last year: problem with delays in healthcare while waiting for approval from health plan.....	148
H05030	- In last year: how often taken to exam room within 15 minutes of appointment	149
H05031	- In last year: how often office staff at a doctor's office or clinic treat you with courtesy and respect.....	149
H05032	- In last year: how often office staff at a doctor's office or clinic as helpful as expected	149
H05033	- In last year: how often doctors or other health providers listen carefully to you.....	150

H05034	- In last year: how often doctors or other health providers explain things in way you could understand.....	150
H05035	- In last year: how often doctors or other health providers show respect for what you had to say.....	150
H05036	- In last year: how often doctors or other health providers spend enough time with you.....	151
H05037	- Rating of all healthcare in last year.....	151
H05038	- In last year: facility used most for health care.....	152
H05039	- In last year: sent in any claims to your health plan.....	152
H05040	- In last year: health plan handled claims in a reasonable time.....	152
H05041	- In last year: how often health plan handled claims correctly.....	153
H05042	- In last year: look for any information in written materials/internet on how health plan works.....	153
H05043	- In last year: problem to find or understand information in the written materials/internet.....	153
H05044	- In last year: called health plan's customer service to get information or help.....	154
H05045	- In last year: problem to get the help you needed when called health plan's customer service.....	154
H05046	- In last year: have to fill out paperwork for your health plan.....	154
H05047	- In last year: how much problem with paperwork for your health plan.....	154
H05048	- Rating of all experience with health plan.....	155
H05049	- Blood pressure: when last reading.....	155
H05050	- Blood pressure: know if blood pressure is too high or not.....	155
H05051	- When did you last have a flu shot.....	156
H05052	- Smoked at least 100 cigarettes in life.....	156
H05053	- Smoke everyday, some days, or not at all.....	156
H05054	- How long since you quit smoking.....	156
H05055	- Last year: number of visits advised to quit smoking.....	157
H05056	- Last year: number of visits medication was recommended or discussed to assist with quitting smoking.....	157
H05057	- Last year: number of visits recommended or discussed methods and strategies to assist quitting smoking.....	157
H05058	- Are you male or female.....	158
H05059	- Female: Last have a Pap smear test.....	158
H05060	- Female: Are you under age 40.....	158
H05061	- Female: Last time breasts checked mammography.....	159
H05063	- Female: Been pregnant in last year or pregnant now.....	159
H05064	- Female: In what trimester is your pregnancy.....	159
H05065	- Female: Trimester first received prenatal care.....	160
H05066	- In general how would you rate your overall health.....	160
H05067	- Limited in any way in any activities because of any impairment or health problem.....	160
H05068	- Are you Spanish/Hispanic/Latino.....	161
SREDA	- Highest grade completed.....	161
SRRACEA	- Race: White.....	161
SRRACEB	- Race: Black or African American.....	162
SRRACEC	- Race: American Indian or Alaska Native.....	162
SRRACED	- Race: Asian.....	162
SRRACEE	- Race: Native Hawaiian/other Pacific Islanders.....	162
SRAGE	- What is your age now?.....	163
S05H01F	- Height without shoes (feet).....	163
S05H01I	- Height without shoes (inches).....	163
S05H02	- Weight without shoes.....	164
S05H03	- In last year: #times exercised vigorously for more than 10 minutes.....	168
S05H04	- Length of time these vigorous activities usually take.....	169
S05H05	- In last year: #times exercised moderately for more than 10 minutes.....	169
S05H06	- Length of time these moderate activities usually take.....	169
S05H07	- In last 30 days: days per week/month consumed at least one alcoholic drink.....	170

S05H08	- Number of drinks drank on average on days when you drank.....	170
S05H09	- In last 30 days: #times had 5 or more alcoholic drinks per occasion.....	170
S05H10	- Consider self to be overweight, underweight or right	171
S05H11	- Presently trying to lose weight.....	171
S05H12A	- Wgt loss plan: Dieting	171
S05H12B	- Wgt loss plan: Physical exercise.....	171
S05H12C	- Wgt loss plan: Eating meal replacements.....	172
S05H12D	- Wgt loss plan: Fasting for 24 hrs or longer	172
S05H12E	- Wgt loss plan: Joining weight loss program	172
S05H12F	- Wgt loss plan: Surgery e.g. gastric bypass	172
S05H12G	- Wgt loss plan: Dr prescribed medication	173
S05H12H	- Wgt loss plan: Dietary supplements.....	173
S05H12I	- Wgt loss plan: Liposuction	173
S05H12J	- Wgt loss plan: Other	173
S05H13	- Times per week eat restaurant prepared meals	174
S05H14	- Times per week eat fruit.....	174
S05H15	- Vegetables eaten per day	174
S05H16	- In last 30 days: #soft drinks drank.....	175
S05H17	- Number of times soft drinks were sugar-free.....	175
S05H18	- In last 30 days: #times drank milk	175
S05H19	- Type of milk used most often	176
S05O01	- Most important reason for not obtaining prenatal care.....	176
S05O02	- Reason prenatal care not obtained earlier	177
S05O03A	- Health care received in 1st trimester: Visited physician.....	177
S05O03B	- Health care received in 1st trimester: Visited physician assistant.....	177
S05O03C	- Health care received in 1st trimester: Visited corpsman or medic.....	178
S05O03D	- Health care received in 1st trimester: Visited nurse practitioner/midwife.....	178
S05O03E	- Health care received in 1st trimester: Visited nurse.....	178
S05O03F	- Health care received in 1st trimester: Visited alternative provider	178
S05O03G	- Health care received in 1st trimester: Visited health care provider with pregnant women group	179
S05O03H	- Did not receive care in first trimester.....	179
S05V01	- In last year: Amount of healthcare from TRICARE civilian network(TCN).....	179
S05V02	- In last year: Problem getting wanted healthcare from TCN	180
S05V05	- In last year: Learn physician whom you wanted to see left TCN.....	180
S05V06	- In last year: Problem finding convenient doctor from TCN	180
S05V07	- In last year: Problem finding specialist in Civilian network	181
S05V08	- In last year: Tried to make an appointment with Civilian Dr not in TCN.....	181
S05V09	- In last year: Wanted Dr not seeing old/new TRICARE patients	181
S05V10	- In last year: Problem finding Dr who will accept TRICARE	182
SURVEY FIELDING VARIABLES		
ONTIME	- Responded Within 8 weeks of Mail-Out.....	182
FLAG_FIN	- Final Disposition	182
DUPFLAG	- Multiple Response Indicator	182
FNSTATUS	- Final Status	182
KEYCOUNT	- Number of Key Questions Answered	183
WEB	- Web survey indicator.....	183
CODING SCHEME FLAGS AND COUNTS		
N1	- Coding Scheme Note 1	183
N2	- Coding Scheme Note 2	184
N3	- Coding Scheme Note 3	184
N4	- Coding Scheme Note 4	184
N5	- Coding Scheme Note 5	185
N6	- Coding Scheme Note 6	185
N7	- Coding Scheme Note 7	185
N8	- Coding Scheme Note 8	186
N9	- Coding Scheme Note 9	186
N10	- Coding Scheme Note 10	186

N11	- Coding Scheme Note 11	186
N12	- Coding Scheme Note 12	187
N13	- Coding Scheme Note 13	187
N14	- Coding Scheme Note 14	187
N15	- Coding Scheme Note 15	187
N16	- Coding Scheme Note 16	188
N17	- Coding Scheme Note 17	188
N18A	- Coding Scheme Note 18A.....	188
N18B	- Coding Scheme Note 18B.....	189
N19	- Coding Scheme Note 19	189
N20	- Coding Scheme Note 20	189
N21	- Coding Scheme Note 21	190
N22	- Coding Scheme Note 22	190
N23	- Coding Scheme Note 23	190
N24	- Coding Scheme Note 24	190
N25	- Coding Scheme Note 25	191
N26	- Coding Scheme Note 26	191
N27	- Coding Scheme Note 27	191
MISS_1	- Count of: Violates Skip Pattern	191
MISS_4	- Count of: Incomplete grid error	192
MISS_5	- Count of: Scalable response of Don't know	192
MISS_6	- Count of: Not applicable - valid skip	192
MISS_7	- Count of: Out-of-range error.....	193
MISS_8	- Count of: Multiple response error.....	193
MISS_9	- Count of: No response - invalid skip	194
MISS_TOT	- Total number of missing responses.....	195
CONSTRUCTED VARIABLES		
XENRLLMT	- Enrollment in TRICARE Prime	195
XENR_PCM	- Enrollment by PCM type.....	196
XINS_COV	- Insurance Coverage	196
XREGION	- Region	197
XTNEXREG	- TRICARE Next Generation of Contracts Region grouping	197
CONUS	- CONUS/OCONUS Indicator.....	197
OUTCATCH	- Out of Catchment Area Indicator.....	198
XSEXA	- Male or Female (Recode)	198
XBMI	- Body Mass Index.....	198
XBMICAT	- Body Mass Index Category	205
XBNFGRP	- Constructed Beneficiary Group	205
KMILOFFC	- Office wait of 15 min or more at Military facility.....	205
KCIVOFFC	- Office wait of 15 min or more at Civilian facility.....	205
KBGPRB1	- Big problem getting referrals to specialist	206
KBGPRB2	- Big problem getting necessary care	206
KMILOPQY	- Outpatient visits to Military facility.....	206
KCIVOPQY	- Outpatient visits to Civilian facility	206
KCIVINS	- Beneficiary covered by civilian insurance.....	207
KBRSTCR	- Women age 40 and over ever had mammogram and breast exam	207
HP_PRNTL	- Pregnant in last year received care in 1st trimester	207
HP_MAMOG	- Women age 40 and over mammography in past 2 years	207
HP_MAM50	- Women age 50 and over mammography in past 2 years	208
HP_PAP	- All women Pap smear in last 3 years	208
HP_BP	- Blood pressure check in last 2 years know results	208
HP_FLU	- Age 65 and older flu shot in last 12 months	208
HP_NORM	- Normal BMI	209
HP_SMOKE	- Advised to quit smoking in last 12 months	209
HP_SMOKH	- Smoker under HEDIS definition	209
HP_CESS	- Had smoking cessation counseling.....	209
ADJ_CELL	- Adjusted STRATUM cell	210

WEIGHTS		
WRWT1	- Replicated/JackKnife Weight 1	217
WRWT2	- Replicated/JackKnife Weight 2	217
WRWT3	- Replicated/JackKnife Weight 3	217
WRWT4	- Replicated/JackKnife Weight 4	218
WRWT5	- Replicated/JackKnife Weight 5	218
WRWT6	- Replicated/JackKnife Weight 6	218
WRWT7	- Replicated/JackKnife Weight 7	219
WRWT8	- Replicated/JackKnife Weight 8	219
WRWT9	- Replicated/JackKnife Weight 9	219

H05002G	- Health plan(s) covered: FEHBP	138
H05002H	- Health plan(s) covered: Medicaid.....	138
H05002I	- Health plan(s) covered: Civilian HMO	138
H05002J	- Health plan(s) covered: Other civilian	138
H05002K	- Health plan(s) covered: USFHP	139
H05002L	- Health plan(s) covered: Not sure	139
H05002M	- Health plan(s) covered: Veterans.....	139
H05002N	- Health plan(s) covered: TRICARE Plus	139
H05002O	- Health plan(s) covered: TRICARE For Life	139
H05003	- Currently Covered Medicare Part A	140
H05004	- Currently Covered Medicare Part B	140

H05005	- Currently Covered Medicare Supplemental	140
H05006	- Which health plan did you use most in the past 12 months?	141
H05007	- Years in a row with health plan	141
H05008	- Have one person you think of as personal doctor	141
H05009	- Rating of your personal doctor or nurse	142
H05010	- Had same personal Dr/nurse before joining health plan	142
H05011	- Health plan: problem to get a personal doctor or nurse you are happy with	142
H05012	- In last year: you or a doctor or nurse think you needed to see a specialist	143
H05013	- In last year: how much of a problem to see a specialist you needed to see	143
H05014	- In last year: did you see a specialist	143
H05015	- Rating of specialist seen most often in last year	144
H05016	- In last year: called a doctor's office or clinic during regular office hours to get help or advice for yourself	144
H05017	- In last year: when you called during regular office hours how often got help or advice you needed	144
H05018	- In last year: have illness/injury/condition that needed care right away	145
H05019	- In last year: when needed care right away for an illness or injury got care as soon as wanted	145
H05020	- In last year: wait between trying to get care and actually seeing a provider for an illness or injury	145
H05021	- In last year: made any appointment for regular or routine health care	146
H05022	- In last year: how often made appointments for regular or routine health care as soon as you wanted	146
H05023	- In last year: days between making an appointment for regular or routine care and actually seeing a provider	146
H05024	- In last year: times went to an emergency room for own care	147
H05025	- In last year: times went to a doctors office or clinic for yourself (not counting times went to an emergency room)	147
H05026	- In last year: did you/Dr believe you needed any care, tests, or treatment	147
H05027	- In last year: problem to get necessary care	148
H05028	- In last year: need approval from health plan for any care, tests, or treatment	148
H05029	- In last year: problem with delays in healthcare while waiting for approval from health plan	148
H05030	- In last year: how often taken to exam room within 15 minutes of appointment	149
H05031	- In last year: how often office staff at a doctor's office or clinic treat you with courtesy and respect	149
H05032	- In last year: how often office staff at a doctor's office or clinic as helpful as expected	149
H05033	- In last year: how often doctors or other health providers listen carefully to you	150
H05034	- In last year: how often doctors or other health providers explain things in way you could understand	150
H05035	- In last year: how often doctors or other health providers show respect for what you had to say	150
H05036	- In last year: how often doctors or other health providers spend enough time with you	151
H05037	- Rating of all healthcare in last year	151
H05038	- In last year: facility used most for health care	152
H05039	- In last year: sent in any claims to your health plan	152
H05040	- In last year: health plan handled claims in a reasonable time	152
H05041	- In last year: how often health plan handled claims correctly	153
H05042	- In last year: look for any information in written materials/internet on how health plan works	153
H05043	- In last year: problem to find or understand information in the written materials/internet	153
H05044	- In last year: called health plan's customer service to get information or help	154

H05045	- In last year: problem to get the help you needed when called health plan's customer service.....	154
H05046	- In last year: have to fill out paperwork for your health plan	154
H05047	- In last year: how much problem with paperwork for your health plan	154
H05048	- Rating of all experience with health plan	155
H05049	- Blood pressure: when last reading	155
H05050	- Blood pressure: know if blood pressure is too high or not	155
H05051	- When did you last have a flu shot	156
H05052	- Smoked at least 100 cigarettes in life	156
H05053	- Smoke everyday, some days, or not at all	156
H05054	- How long since you quit smoking	156
H05055	- Last year: number of visits advised to quit smoking.....	157
H05056	- Last year: number of visits medication was recommended or discussed to assist with quitting smoking	157
H05057	- Last year: number of visits recommended or discussed methods and strategies to assist quitting smoking	157
H05058	- Are you male or female	158
H05059	- Female: Last have a Pap smear test	158
H05060	- Female: Are you under age 40.....	158
H05061	- Female: Last time breasts checked mammography	159
H05063	- Female: Been pregnant in last year or pregnant now	159
H05064	- Female: In what trimester is your pregnancy	159
H05065	- Female: Trimester first received prenatal care	160
H05066	- In general how would you rate your overall health	160
H05067	- Limited in any way in any activities because of any impairment or health problem	160
H05068	- Are you Spanish/Hispanic/Latino	161
HP_BP	- Blood pressure check in last 2 years know results	208
HP_CESS	- Had smoking cessation counseling.....	209
HP_FLU	- Age 65 and older flu shot in last 12 months	208
HP_MAM50	- Women age 50 and over mammography in past 2 years	208
HP_MAMOG	- Women age 40 and over mammography in past 2 years	207
HP_NORM	- Normal BMI	209
HP_PAP	- All women Pap smear in last 3 years	208
HP_PRNTL	- Pregnant in last year received care in 1st trimester	207
HP_SMOKE	- Advised to quit smoking in last 12 months	209
HP_SMOKH	- Smoker under HEDIS definition	209
KBGPRB1	- Big problem getting referrals to specialist	206
KBGPRB2	- Big problem getting necessary care	206
KBRSTCR	- Women age 40 and over ever had mammogram and breast exam	207
KCIVINS	- Beneficiary covered by civilian insurance.....	207
KCIVOFFC	- Office wait of 15 min or more at Civilian facility.....	205
KCIVOPQY	- Outpatient visits to Civilian facility	206

Chapter

1

Introduction

This Codebook and Users' Guide provides a tool for programmers and analysts to assist them in creating cross-tabulations and basic statistical estimates from the 2005 Adult Health Care Survey of DoD Beneficiaries (HCSDB). It is intended to facilitate users in creating tables and generating analyses above and beyond those associated with this project.

This version of the Codebook and User's Guide describes the first quarter data set. It presents the frequency counts of all variables from the first quarter survey.

This chapter explains how to use this guide, reviews the survey, briefly describes the sample design, and concludes with a list of other documents on the HCSDB data that may be useful for policymakers, administrators, and other users.

How to Use This Guide

Chapter 2 describes the database conventions and types of variables in the database. Furthermore, it explains the relationship between the raw survey data and the cleaned and constructed variables preferred for data analyses.

Chapter 3 provides table-making instructions in both SAS and SPSS and clearly demonstrates the basic computer programming code necessary to tabulate the data in SAS and the interactive steps involved in generating tables in SPSS (either statistical package may be used). While we assume that most users have some knowledge of computer systems and statistical processing, examples of how to create tables and the resulting output are provided in order to simplify the process of data tabulation. Due to the complexity of the sample design, we suggest that users interested in measuring the precision of their results use a statistical package capable of calculating standard errors for survey estimates, such as SUDAAN™ or WesVar PC®. Sample programming code is included to estimate standard errors using appropriate methods to accommodate the complex sample design.

The codebook is presented in Chapter 4, where we describe each variable in the database, including a list of all possible values of the variable, weighted and unweighted frequency counts and percent occurrences for each value, and the values' interpretation or formatting. The codebook helps users assess the availability of certain measures, specify variables of interest, and identify all possible values of a variable. The variables are listed in the order of their position on the data file, and they are grouped by source as follows:

- Sampling variables used to place beneficiaries in the appropriate strata
- Information from the Defense Enrollment Eligibility Reporting System (DEERS) at the time of sampling
- Questionnaire responses: cleaned and recoded
- Variables created during the fielding of the survey
- Coding Scheme flags and missing value counts
- Constructed variables for analysis
- Weights

In addition, users may refer to the Table of Variables, which follows directly after the Table of Contents, for an alphabetical quick-reference list intended to assist users in locating each variable.

What is the HCSDB?

The HCSDB is a health care survey of active duty military personnel, retirees, and their adult family members. It is comprised of an adult and a child survey, both fielded to a representative sample of beneficiaries. The adult survey is fielded every quarter, whereas the child survey is fielded only in the third quarter of each year. Results from each quarter are presented as a web-based report. The survey is sponsored by the Assistant Secretary of Defense (Health Affairs) [OASD (HA)], under authority of the National Defense Authorization Act for Fiscal Year 1993 (P.L. 102-484). The surveys collect data on beneficiaries' satisfaction with, and access to, health care; knowledge of the TRICARE system; and use of preventive and other health care services.

Fielded annually from 1994 to 2000, the HCSDB now is fielded quarterly and consists of a fixed core questionnaire complemented by quarterly supplements intended to address topics of emerging interest. Users should note that, prior to 2000, the title of the HCSDB corresponded to the reference year that respondents were asked to think about when responding to questions. For example, although the 2000 HCSDB was fielded in 2001, beneficiaries responded to questions according to the reference period 12 months prior. Under the current naming convention the survey title refers to the year the questionnaires are fielded, so, for example, this year's survey is the 2005 HSCDB. Users should further note that, due to this change, there is no survey with the title "2001" survey, even though the questionnaire has been administered continuously throughout each quarter of 2001, 2002, 2003 and 2004. The annotated questionnaire appears in Appendix A. A crosswalk between the 2005 questions and the questions from the 1994-1995, 1996, 1997, 1998, 1999, 2000, 2002, 2003 and 2004 surveys appears as Appendix B.

The HCSDB fixed questionnaire covers the following topics:

- **Health Plan.** This section collects data on TRICARE Prime enrollment and the use of supplemental insurance and/or other private insurance.
- **Your Personal Doctor or Nurse.** In this section, respondents are asked about their relationship with their personal doctor or nurse. They are asked to rate their personal doctor or nurse on a scale from 0 to 10, where 0 is the lowest rating and 10 is the highest rating.
- **Getting Health Care from a Specialist.** This section collects information about respondents' need for and access to care from specialists. Respondents rate the specialist that they see most frequently on a scale from 0 to 10, where 0 is the lowest rating and 10 is the highest rating.
- **Calling Doctors' Offices.** Questions in this section ask beneficiaries whether they were able to access care and obtain information by telephone from their doctor's office or clinic.
- **Your Health Care in the Last 12 Months.** This section collects information on where DoD beneficiaries received the majority of their care in the past 12 months, that is, from a military or civilian facility. It also covers topics such as the availability of providers and their staff, convenience, and courtesy and respect shown by providers and their staff.
- **Your Health Plan.** This section is designed to measure beneficiaries' satisfaction with their primary health plan. Respondents are asked to rate their health plan on a scale of 0 to 10 where 0 is the lowest rating and 10 is the highest rating. Additionally, respondents are asked questions about any problems they may have encountered with claims processing, accessing and comprehending written materials, customer service, and processing paperwork.

- **Your Preventive Health Care.** This section collects information on the use of preventive health care services, including blood pressure readings, and flu shots. All women are asked about Pap smears; women that are or have been pregnant within the past 12 months are questioned about prenatal care. Women age 40 and over are asked about mammography. All respondents are asked whether they smoke. Smokers are asked whether, and how often, they have received smoking cessation counseling from a health care professional.
- **About You.** This section asks basic background and health status questions. Beneficiaries are asked how they view their general health. They are further asked to report their education level, race, and age.

CAHPS Questions

To make responses comparable to civilian surveys, the questions are similar in content and format to questions used in the Consumer Assessment of Health Plans Survey (CAHPS). CAHPS is a survey program sponsored by the Agency for Health Care Research and Quality, U.S. Department of Health and Human Service, and the Picker Institute, which is designed to monitor beneficiaries' satisfaction with their civilian health care plan and access to health care services.

Quarter I Supplements

- **TRICARE Civilian Network.** These supplemental questions provide information about respondents' experiences with the TRICARE civilian network. Questions concern the amount of care received, problems getting wanted care, convenience of care, and physician retention within the TRICARE civilian network.
- **Prenatal Care.** Questions in this supplement concern health care received during pregnancy. Respondents with a pregnancy in the last year, are asked what health care, if any, they received during their pregnancy. Those who were pregnant and had no prenatal care are asked for the reasons they did not receive prenatal care. Those who had no prenatal care in the first trimester are asked why they did not receive it earlier in their pregnancy.
- **Health-related behaviors.** Questions in this supplement concern overall health. Respondents are asked question on their height, weight. They are further asked questions about exercise, what food and beverages they consume, and what diet plans they may be pursuing.

Sample Design Overview

The sample of beneficiaries for the HCSDB was drawn from an extract file of the DEERS database of military health system (MHS) beneficiaries with a specific reference date. The DEERS extract file includes all eligible MHS beneficiaries as follows:

- Everyone in the Uniformed Services and on active duty (Army, Air Force, Navy, Marine Corps, Coast Guard, the Commissioned Corps of the Public Health Service, National Oceanic and Atmospheric Administration, Guard/Reserve personnel who are activated for a period in excess of 30 days, and other special categories of people who qualify for benefits)
- Those who retired from military careers
- Immediate family members of people in the previous two categories
- Surviving family members.

A stratified sample design was used to select DoD health care beneficiaries for the Quarter I 2005 Adult HCSDB. Strata were defined by a combination of enrollment status groups, beneficiary groups,

and geographic areas. Specific information on the sample design appears in "Health Care Survey of DoD Beneficiaries: 2005 Adult Sampling Report", Mathematica Policy Research, Washington, D.C.

From a sample of 50,000 beneficiaries, 14,825 adult MHS beneficiaries completed and returned a 2005 Adult HCSDb questionnaire for the first quarter during the period, yielding a response rate of 31 percent. Information on developing response rates can be found in the "2005 Health Care Survey of DoD Beneficiaries: Adult Technical Manual."

Other Documents on the 2005 HCSDb

This document is intended for programmers and analysts using the 2005 Adult HCSDb data. The following is a list of other documents that may be requested from the TRICARE Management Activity Office:

- Health Care Survey of DoD Beneficiaries: 2005 Adult Sampling Report
- The 2005 Health Care Survey of DoD Beneficiaries: Adult Technical Manual
- The 2005 Health Care Survey of DoD Beneficiaries: TRICARE Annual Report

Description of the Adult HCSDB Database

This chapter presents the procedures for developing the database, and presents the database file layout.

Variable Naming Conventions

The conventions used to name variables on the 2005 Adult HCSDB data file are listed below and summarized in Table 2.1. The naming conventions will remain constant across the four quarters of the 2005 HCSDB.

- **Survey Variables.** Core survey variable names consist of up to eight alphanumeric characters that start with an alpha character ("H" for Adult survey variables), followed by a year designation ("05") and ending with three numbers and, if necessary, one alpha character to identify the relevant survey question. Recoded variables have the same names as on the survey. The original variables are suffixed with "_O"; these will not be on the public release file.
- **Supplemental Question Variables.** Each quarter, the questionnaire includes a battery of questions on specific health care topics concerning services offered to MHS beneficiaries. The supplements in the first quarter for example contained questions relating to beneficiaries' prenatal care, overall health, and TRICARE's civilian network. Like the core questions, supplemental questions also include eight alphanumeric characters; each variable begins with an "S" to distinguish it as a supplemental question, followed by the year designation ("05"). The variable ends with an alpha character and the question number in the supplemental series.
- **Self-Reported Data.** Defense Manpower Data Center (DMDC) standard demographic self-reporting variables on the adult survey are prefixed with "SR." Survey variables with this naming convention include SRRACEA-SRRACEE (race/ethnicity) and SREDA (education).
- **Coding Scheme Flags and Counts.** Coding Scheme flags, variables N1-N27, reference the notes in the Coding Scheme for Adult Survey. See Appendix C for the Coding Scheme for Quarter I for more information. Coding Scheme counts are sums of missing value responses for each questionnaire; each of these variable names begins with the 4 characters "MISS".
- **Constructed Independent Variables.** Independent variables are prefixed with an "X." These include original survey variables modified as a result of data cleaning or recoding and newly constructed variables that did not previously exist on the survey file. For example, since the variable PNSEXCD was modified as a result of data cleaning and recoding, it was renamed XSEXA.
- **Constructed Dependent Variables.** Dependent variables are given different prefixes depending on function. Healthy People 2010 variables, for example, are prefixed with an "HP" and all other newly constructed dependent variables are prefixed with a "K."
- **Weighting Variables.** Quarterly weighting variables are prefixed with a "W."

TABLE 2.1

NAMING CONVENTIONS FOR 2005 HCSDB VARIABLES – QUARTER I

1 st Character: Survey Type	2 nd – 3 rd Character s: Survey Year	4 th – 6 th Characters: Question #	Additional Characters: Additional Information
H= Health Beneficiaries (18 and older, Adult Questionnaire)	05	001 to 068	A to O are used to label responses associated with a multiple response question _O denotes an original version of a recoded variable
----- S = Supplemental Question		----- Quarter I V01-V02, V05-V010 – Supplemental questions about TRICARE’s civilian network. O01-O03H – Supplemental questions about health care received during pregnancy. HO1F-H19 – Supplemental questions about patient safety at military facilities.	-----

1 st Characters: Variable Group	Additional Characters: Additional Information
SR=Self-reported demographic data	Descriptive text, e.g., SREDA
N=Coding scheme notes	Number referring to Note, e.g., N2
X=Constructed independent variable	Descriptive text, e.g., XTNEXREG
HP=Constructed <i>Healthy People</i> 2010 variable	Descriptive text, e.g., HP_BP (had blood pressure screening in past two years and know the results)
K=Constructed dependent variables	Descriptive text, e.g., KMILOPQY (total number of outpatient visits to military facility)

Cleaning and Editing Conventions

Data quality procedures are found in the Coding Scheme tables. The complete Coding Scheme appears in Appendix C. It contains detailed instructions for all editing procedures used to correct data inconsistencies and errors. Editing procedures check for appropriate response values and consistent responses throughout the questionnaire. The steps to insure data quality include the following:

- **Initial Cleaning.** Missing value flags were encoded when the data collection contractor created the SAS dataset:
 - Skipped items were encoded with SAS missing value code of ‘.’.
- **Data Cleaning and Recoding of Variables – Implementation of the Coding Scheme.** Skip patterns were checked for consistency, and questions that were skipped legitimately were recoded with the SAS missing value of “.N”; questions that were answered, but should have been skipped, were recoded with a SAS missing value of “.C”. When possible, variables were backward coded or forward coded to make all responses consistent within a sequence. Numeric values were checked, and values that were out of range were flagged with the SAS missing value of “.O”.
- **Frequency Checks.** Formatted and unformatted frequency tables for all variables in the 2005 Adult HCSDDB Quarter I data file appear in Chapter 4 of this document. These frequency tables and other relevant cross tabulations were used to examine the range of values recorded for each data item to determine the type and magnitude of missing values. All value labels have been checked for accuracy.

Record Selection Criteria

Blank returns, nonrespondents, and any respondents found to be ineligible for MHS benefits were removed from the database. In addition, among eligible respondents with a non-blank questionnaire, a questionnaire must be “complete” to be included in the database.

To determine if a questionnaire is “complete”, 27 key questions were chosen. These key questions were adapted from the complete questionnaire rule developed by AHRQ for CAHPS surveys. At least 50 percent of these key items (thirteen or more) must be answered for a questionnaire to be accepted as a complete questionnaire. The key survey variables are: H05006, H05008, H05009, H05010, H05011, H05012, H05014, H05015, H05016, H05017, H05018, H05019, H05021, H05024, H05025, H05027, H05030, H05037, H05038, H05042, H05044, H05046, H05048, H05066, SREDA, H05068, and the race indicator.

Weighting Procedures

The analysis of survey data from complex sample designs, such as the 2005 Adult HCSDDB, requires weights to do the following:

- Compensate for variable probabilities of selection
- Adjust for differential response rates

Sampling weights are equivalent to the reciprocal of the probability of each respondent’s selection into the sample. Sampling weights are further adjusted for nonresponse within classes defined by sampling strata: a cross-classification of enrollment status, geographic area, and beneficiary group. Chapter 4 contains the weighted and unweighted frequencies for each variable in Quarter I, 2005.

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

Programming Guide

This chapter is designed to help users create tables and variance estimates. Procedures for using SAS, SPSS, SUDAAN, and WesVarPC to create estimates are explained. Examples provided in the text are based on the 2005 HCSDB Quarter I data file.

How To Make a Table Using SAS

The 2005 Adult HCSDB dataset is provided in a Statistical Analysis System (SAS) 6.0 format. SAS is a computer software system used for data management, summarization, and analysis. Later versions of SAS can also read version 6 datasets. A format library for the adult database is included along with the dataset. SAS can be run interactively or non-interactively (in batch mode), and the sample programs presented here can be run using either method. Special instructions are given later in the chapter for working interactively with the SAS Display Manager System in a Windows environment. All SAS programs generate a LOG and a LST file. The LOG file shows how SAS interprets your program and flags SAS syntax errors. The LST file shows the requested output.

File References, Libraries, and Options

SAS recognizes two types of datasets -- permanent and temporary. Permanent datasets, such as the HCSDB, are located through a LIBNAME that references the directory where the data is stored. For example, if the adult dataset for Quarter I is located on a CD-ROM in the subdirectory HCSDB05\FORMA\Q1, your LIBNAME statement must look like this:

```
LIBNAME INFORMA 'F:\HCSDB05\FORMA\Q1';
```

The adult dataset can then be referred to as INFORMA.HCSDB05, where INFORMA is the location of the file HCSDB05.

A format library requires a LIBNAME LIBRARY statement that shows the location of the format library. For example, if the adult format library is stored on your hard drive in a FMTLIB subdirectory, the LIBNAME statement should look like this:

```
LIBNAME LIBRARY 'C:\HCSDB05\FORMA\Q1\FMTLIB';
```

The OPTIONS statement controls page format and line length. A table with a "portrait" orientation might have this statement:

```
OPTIONS PS=79 LS=132;
```

A table with a "landscape" orientation that is left justified would have this OPTIONS statement:

```
OPTIONS PS=50 LS=175 NOCENTER;
```

DATA Step

The DATA step is used to create permanent or temporary datasets. It is also used to create new variables, modify existing variables, and limit the number of variables or observations. In a DATA step, you can do any or all of the following activities:

- Construct new variables. For example, to construct a variable of active duty by sex:

```
/* Active duty males */  
IF XSEXA = 1 AND XBNFGRP = 1 THEN XSEX_AD = 1;  
* Active duty females;  
ELSE IF XSEXA = 2 and XBNFGRP = 1 THEN XSEX_AD = 2;  
ELSE XSEX_AD = .; /* missing value */
```

[Note: the two methods to insert comments: enclosed within `/* */` or beginning with `*` and ending with a semicolon]

- Modify existing variables. For example, if the respondent is in region 7, the respondent will be placed in the combined region 7/8:

```
IF XREGION = 7 THEN XREGION = 8
```

- Limit the number of variables. Use a KEEP statement:

```
KEEP XTNEXREG CACSMPL H05050 H05014;
```

- Limit the number of observations. Use a subsetting IF:

```
/* Keep only TNEX region 3 observations */  
IF XTNEXREG = 3;
```

- Create a new temporary dataset. For example, CAC_1 is a temporary file of observations for only those respondents in catchment area 1:

```
LIBNAME INFORMA 'F:\HCSDB05\FORMA';  
DATA CAC_1;  
/* Input file is HCSDB05 */  
SET INFORMA.HCSDB05;  
IF CACSMPL = 1;  
RUN;
```

- Create a new permanent dataset. For example, OUT.CAC_9901 is a permanent dataset only of Region 1 out-of-catchment north respondents:

```
LIBNAME INFORMA 'F:\HCSDB05\FORMA';  
LIBNAME OUT 'C:\HCSDB05\FORMA';  
DATA OUT.CAC_9901;  
SET INFORMA.HCSDB05;  
IF CACSMPL = 9901;  
RUN;
```

PROC TABULATE

PROC TABULATE produces summary statistics in a table layout. The table can have up to three dimensions: page, row, and column. Within any dimension, multiple variables can be reported one after another or hierarchically. Useful statistics that are available in PROC TABULATE include:

- N number of observations with nonmissing values
- NMISS number of observations with missing values
- MEAN the arithmetic mean
- SUM the sum
- PCTN percent that one frequency represents of another frequency
- PCTSUM percent that one sum represents of another sum

The essential elements to execute PROC TABULATE are outlined below (items within < > are not required):

```
PROC TABULATE DATA=your dataset <option list>;  
CLASS class variables;  
VAR analysis variables;  
TABLE << page expression, > row expression, > column expression </ table options >;  
WEIGHT WRWT;  
RUN;
```

If the input file is to be limited to a specific population, a separate DATA step can precede the TABULATE, or a WHERE statement can be used within the TABULATE procedure. For example, to create a table from only respondents in catchment area 1, you would use the following statement after the PROC TABULATE statement:

```
WHERE CACSMPL = 1;
```

CLASS variables are any variables that are used for grouping; variables such as XTNEXREG, XSEXA, and CACSMPL are good examples of class variables. Class variables can be either character or numeric and typically have a discrete number of values. Unless MISSING is specified in the options list in the PROC TABULATE state, any observations with a missing CLASS variable will be dropped from the table.

The VAR statement identifies all analysis variables for a table. Analysis variables must be numeric and can be either discrete or continuous. SAS excludes missing values when computing statistics such as means and percentages.

The WEIGHT statement identifies the numeric variable whose value is used for weighting each *analysis variable*. In the HCSDB for 2005, the weight variable is WRWT.

The TABLE statement defines the table features. Every variable listed in this statement **must** be classified as either a class variable or an analysis variable in the CLASS or VAR statements. A comma separates each table dimension (page, row, and column). If there are three dimensions, the first is the page, the second is the row, and the last is the column. If there are only two dimensions, the first is the row and the second is the column. Tables with only one dimension are in column form. Each dimension expression is composed of the same following elements:

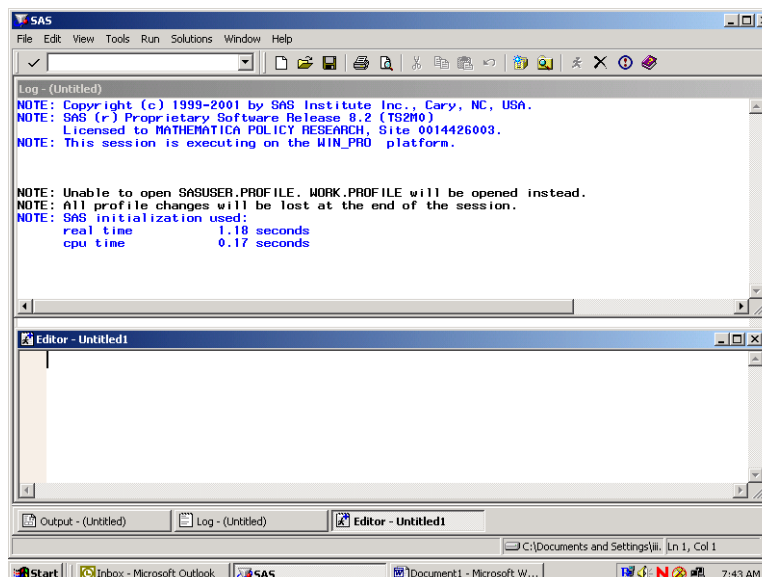

- Analysis variables

- Class variables
- The universal class variable ALL, which summarizes the class variables in the same group or dimension
- Keyword for the statistic to be performed, such as MEAN, SUM, or PCTSUM
- A format modifier, which defines how to format values in cells. For example, F=8.2 will present values with a maximum of 8 positions and 2 digits to the right of the decimal.
- Labels, which temporarily replace variable names and statistic keywords. These labels have the form =/label/; for example, XTNEXREG='Region' or MEAN=' ' (to eliminate the word MEAN from the headings).
- Crossing operator * (asterisk). The asterisk is used to cross elements within the same dimension. For example, you would use XENRLLMT*XSEXA to cross enrollment status by sex. The asterisk is also used to connect the statistic (e.g., MEAN, SUM) to the appropriate dimension; for example, to calculate the mean of respondents' satisfaction with all health care in the last 12 months, you would use H05037 *MEAN.
- Denominator definitions are enclosed by < > (brackets).
- Concatenation operator is a single space between elements in a dimension. For example, to concatenate satisfaction with all health care in the last 12 months with satisfaction with health plan, you would use H05037 H05048.
- Grouping is accomplished with parentheses. Below is an example of grouping, concatenation, and crossing within a single dimension:

(XBNFGRP ALL)*XSEXA

The SAS Display Manager System

The SAS Display Manager system provides an interactive tool for running SAS commands, like those given above, in the Windows environment. Double clicking the SAS icon on the desktop begins the SAS session. When you first enter SAS version 8, the following screen opens.

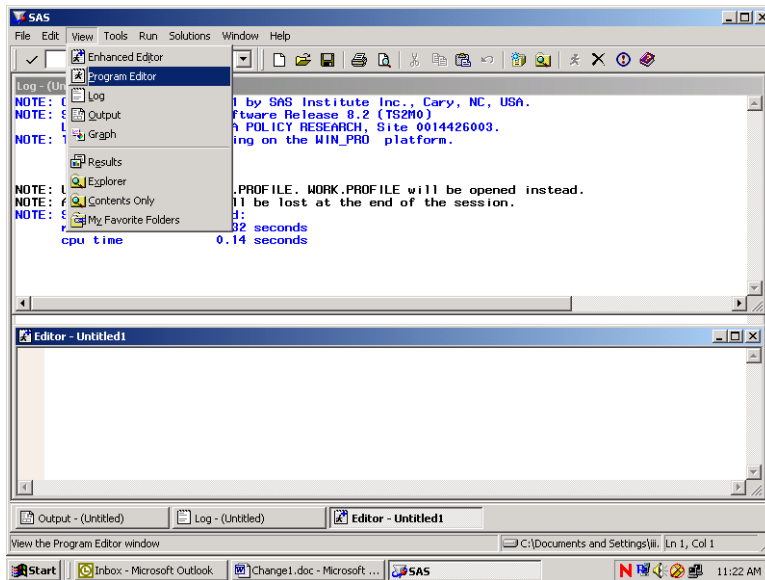

The screen is divided into two windows, a Log window above and an Editor window below.

The Window Bar at the bottom of the screen includes tabs for the Log and Editor windows with an additional tab for the Output Window. Clicking on the Output tab will open the Output window. The instructions in this document will outline options for setting up the Editor and for displaying the windows themselves.

The default editor for version 8 is the SAS Enhanced Editor which is color coded to check SAS syntax. Another editing option is to use the Program Editor which includes line editing options. We will describe procedures for setting up the Program Editor.

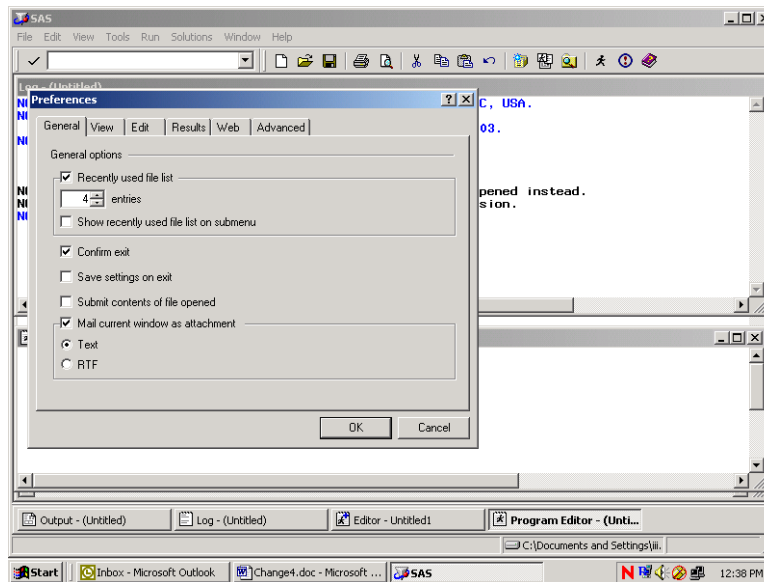

Click on View and select Program Editor as in the following:

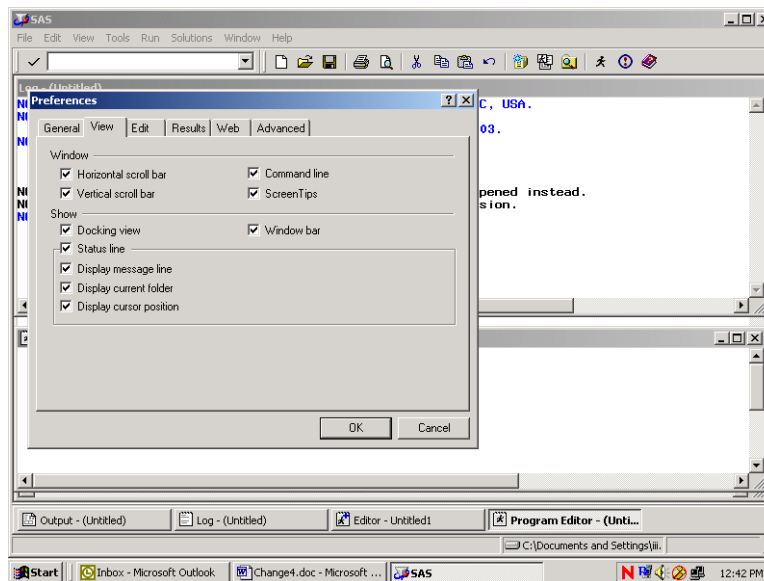

The lower Editor Window has now changed to Program Editor as in the following screen:

Open the Tools menu and choose Options and preferences.

Many of these settings are system default options. To add a command line to the three windows, do the following. Click on the View tab and click in the box opposite **Command Line** as follows:

Click on OK and a command line will be added as in the screen below.

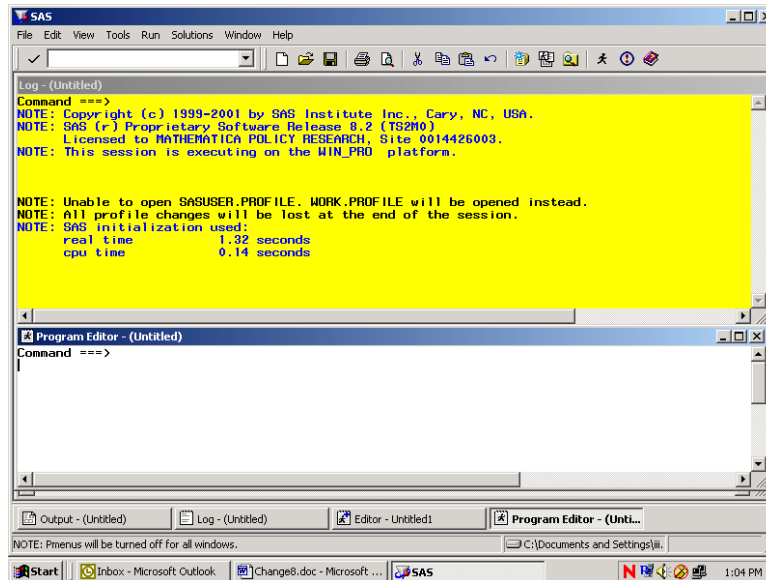

Each window shows the word **Command** followed by an arrow. Commands may be typed at this location. To arrive at the command line, depress the **Home** button on your keyboard. The cursor will appear opposite the arrow.

Toggling among the windows may be accomplished by typing the desired window name at the command line and pressing **Enter**. SAS recognizes **Pgm** as the abbreviated reference to the Program Editor and **Out** as a shortened name for the Output window. A few keystrokes allows you to navigate among the windows. For example, the command line lets you continue to customize our SAS session as follows.

In order to more easily distinguish between the SAS windows, it may be preferable to change the background color of selected windows. As an example, set the background color of the Log window to yellow and the Output window to gray. Press the **Home** key to arrive at the command line. Type **Log** opposite the arrow to toggle to the Log window. Type the command, **color back yellow** (or some other color) on the command line. Your screen will resemble the following.

Press **Enter** to process the commands and the window will shade to yellow. Toggle to the Output window by typing **Out** and keying **Enter**. Type **color back gray** and key **Enter**. Return to the Program Editor and the screen will look like the following.

All SAS statements for building and processing SAS datasets are typed into the Program editor. A SAS session may involve typing statements like the ones above for library reference, computing new variables, data steps, etc. Entering a long series of statements in such a small space may be awkward, so another arrangement for the windows may be preferable.

Cascading the windows is one option. To cascade the windows, open the **Window** menu, and choose **Cascade** as indicated in the following.

Clicking the option Cascade produces the following result.

Each window is partly superimposed on the other. The colors distinguish between windows at a glance. With the Program Editor in front, SAS statements may be typed there with relative ease. As a final option, you can enlarge the Program Editor to fill the entire screen. At the command line, type **zoom** as in the following:

The window changes to fill the screen.

One more option for customizing screens is explained below. This involves adding line numbers to the editing environment in the Program Window. After adding the line numbers, many useful line-editing commands become available (see the SAS Manual). At the **Command** line type "numbers on" as in the following screen.

The line numbers appear at the left of the full screen Program Editor as in the screen below, and the SAS statements can be typed into the screen and edited.

Below is an example of a PROC TABULATE to construct a table of health care variables by beneficiary group by gender for respondents in TNEX region 3. Beneficiary group (XBNFGRP) and sex (XSEXA) are both class variables with a discrete number of values. The columns of the table are beneficiary group broken out by sex, a total for each beneficiary group, and a region total. The health care variables (H05048 and H05066) are the analysis variables appearing as the rows of the table. The statistic that we want to see is the weighted mean of these variables for each group in the table and for the entire region as a whole.

Enter the following SAS statements into the **Program Editor**.

```

OPTIONS PS=79 LS=95;
LIBNAME IN 'C:\FILES\DoD\ADULT 2005';
LIBNAME LIBRARY 'C:\FILES\DoD\ADULT 2005\FMTLIB';
PROC TABULATE DATA=IN.HCS051_1;
WHERE XTNEXREG = 3; /* limit to TNEX region 3 */
CLASS XBNFGRP XSEXA;
VAR H05048 H05066;
WEIGHT CRWT;
TABLE (H05048 H05066)*MEAN, /* Row Dimension */
      XBNFGRP*(XSEXA ALL) ALL; /* Column Dimension */
TITLE "Table 3.1";
TITLE2' Constructed Beneficiary Group by Gender for TNEX region 3';
RUN;

```

Key **Home** and type the command **SUBMIT** on the Command Line. **Submit** instructs the SAS system to process the commands written in the Program Editor. Your screen should resemble the following.

```

SAS - [Program Editor - TABLEIII.1.sas]
File Edit View Tools Run Solutions Window Help
Command ==> SUBMIT
00001 OPTIONS PS=79 LS=95;
00002 LIBNAME IN 'C:\FILES\DOD\ADULT 2005';
00003 LIBNAME LIBRARY 'C:\FILES\DOD\ADULT 2005\FMTLIB';
00004 PROC TABULATE DATA=IN.HCS051_1;
00005 WHERE XTNEXREG = 3; /* LIMIT TO REGION 3 */
00006 CLASS XBNFGRP XSEXA;
00007 VAR H05048 H05066;
00008 WEIGHT CRWT;
00009 TABLE ( H05048 H05066)*MEAN, /* ROW DIMENSION */
00010 XBNFGRP*(XSEXA ALL) ALL; /* COLUMN DIMENSION */
00011 TITLE 'TABLE 3.1';
00012 TITLE2 'Constructed Beneficiary Group by Gender for TNEX Region 3';
00013 RUN;
00014
00015
00016
00017
00018
00019
00020
00021
00022
00023
00024
00025
00026
00027
00028
00029
00030
00031
00032
    
```

Enter the Submit command, and the SAS statements disappear from the Program Editor. If a table is successfully produced, the Output window will open and the table will be displayed. If no output is produced, then SAS has encountered an error. SAS statements about the error can be seen and evaluated in the Log window. In all cases, the Log window should be carefully examined after SAS statements are processed. SAS may produce a table even if there are errors in the program, so the table may not be correct.

No table was produced for this run. The error is indicated in the Log Window as shown below.

```

SAS - [Log - (Untitled)]
File Edit View Tools Solutions Window Help
Command ==>
40 OPTIONS PS=79 LS=95;
41 LIBNAME IN 'C:\FILES\DOD\ADULT 2005';
NOTE: Libref IN was successfully assigned as follows:

51 TITLE2 'Constructed Beneficiary Group by Gender for TNEX Region 3';
52 RUN;

NOTE: The SAS System stopped processing this step because of errors.
NOTE: PROCEDURE TABULATE used:
      real time    0.01 seconds
      cpu time     0.00 seconds
    
```

The variable CRWT was not found in the dataset. Type **Pgm** on the Command line to return to the Program Editor. Type **Recall** on the Command line and the program statements will reappear in the window.

You can correct the error by entering WRWT, the correct variable name, in the weight statement. Then rerun the procedure.

The corrected program produces the following output.

TABLE 3.1
Constructed Beneficiary Group by Gender for TNEX Region 3

		Constructed Beneficiary Group				
		Active Duty <65			Family of Active <65

Using Formats

The format library is the key to interpreting values of discrete variables. For example, in the program above, the format library found at C:\FILES\DoD\ADULT 2005\FMTLIB indicates that a Value of 1 for XSEXA means male, and a value of 2 for XSEXA means female. Similarly, if XBNFGRP equals 1, the

respondent is active duty; if XBNFGRP equals 2, the respondent is a family member of active duty personnel; if XBNFGRP equals 3, the respondent is an under-65 retiree or a survivor or one of their family members; if XBNFGRP equals 4, the respondent is a 65-or-over retiree, survivor, or one of their family members.

Since formats are associated with the variables in the HCSDB, formatting is automatic as long as SAS can locate the format library. Error messages will result if the LIBNAME LIBRARY statement is not present. If the format library is not available for some reason, use the statement

FORMAT _ALL_;

within the PROC TABULATE to prevent SAS from searching for the missing format library. The default formats in the format library were used to produce the table described in the previous section.

Table Appearance

Format modifiers and temporary labels improve the appearance of a table. In Table 3.1, the values of the statistics are of the form x.xx. If each cell is defined to be six positions wide with two positions to the right of the decimal, there is adequate space plus some extra room to keep the table from looking crowded. This is done by crossing the statistic with the format modifier:

MEAN*F=6.2

Labels are attached to all variables in the HCSDB. You can use temporary labels to override the label within the SAS dataset. It is not always necessary to use both the variable label and the formatted values for each value of a class variable. In the previous example, the formatted values of XBNFGRP are active duty, family members of active duty, etc. which we know to be beneficiary groups; the title also tells you that these are beneficiary groups. The table can be made attractive by deleting the heading for XBNFGRP by including a blank for the temporary label:

XBNFGRP= ‘

Similarly, because the statistic being reported here is a mean, you do not need MEAN on each row. You can add or eliminate a label and include a format modifier to the same variable:

MEAN= ‘*F=6.2

The headings for XSEXA and ALL can be improved:

XSEXA= ‘Gender’

ALL= ‘Group Total’ for the ALL that is crossed with XBNFGRP

ALL= ‘Total’ for the TNEX region 3 total

The new program looks like this:

```
OPTIONS PS=79 LS=95;
LIBNAME IN 'C:\FILES\DoD\ADULT 2005';
LIBNAME LIBRARY 'C:\FILES\DoD\ADULT 2005\FMTLIB';
PROC TABULATE DATA=IN.HCS051_1;
WHERE XTNEXREG = 3; /* limit to TNEX region 3 */
CLASS XBNFGRP XSEXA;
VAR H05048 H05066;
WEIGHT WRWT;
TABLE (H05048 H05066)*MEAN=*F=6.2, /* Row Dimension */
      /* Column Dimension */
      XBNFGRP=* (XSEXA='Gender' ALL='Group Total')
```

ALL='Total';

TITLE "Table 3.2";

TITLE2 'Constructed Beneficiary Group by Gender for TNEX region 3';

RUN;

Typing these statements into the Program Window produces the following screen.

```

SAS - [Program Editor - TABLE3.2.sas]

In gnrl, how would you rate overall hlth	3.16	3.14	3.15	3.48

Although the label for MEAN is deleted, there is still a space in the table for this label. You can eliminate this blank space by using the TABLE option of ROW=FLOAT. SAS row headings are automatically allocated; you can override this by using the TABLE option of RTS=n where n is an integer value specifying the number of print positions to be used for row headings. If you decide that we don't need the label 'Gender' for XSEXA because 'male' and 'female' are self-explanatory, the revised program is as follows:

```

OPTIONS PS=79 LS=95;
LIBNAME IN 'C:\FILES\DoD\ADULT 2005';
LIBNAME LIBRARY 'C:\FILES\DoD\ADULT 2005\FMTLIB';
PROC TABULATE DATA=IN.HCS051_1;
WHERE XTNEXREG = 3; /* limit to TNEX region 3 */

```

```

CLASS XBNFGRP XSEXa;
VAR H05048 H05066;
WEIGHT WRWT;
TABLE (H05048 H05066)*MEAN=' *F=6.2, /* Row Dimension */
/* Column Dimension */
XBNFGRP=' *(XSEXa=' , ALL='Group Total')
ALL='Total' / ROW=FLOAT RTS=32;
TITLE "Table 3.3";
TITLE2' Constructed Beneficiary Group by Gender for TNEX region 3';
RUN;

```

Typed into the Program Window, the revised program appears as follows.

```

```

The output table is displayed in the Output Window as follows.

Calculating Percents

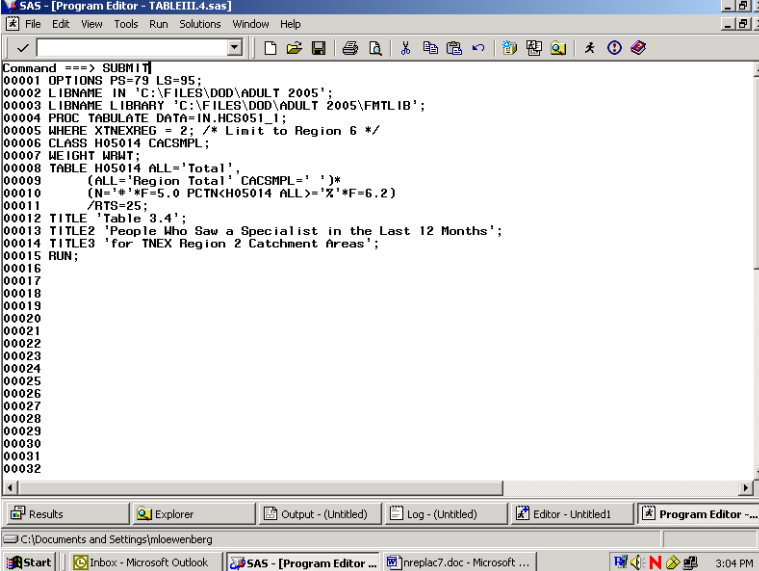

When calculating percentages, it is necessary to appropriately define the denominator. To calculate a column percentage, the denominator definition must include all *class* variables that define the *row*. For example, if you want to look at the percentage of people in your region and each of the catchment areas who answered yes (or no) to question 14, 'In the last 12 months, did you see a specialist?', your TABLE statement in the TABULATE procedure would look like this:

WHERE XTNEXREG = 2;

TABLE H05014 ALL='Total',

(All='Region Total' CACSMPL)*PCTN<H05014 ALL>='Percent';

Table 3.4 includes a program and its output for calculating column percentages. The program statements in the Program Editor appear as follows.

```

No	65	58.04	222	34.53
Total	112	100.00	643	100.00

The statistic N is included with PCTN to make it easier to verify that the denominator definitions have been set up properly. After you check to see that the percentages are accurate, the N statistic can be removed. Note that the output for Table 3.4 is unweighted. The N statistic (and PCTN statistic) is always unweighted even if a WEIGHT statement is included.

Similarly, if you want to look at the percentage of TRICARE enrollees (and non-enrollees) by gender who report seeing a specialist in the past 12 months, this would be a row percentage. To calculate a row percentage, the denominator definition must include all *class* variables that define the *column*. Your TABLE statement would look like this:

```
TABLE H05014 ALL='Total',
XENRLLMT *(XSEXA=' ' All='Group Total')*
PCTN<XENRLLMT*XSEXA XENRLLMT*ALL>='Percent';
```

Notice that there are no parentheses used in the denominator definition. Because parenthetical groupings are not allowed in the denominator definition, all crossings and concatenations must be included. As noted above, the N and PCTN statistic are unweighted counts of CLASS variables. If you want to produce a weighted count and percentage for this table, you would include WRWT (the 2005 weight variable) as an analysis variable in the VAR statement and in the column crossing of the TABLE statement; the statistics to be generated should be specified as SUM and PCTSUM. A program and output to demonstrate weighted row percentages appears in Table 3.5.

The following screen shows the new program typed into the Program Editor.

```

How to Make a Table Using SPSS

The 2005 Adult HCSDB dataset is in an SPSS format. SPSS is a computer software system used for data management, summarization, and analysis. SPSS can be run interactively, using menus, or in batch mode, using syntax commands. This guide instructs users on how to use SPSS dialog boxes to:

- Construct new variables
- Recode existing variables
- Select cases for analysis
- Weight cases for analysis
- Create customized tables

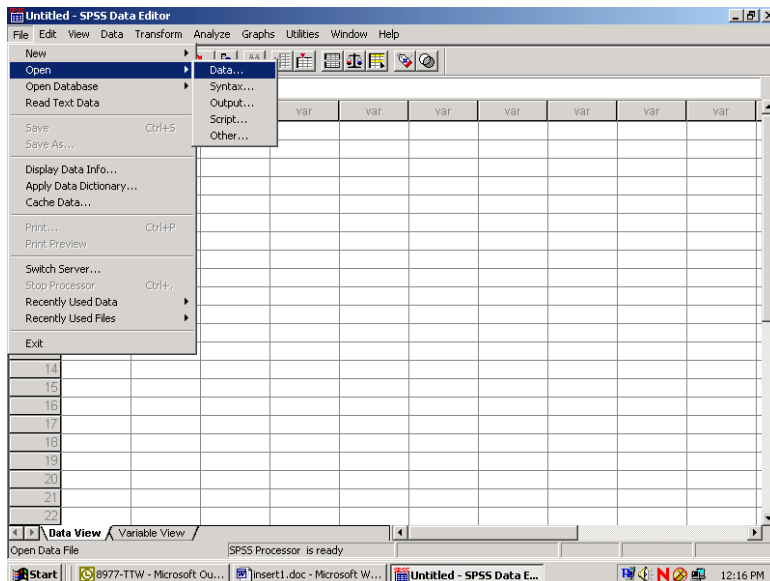

As you use the dialog boxes, you generate syntax automatically. This syntax may be pasted into a syntax file for future use or for modification.

Locating and opening the data file

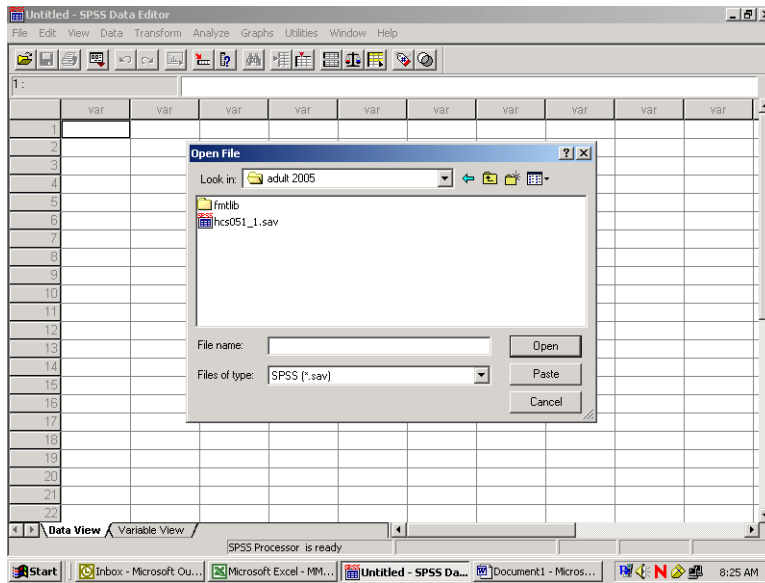

To begin an SPSS session, double click on the SPSS icon on your desktop. The Data Editor window will open and present a blank spreadsheet like the following screen:

Click on File in the upper left corner to open the following menu:

Select the **Open** option or choose a file from the list displayed. **Open** produces the following screen:

If the file is not in this directory, navigate through your folders until you locate it. Mark the file and click **Open**. You will be returned to the spreadsheet Data Editor with the file on view. The 2005 Adult HCSDDB dataset has been opened and is displayed below.

Constructing new variables

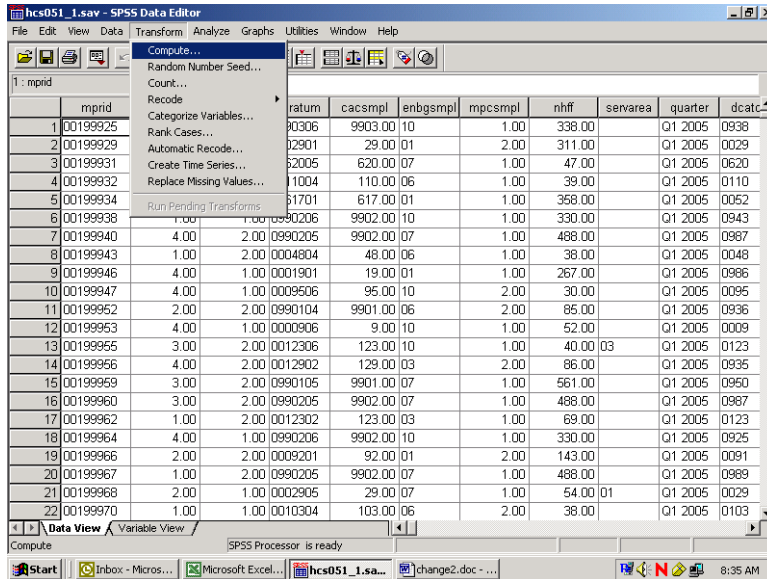

Data can be evaluated from many different aspects. It is sometimes useful to build new variables from combinations of the existing ones and to examine their distributions.

For example, the variable in the file for beneficiary group at the time of sampling is called *xbnfgrp*, and the variable for sex is *xsexa*. The value 1 for *xbnfgrp* indicates that the individual is on active duty. The relationships for constructing a new variable of active duty by sex are:

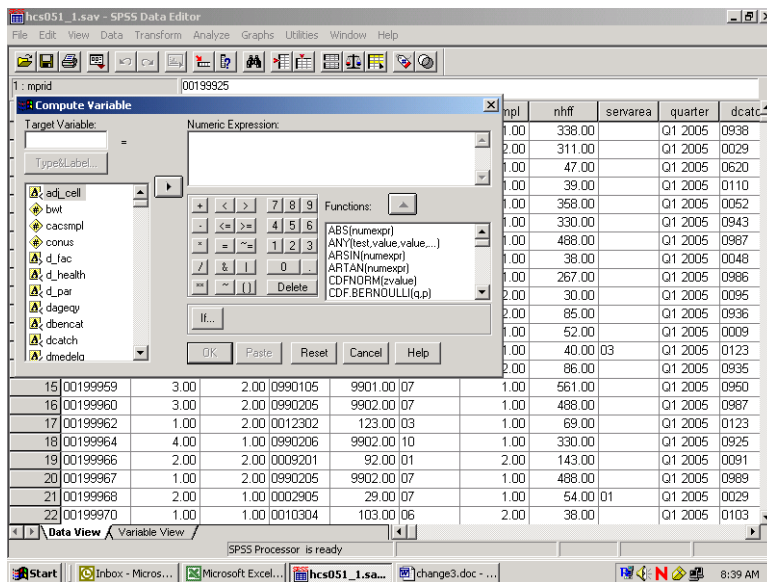

Active-duty-males: **xsexa=1 and XBNFGRP=1**

Active-duty-females: **xsexa=2 and XBNFGRP=1**

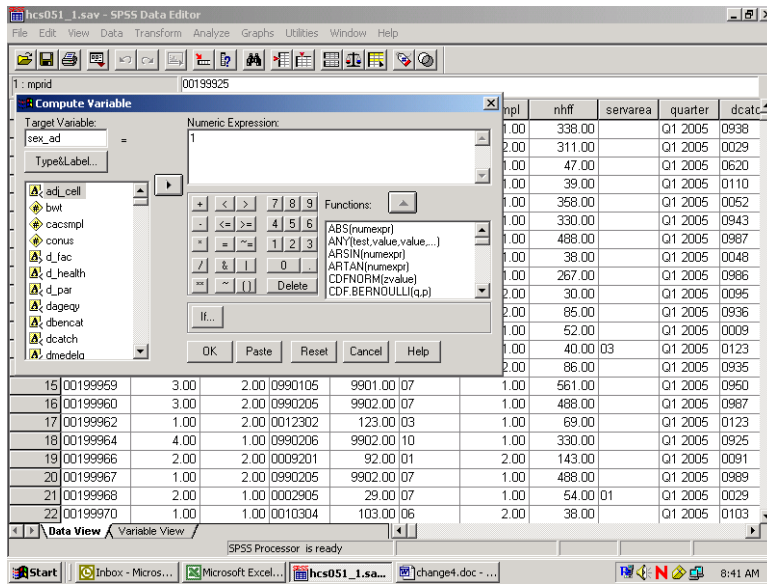

Open the Transform menu and select Compute as in the following:

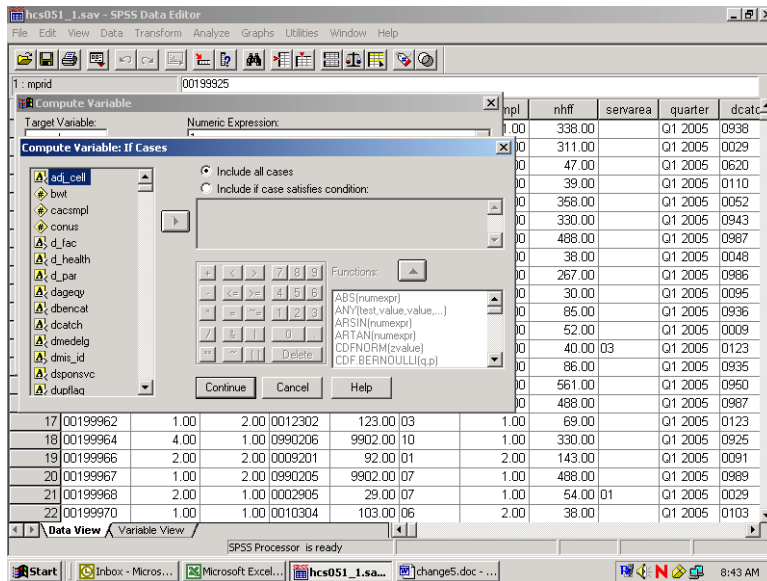

The following dialog box will open:

You can build the new variable in two steps to express the two conditions. The first task is to give the new variable a name and its first value. Enter the Target Variable slot and name the new variable **sex_ad**. Next, assign the value 1 to **sex_ad** by entering it into the slot for Numeric Expression. Your screen should look like the following:

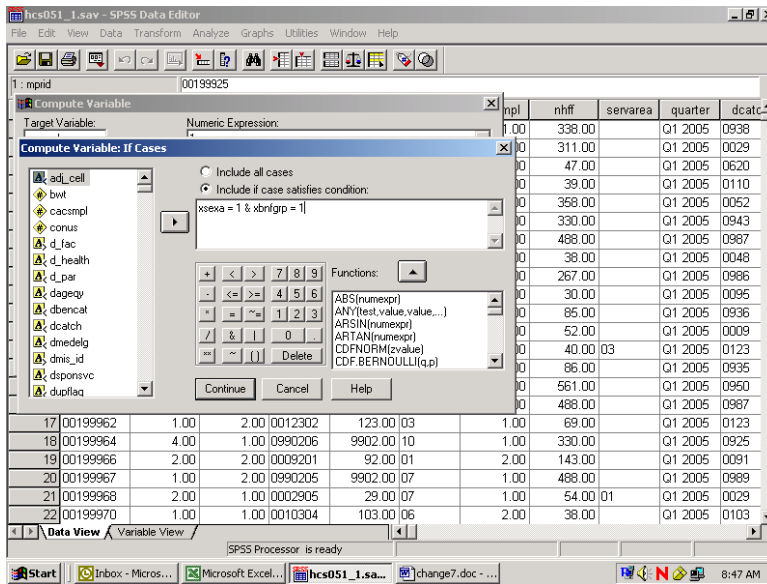

Once you we have assigned the value 1 to sex_ad, you can build the condition that qualifies the assignment. Click on If..and open the following dialog box:

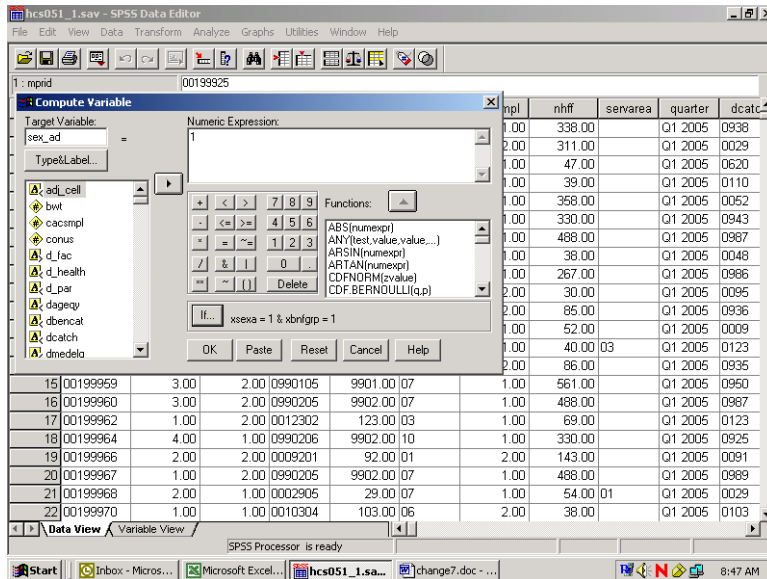

Click on the circle indicating Include if case satisfies condition, and the black dot will move to that circle. The slot underneath will open, ready for your input. Build the "if" condition. Write it directly into the slot or move the elements into the slot from the given options. Add the elements xsexa = 1 & xbnfgrp = 1.

The screen should resemble the following:

Click on Continue and return to the previous screen, which will now look like this:

Your condition will be written next to the If button. Click on OK to exit the dialog box, and the variable sex_ad will be created with its value set to 1.

The next step is to build the second condition for the new variable, which will set it to the value 2. Reopen the Compute dialog box. The commands you just gave still appear in the dialog box. Simply assign the value 2 to sex_ad, press If, and enter the new condition to identify active duty females. Click Continue, and finish with OK. The condition, if xsexa = 2 and xbrnfrp = 1, will be added to the new variable sex_ad.

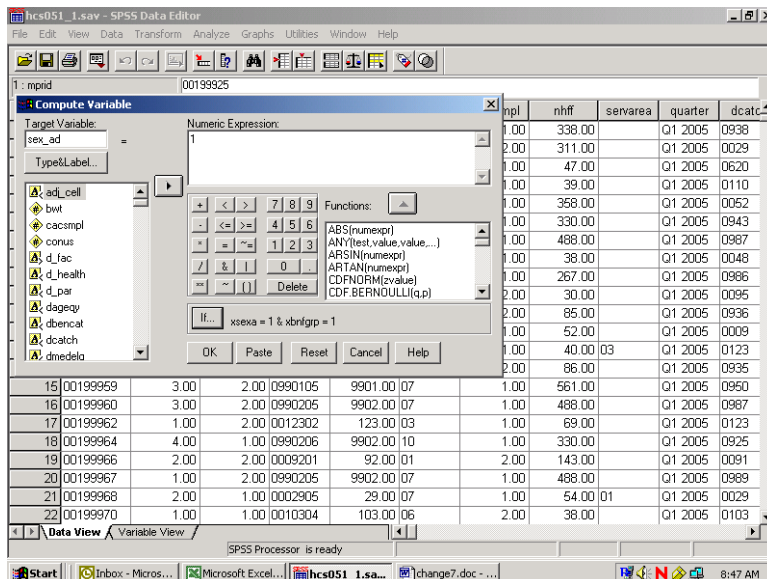

Once you have created a new variable, you may want to add it permanently to the dataset. The new variable is computed for each case in the file and added to the view in the Data Window after the last variable in the dataset. The variable name is the column heading.

Since the HCSDB data set carries Read-Only status to protect it from corruption, changes to it cannot be saved. At the end of the day, when the work session ends and you exit SPSS, the file will revert to its former status and the new variables will be lost. The solution is to save the dataset under a new name when you exit. Choose the Save As option on the File menu, and you will be prompted to name the file and to save it in a folder of your choosing. Give the file a new name and save it. Open the new expanded file anytime for processing.

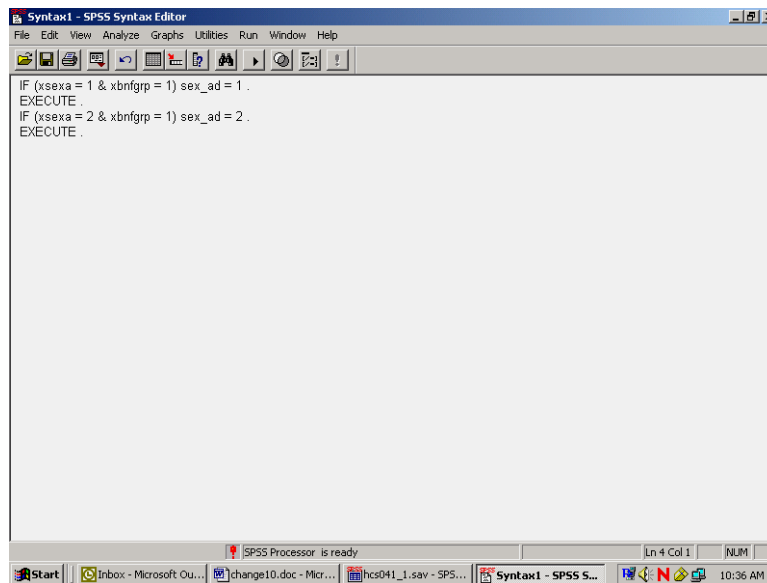

Suppose you do not want to use up your disk space for expanded copies of the dataset. Another option is to save the syntax you have generated in a file that can be run as it is needed. Syntax is a written instruction generated by the commands you give in a dialog box. These “sentences” can be saved in a file and executed when needed. This is the batch mode of processing syntax commands. Syntax files take up very little space.

Experienced SPSS programmers, who have mastered SPSS syntax, often prefer to work only in batch mode. This option is available to users who have not mastered the syntax language. You can paste the commands, generated interactively in the dialog box, onto a syntax file.

Recall the compute example for the new variable sex_ad. The screen below is the result of assigning 1 to sex_ad according to an If condition. You clicked on OK to set the value. Returning to the screen and clicking on Paste writes the command to a syntax file.

Click on the Paste button, and the syntax window below will open with the syntax written in it.

The results appear in the screen above. SPSS gives default names to syntax files, such as Syntax1, Syntax2, etc., as they are created. It is a good idea to save the syntax, re-naming the file using the **Save As** option on the **File** menu. Use a name that has some meaning to you, e.g., **New_computes**. The file will automatically receive the suffix **.sps**.

Another option for adding new variables to the dataset is to **Recode** existing variables **into** new variables. A common example involves **grouping** an age variable into age categories as shown below, using the variable **DAGEQY**, which exists on our dataset. **DAGEQY** is coded in years from 18 to 95, which can be grouped into four age categories:

18 to 34 = 1 - label: "young adult"

35 to 49 = 2 - label: "mature adult"

50 to 65 = 3 – label: "middle-age"

66 to 95 = 4 – label: "senior citizen"

The new variable is called **age_grp**.

DAGEQY is a string variable. In order for it to be recoded using grouping criteria, it must be converted to a numeric variable. In the data window go to the column for the variable **DAGEQY** and click in the gray area at the top of the column causing the variable to be selected as the following screen indicates.

2005 HEALTH CARE SURVEY OF DOD BENEFICIARIES – QUARTER I

In the Type column click on the gray square and the following Menu will open.

2005 HEALTH CARE SURVEY OF DOD BENEFICIARIES – QUARTER I

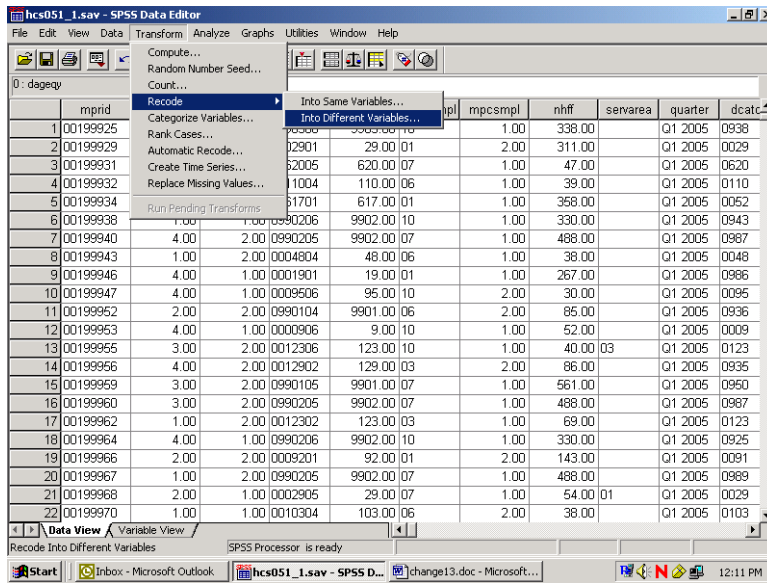

Transfer the black dot from String to Numeric as follows:

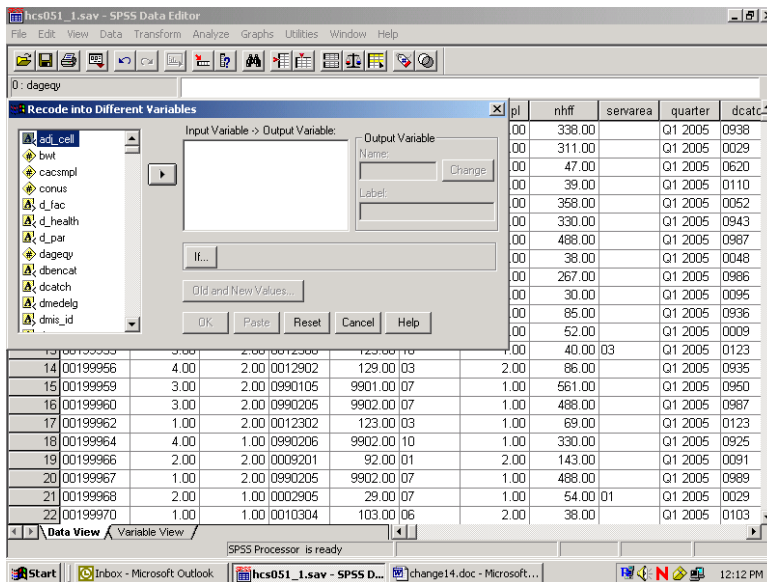

Click on OK to set the changes. Click on the Data View tab to return to the Data Editor window.

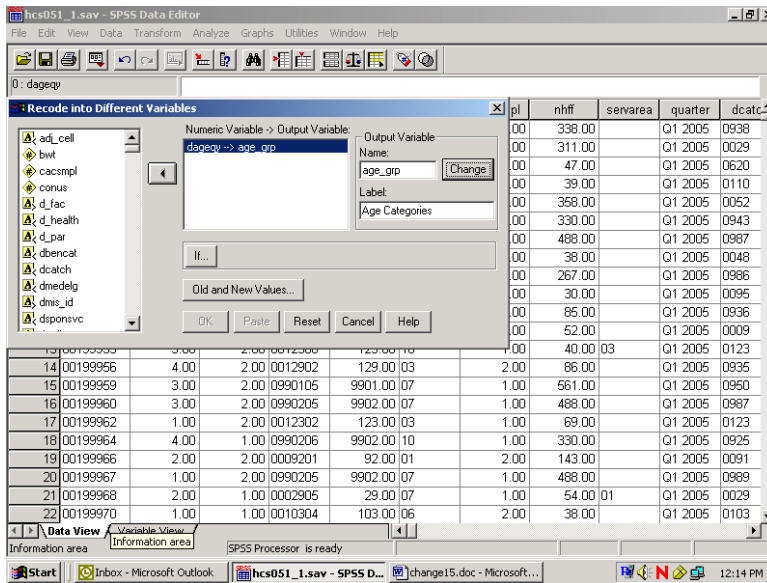

Now from the **Transform** menu, choose **Recode and Into Different Variables** as pictured below:

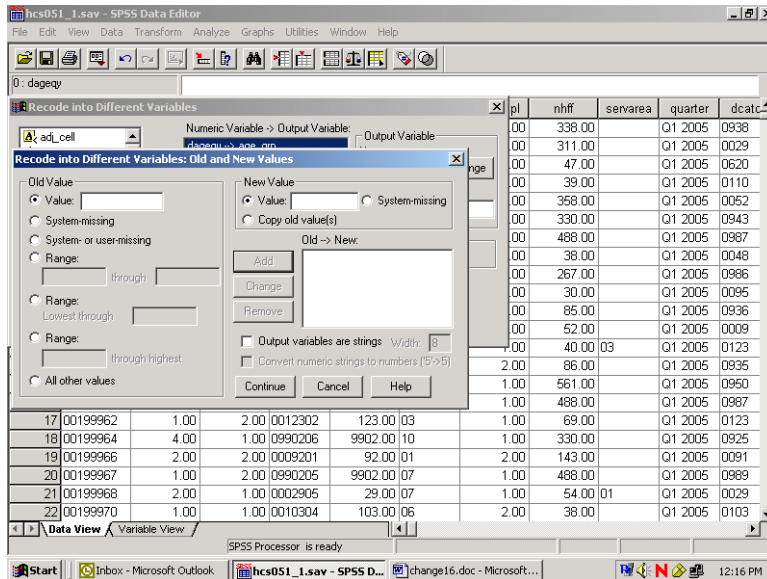

The following dialog box will open:

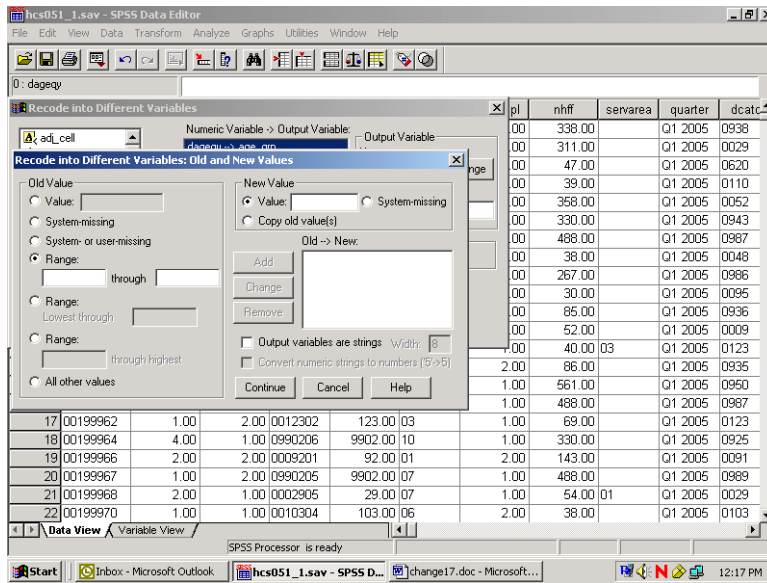

Move **DAGEQY** from the variable list on the left to the box labeled **Input Variable -> Output Variable**. In the **Name** slot, enter the new variable name **age_grp**. Enter **Age Categories**, the variable label, in the **Label** slot. Click on **Change**. The dialog box should look like the one below.

Click on Old and New Values, and the following dialog box will open:

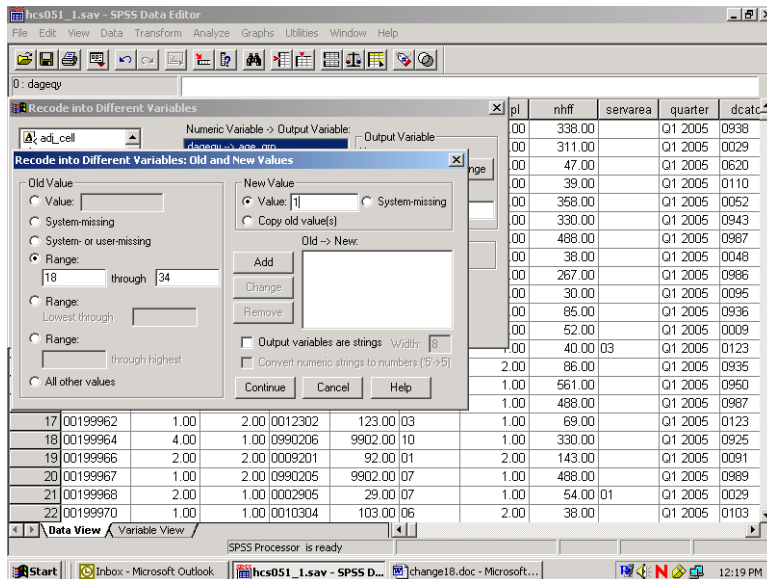

The next step in grouping the age variable is to specify the existing values of **Age** to be recoded. To do this, click on the **Range** circle under **Old Value**.

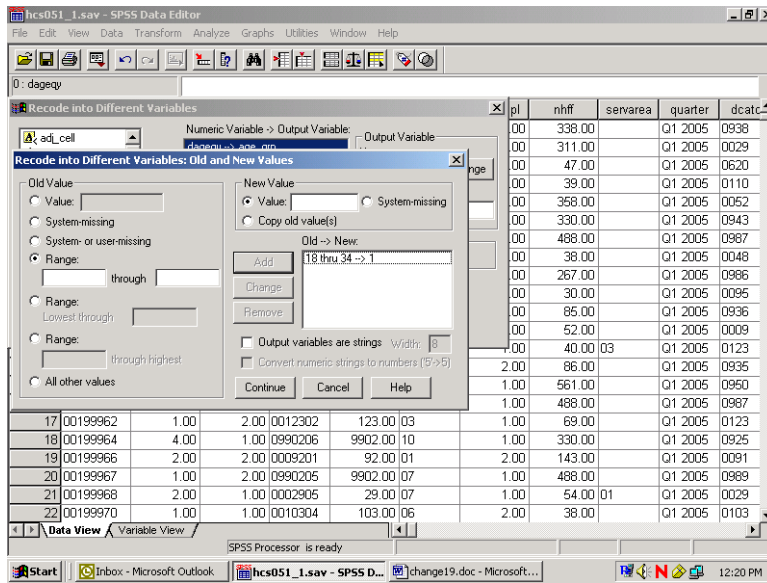

Once the appropriate slots are open, you have four ranges to enter.

First, enter **18 through 34** in the slots provided under **Range**. Next, enter the value **1** in the **Value** slot under **New Value**. **Add** is now illuminated.

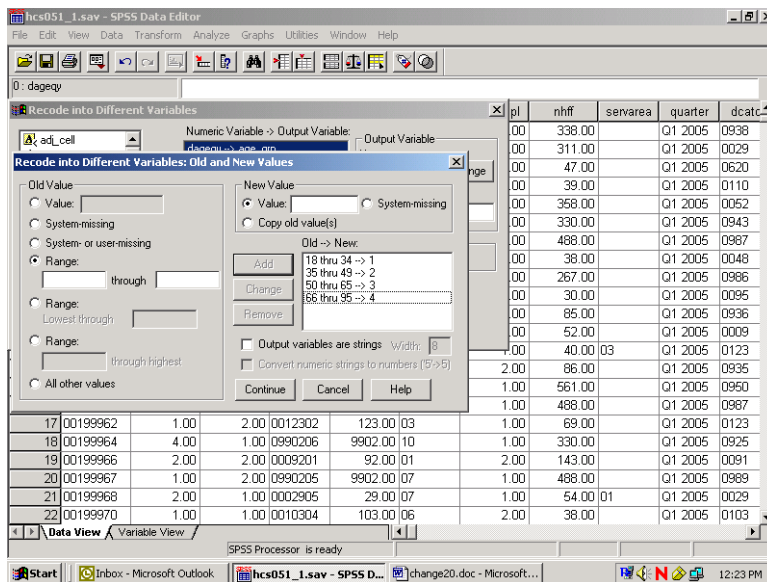

Clicking on Add produces the following result:

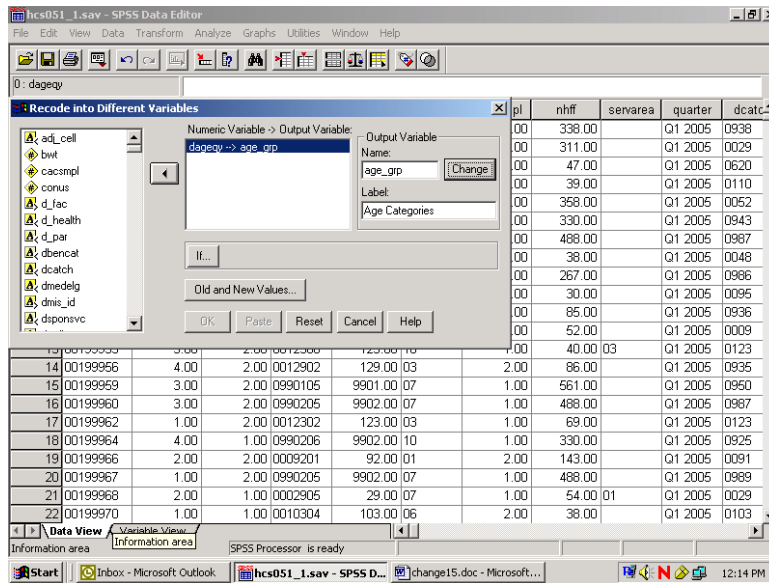

The specified range appears in the box labeled **Old -> New**, and the **Range** and **Value** slots have been cleared to permit additional entries.

The three remaining ranges are built in the same manner, adding each specification, until the dialog box looks like the one below.

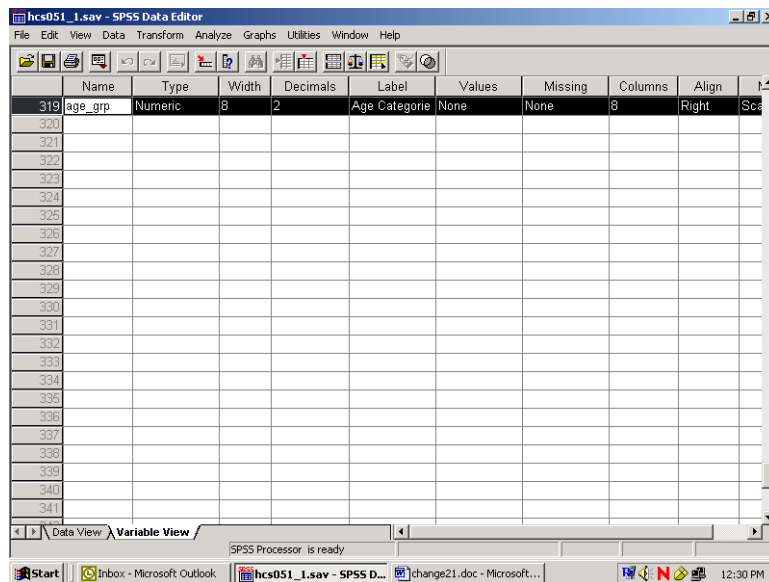

Click on Continue and return to the previous screen.

Click on **OK** to exit the screen. The new variable **age_grp** has been created. The **Recode** syntax can be pasted to a syntax file.

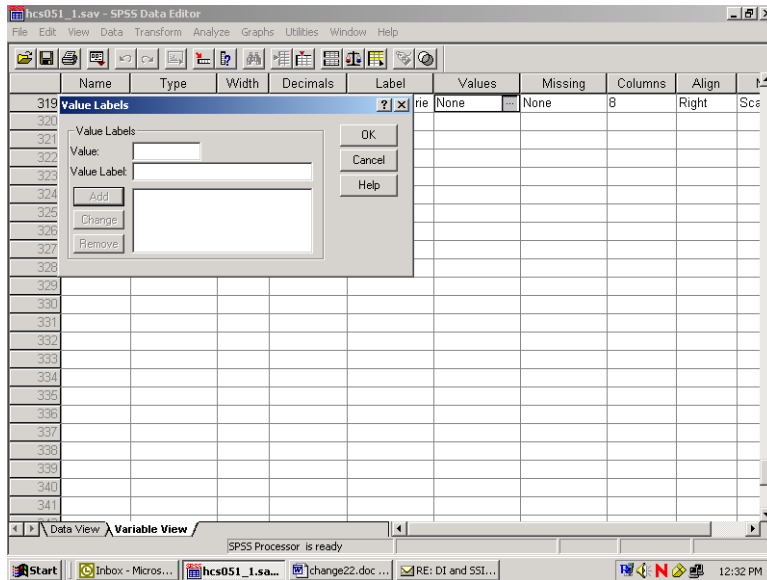

The final task is to create the value labels for the new variable **age_grp**. Labeling variables makes output from statistical reporting procedures much clearer and more elegant.

In the **Data Window**, go to the column for the new variable **age_grp** and double click in the gray area containing the variable name. The screen will change to variable view:

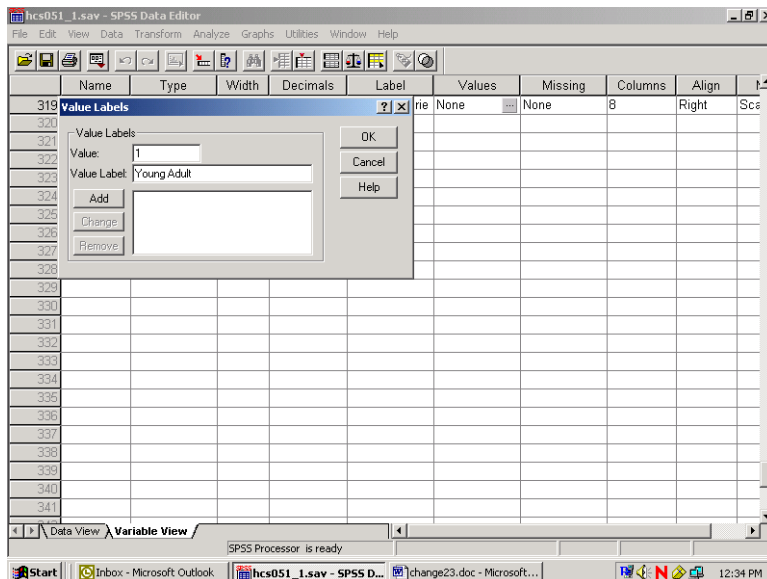

The variable **age_grp** is shown with its attributes.

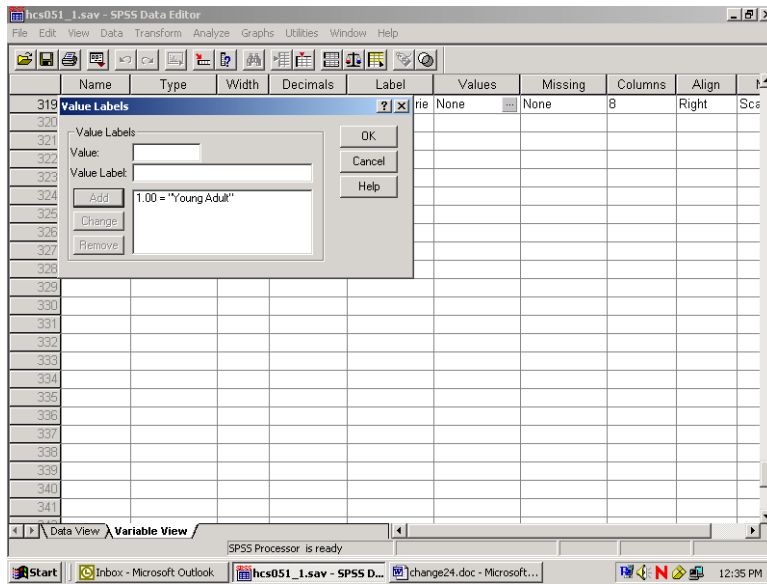

Click in the cell under **Values** and the following dialog box will open:

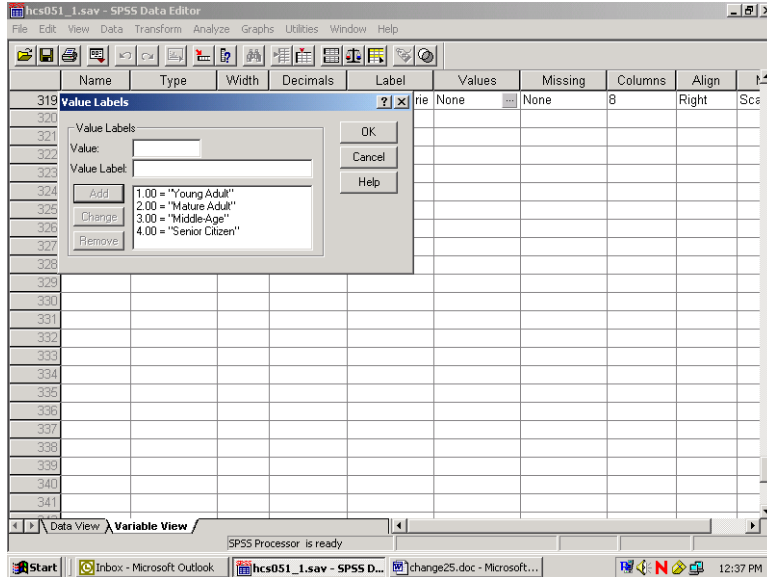

You can then begin to label the *values* of **age_grp**. Enter **1** in the slot marked **Value**, and enter the label **Young Adult** in the slot marked Value Label. The screen will look like the following:

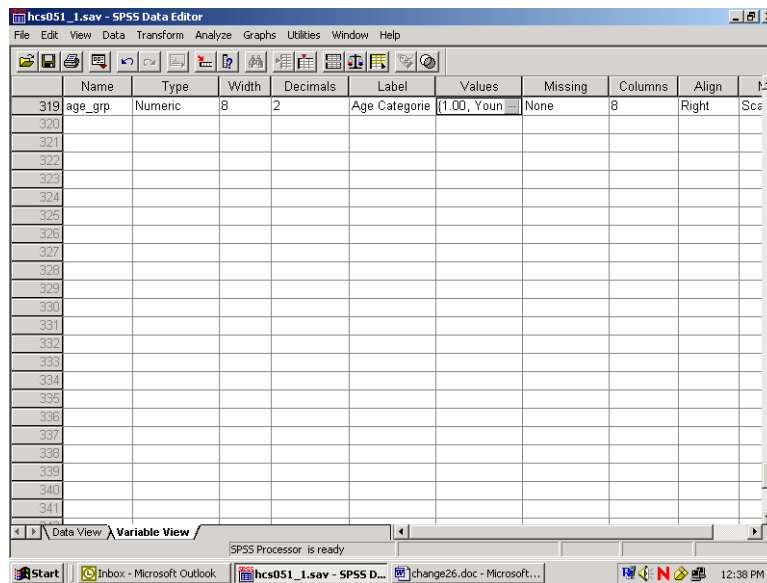

Add is now illuminated. Click on **Add** and the text of your command will appear in the central box, clearing the slots for further entries, as in the next screen.

Build the other three labels until the screen looks like the following:

Click on **OK** and the screen will appear as follows:

Click on the **Data View** tab to return to the data screen.

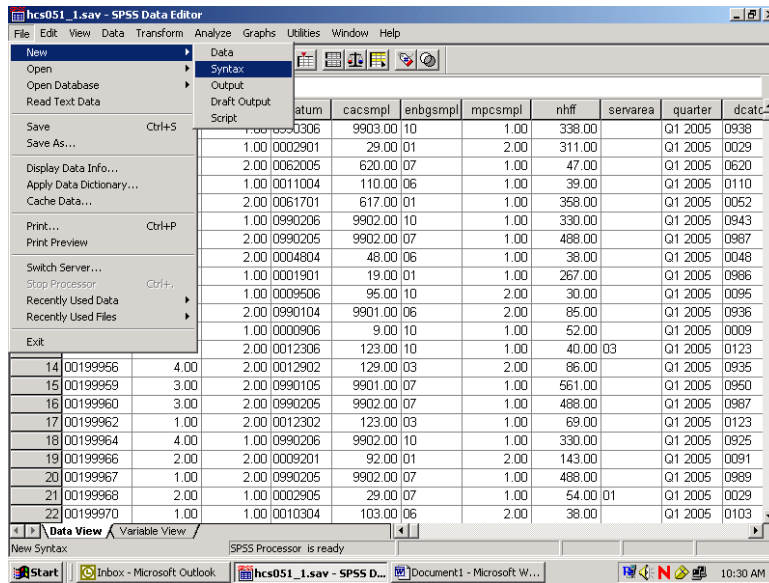

Limiting the Number of Variables

The HCSDb dataset contains many variables. To speed up software performance time, it may be desirable to limit the number of variables for analysis. There are ways to do this.

The first is to **Save** a subset of variables in a new file with a new name. This option is available only through syntax. The **Keep** or **Drop** command lets you save a subset of variables. The choice of **Keep** or **Drop** is dependent on which list is shorter to write.

For example, suppose you want to run some procedures to evaluate the rating of all experiences with the health plan as it relates to the beneficiaries' state of health. You are also interested in the differences between military and civilian services, and in differences within these groupings by gender. Moreover, you want to look at regional differences and differences among catchment areas. You can do all the work on a subset of only nine variables, saving them in a separate file.

To write the syntax, open a syntax window. If you want to create a new syntax file, choose **New, Syntax** on the **File** menu as in the following:

A blank syntax window will open.

Write the following command, substituting the file name and directory specification:

**SAVE OUTFILE='C:\MYFILES\HLTHCARE.SAV'/KEEP=XTNEXREG XSEXA XENRLLMT
CACSMPL WRWT XBNFGRP H05014 H05048 H05066.** as in the following:

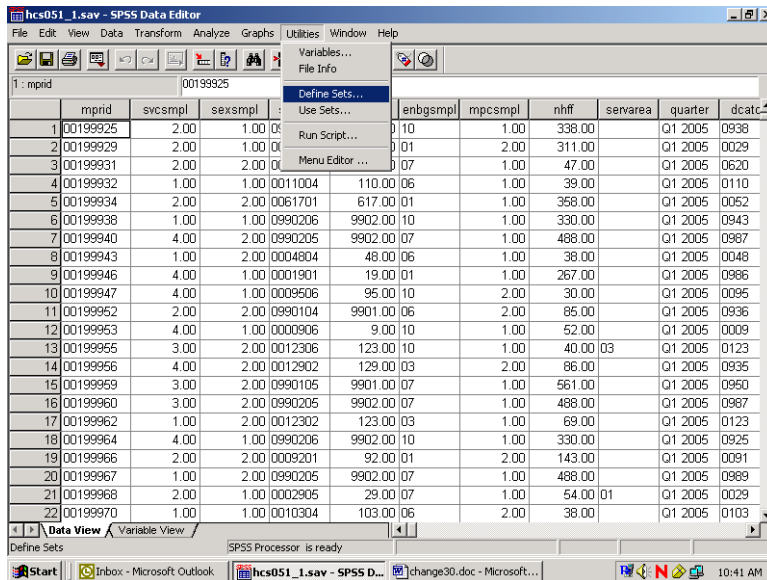

Upper case is optional. Be sure to enclose the entire file name in single quotes and to type a period at the end of the command.

Run the command by choosing the **Run** menu and selecting **All** from the choices.

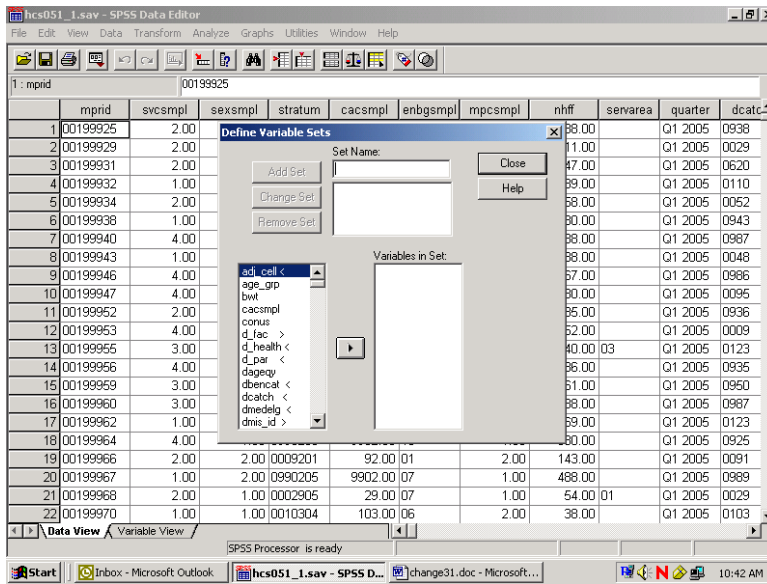

Open the new file according to the specifications at the beginning of this chapter.

The second way to limit the number of variables for analysis is to define a subset of *variables* that will appear in the dialog boxes for procedures. Using the **Utility** menu, define a subset of variables as in the following:

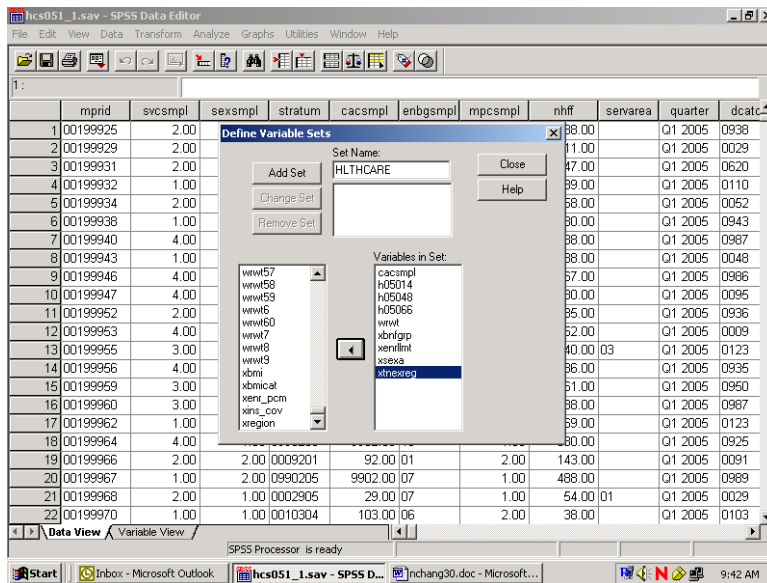

Select Define Sets.

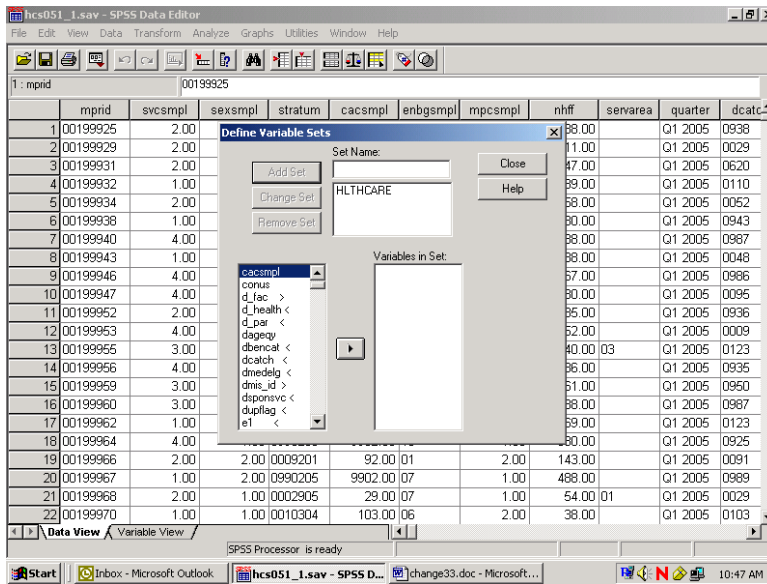

Insert a name for the subset of variables in the slot labeled **Set Name**. Move the variables you want to subset from the list on the left to the slot marked **Variables in Set**. By way of illustration, we will move the nine variables selected for the day's processing.

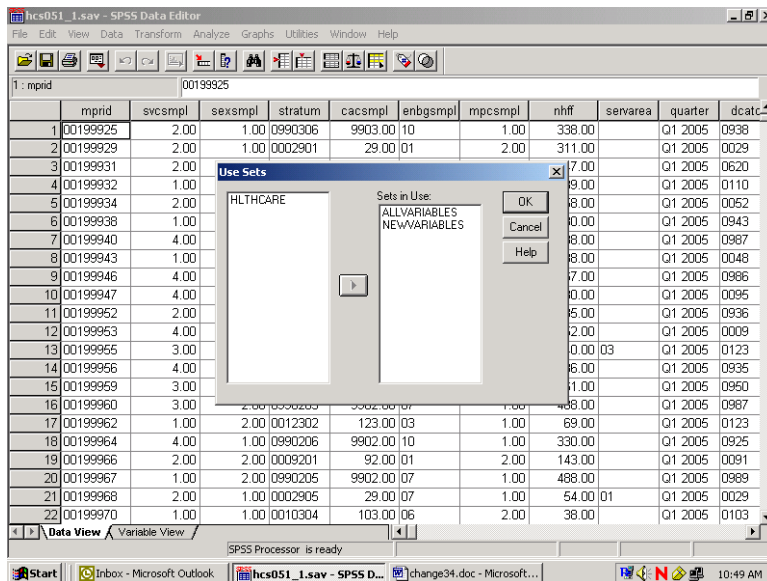

The screen should look like the following:

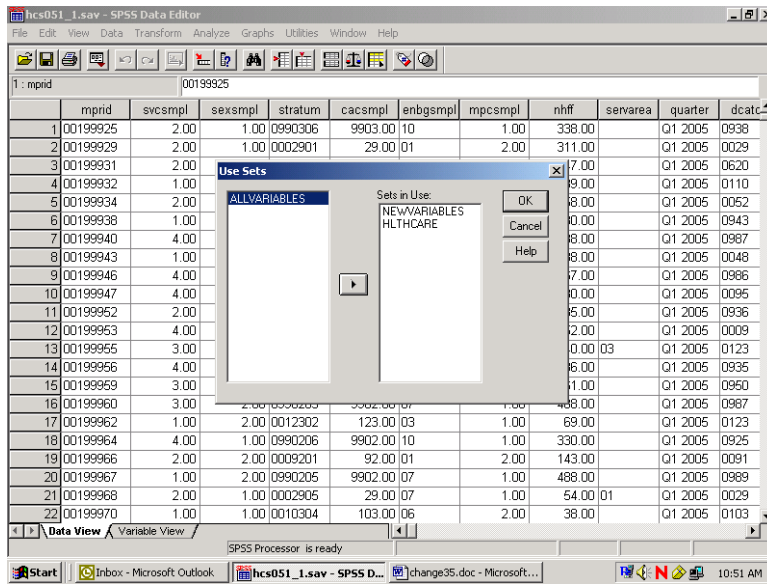

Click on **Add Set** to save the set specifications. The screen will change to the following:

The set is now available for use. To use the set, **Close** the dialog box, reopen the **Utilities** menu, choose **Use Sets...**, and receive this screen:

Move HLTHCARE from the left slot to the right slot, which is labeled **Sets in Use**. Transfer ALLVARIABLES from the right to the left slot. Leave NEWVARIABLES where it is. **OK** saves this change.

Until you change this specification, only nine original variables and any new variables will appear in the dialog boxes associated with procedures.

Limiting the Number of Observations

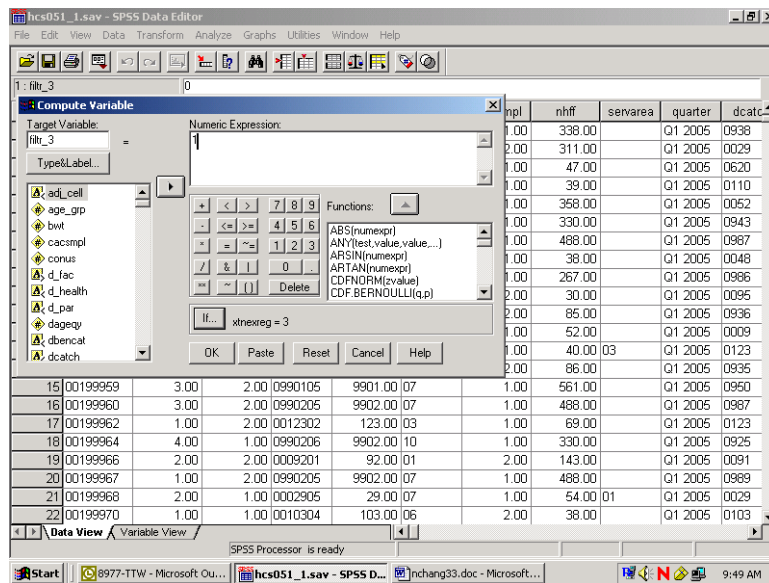

There are many ways to limit the number of observations available to statistical reporting procedures. The method illustrated here involves using **filter variables** with a menu-driven **Filter By** option. Using filters deactivates but does not delete cases from the file. A diagonal line appears next to the filtered cases in the **Data Window**.

The first task is to **compute** a filter variable for all the cases in the file.

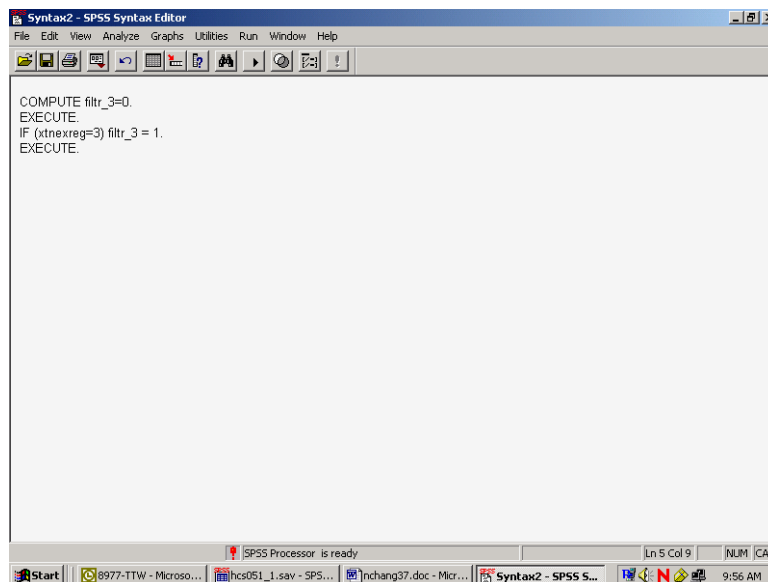

A filter variable has two values: **0** and **1**. The **1** indicates that the case will be included for procedures. The **0** flags the case for removal.

For example, suppose you want to produce a table for people who live in the West, i.e., cases for which the variable **xtnexreg = 3**. You would build a filter variable named **filtr_3**, which has the value **1** associated with the cases in the West and 0 for all the other cases in the file. The logic is: if **xtnexreg = 3**, then **filtr_3 = 1**, else **filtr_3 = 0**.

The screen below shows the final step in computing the filter variable. The variable was first initialized to **0**. Then, the "If" condition was built for setting the filter variable to **1**. You are now working with a subset of variables, allowing the dialog boxes to be used more efficiently.

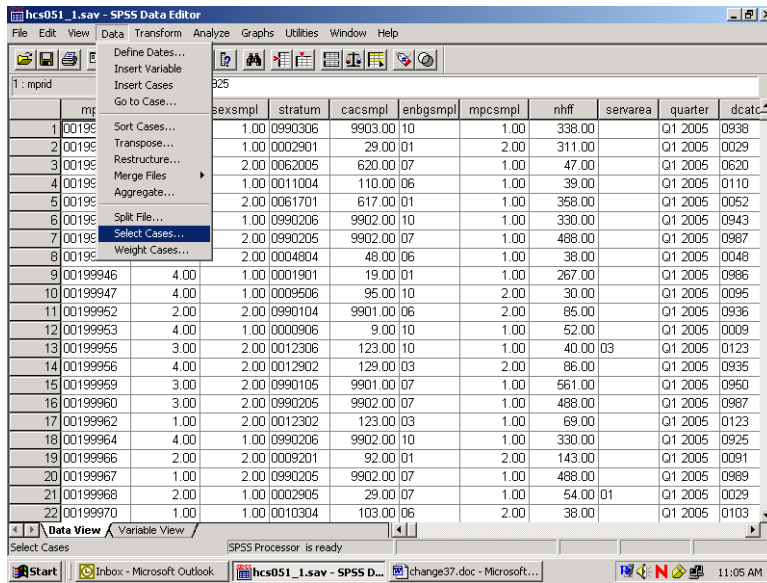

The screen that follows shows the syntax that was generated as you built the variable `filtr_3`.

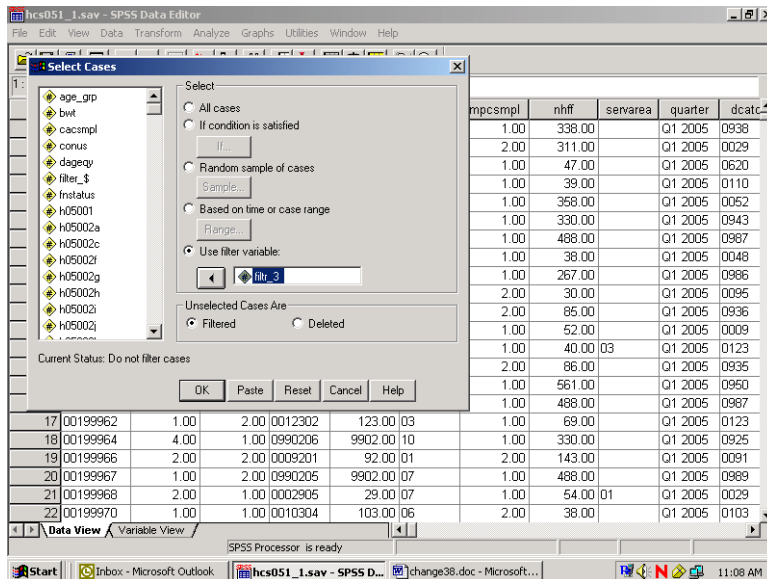

Once you build the filter variable, you can apply it for analyzing only those people from the West.

Using the **Data** menu, choose **Select Cases**.

In the dialog box, check **Use filter variable**. Move the variable **filtr_3** from the variable list on the left side of the dialog box into the slot provided, as indicated below. Check that the option **Filtered** is checked under **Unselected Cases Are**. This is the default option.

Click **OK** and exit the dialog box.

When you return to the **Data Window**, notice the slanting line next to some of the cases in the file. Those cases have been filtered out.

21	00199968	2.00	1.00	0002905	29.00	07	1.00	54.00	01	Q1 2005	0029
22	00199970	1.00	1.00	0010304	103.00	06	2.00	38.00		Q1 2005	0103

You can now produce tables for the subset of cases.

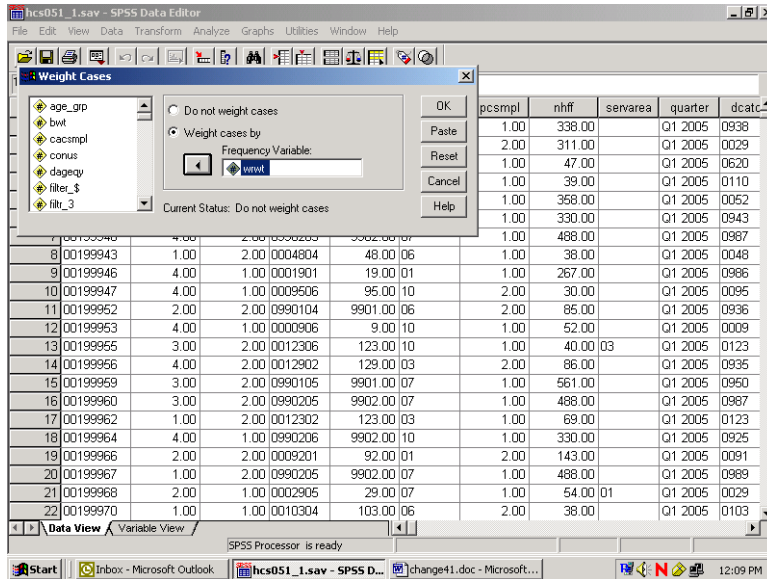

When using filter variables, it is important to check the filter status and to adjust it to fit the present need. Filtered cases are not available for procedures. Moreover, a filter is in effect until it is turned off or until another filter is activated. Check the status line at the bottom of the **Data Editor** window to see if a filter is activated. In the example above, **Filter On** is indicated on the status line. To see *which* filter is active, you must re-enter the **Select Cases** dialog box. There you can deactivate the filter or activate a new one.

To deactivate a filter, choose **All cases** and **OK** as in the screen below.

Weighting Data

The data file includes a weighting variable, **WRWT**, which should be applied to all procedure runs. Again, using the **Data** menu, choose **Weight Cases**. In the dialog box, choose **Weight cases by**. Move the weight variable from the list on the left into the slot labeled **Frequency Variable** on the right as shown below:

Click on **OK** and exit the dialog box. The indication that the data is weighted appears on the status line near the bottom of the screen. As in the following screen, **Weight On** is specified there.

The status line indicates if the data is weighted. Which weight variable is in effect can only be checked by re-entering the **Weight Cases** dialog box. Weighting stays in effect until it is canceled or until another weight variable is activated.

BUILDING TABLES

Building tables starts with creating a new subset of variables that includes H05014, H05048, H05066, cacsmpl, xbnfgrp, xsexa, xtnexreg, xenrlmt, wrwt, and filtr_3. The procedures **Means** and **Crosstabs** will probably meet most of your statistical reporting needs. SPSS also offers many options for editing the output tables themselves. Some of these options are explained here.

Calculating Means

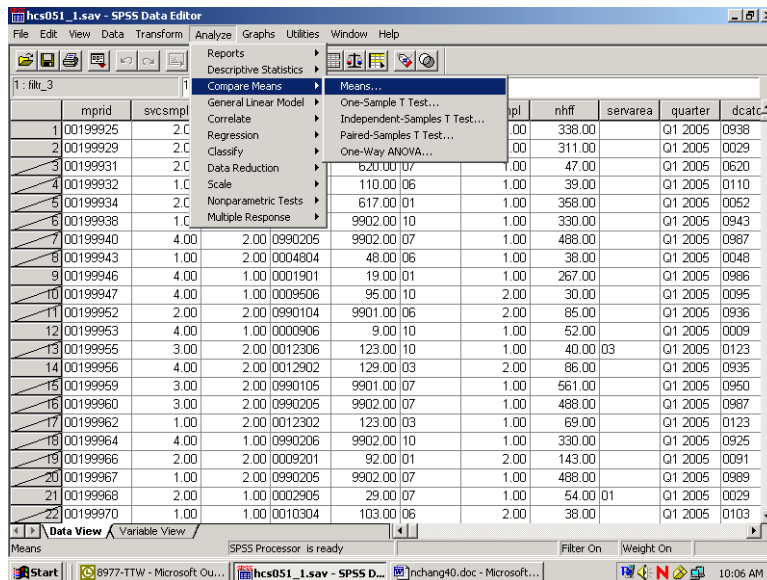

As an example, suppose you want to analyze the health care variables and you want to focus on the West (**xtnexreg = 3**). Suppose you are also interested in overall differences in the mean rating for care received as it relates to the beneficiary’s self-evaluation of his health for the West region. Within this grouping, you want to examine the effects of the beneficiary group, **xbnfgrp**, and sex, **xsexa**.

The health care variables are **H05048** – rating of the health plan, and **H05066** – assessment of the state of health. The statistic you want to see is the mean of the health care variables for each group in our breakdown.

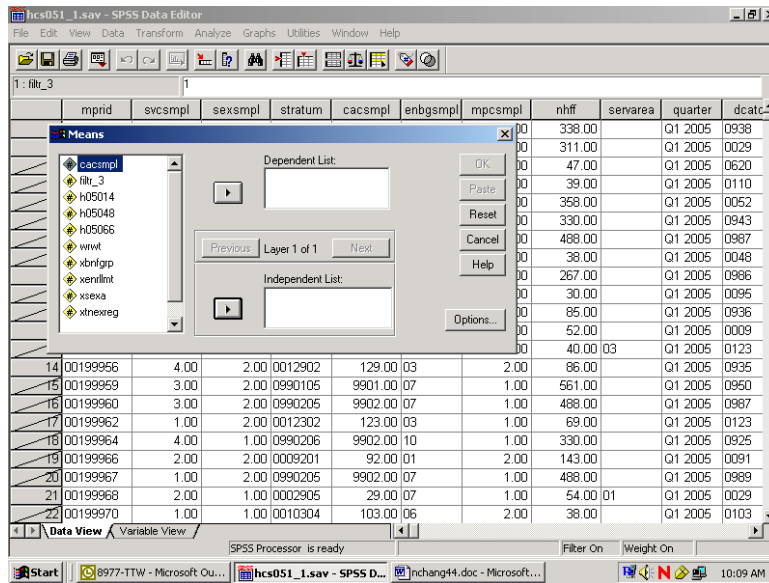

For this analysis, you can use the subset of variables defined above. The subset includes the weight variable, **WRWT**, which you would activate for procedure runs. The subset also includes the new variable, **filtr_3**, which allows us to select only those cases in the West.

Open the **Data** menu in the **Data Window**. In the **Weight Cases** dialog box, activate the weight variable **WRWT**. Reopen the Data menu and, in the **Select Cases** dialog box, activate the filter variable, **filtr_3**. On the status line, **Filter On** and **Weight On** should appear.

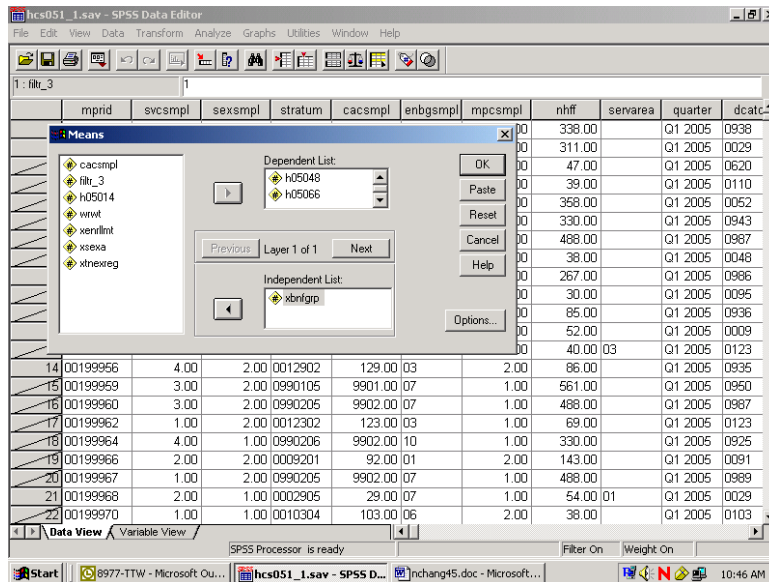

Open the **Analyze** menu in the **Data Window**. Choose **Compare Means** and **Means** from the options as illustrated below.

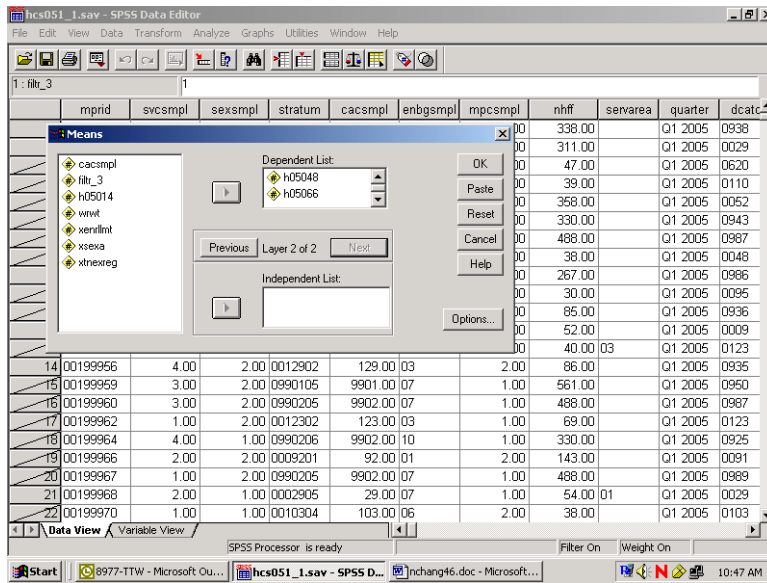

The dialog box for the Means procedure will open as in the following screen:

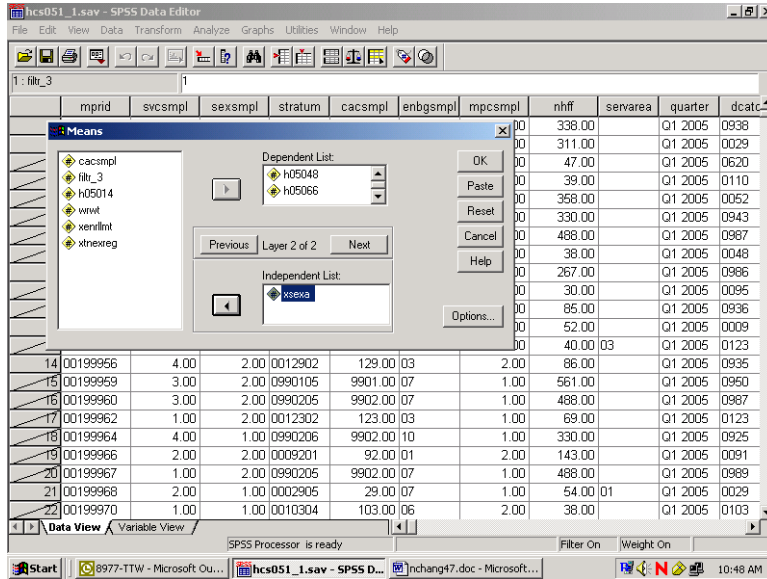

Move the health care variables **H05048** and **H05066**, from the variable list on the left to the box underneath **Dependent List**. These are the two analysis variables. Notice that **Layer 1 of 1** is specified in the middle of the dialog box. Move **XBNFGRP** from the variable list on the left into the box under **Independent List**. **XBNFGRP** is the first grouping variable. The screen should look like the following:

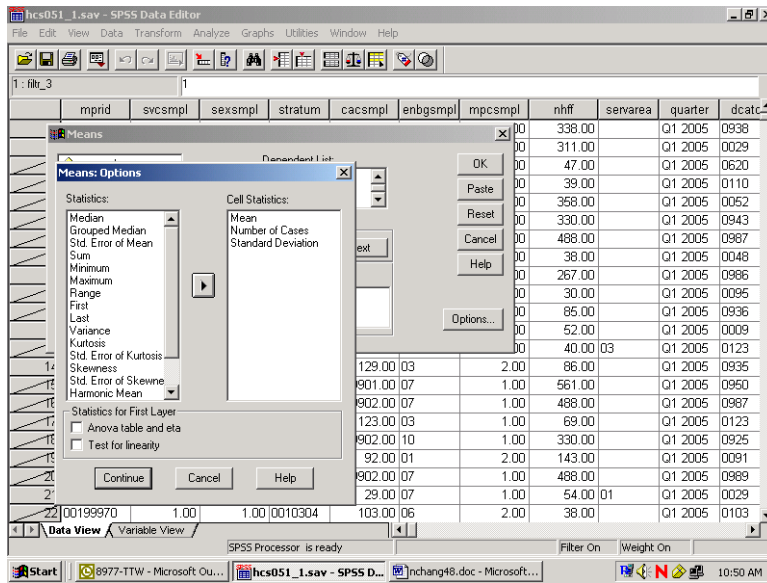

Click on **Next** in the center of the box to create a second layer. The following screen will open:

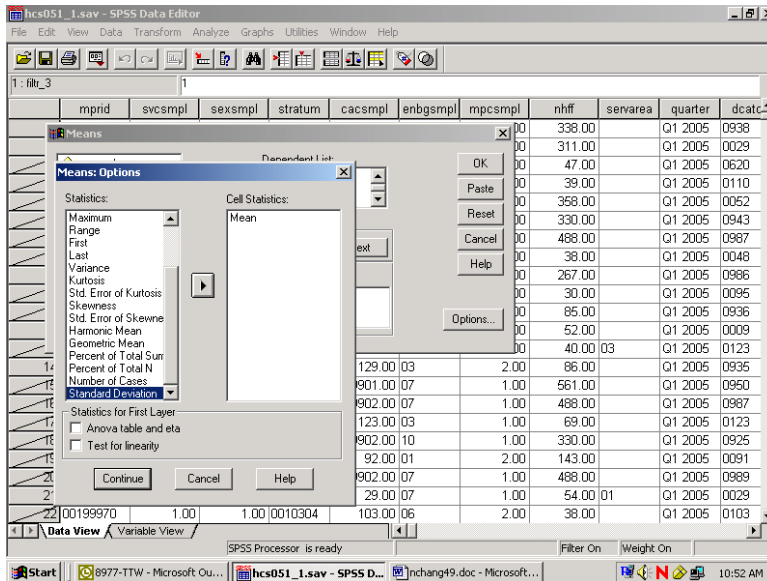

Notice that **Layer 2 of 2** is specified in the middle of the dialog box. Move **xsexa** from the variable list on the left into the box under **Independent List**. **Xsexa** is the second grouping variable. The screen should look like the following:

To set some options, click on **Options** and the following dialog box will open:

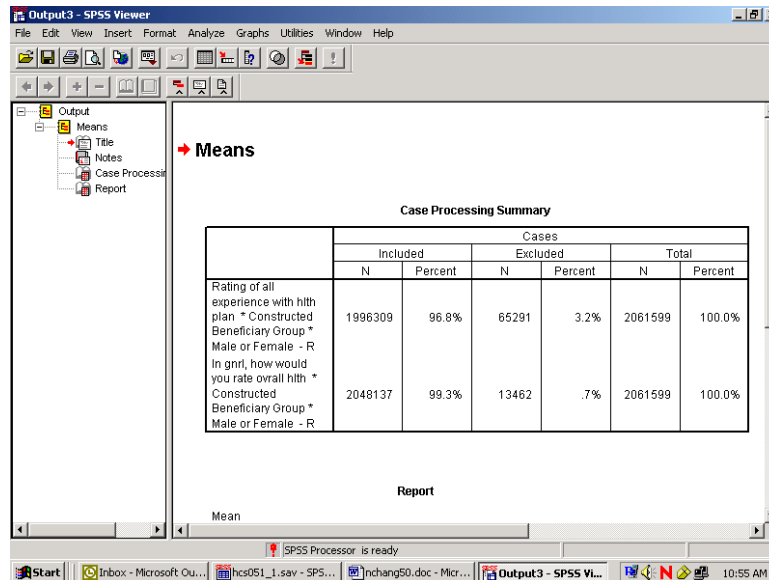

On the left of the box is a list of statistics, under **Statistics**. These are all the possible options for statistical output. In the box under **Cell Statistics** are the default output statistics for the analysis. In this case, **Mean** is the statistic of interest. Highlight **Number of Cases** and **Standard Deviation** and move them to the box at the left, removing them from the analysis, as follows:

Click on **Continue** and return to the previous screen. Click **OK**. The **Means** procedure will run. On the status line, **Running Means** will appear, and a counter for the number of cases processed will be activated.

When **Means** has finished processing, the **Output Navigator** window will open automatically. As the name suggests, the output window is not just for looking at output. A number of options are available for *navigating* through output, moving tables, and even editing the tables themselves.

The output is organized into two sections. On the left side is a navigating tool, which lists the components of the right side, the actual output. In the left pane, **Means** is indicated, and indented under it appear **Title**, **Notes**, **Case Processing Summary**, and **Report**. Clicking on **Means** highlights and selects all the elements. Lines appear around these elements in the right pane. The indenting indicates that the elements are hierarchically organized, with **Means** at the top. Clicking on any of the sub-elements selects just that element.

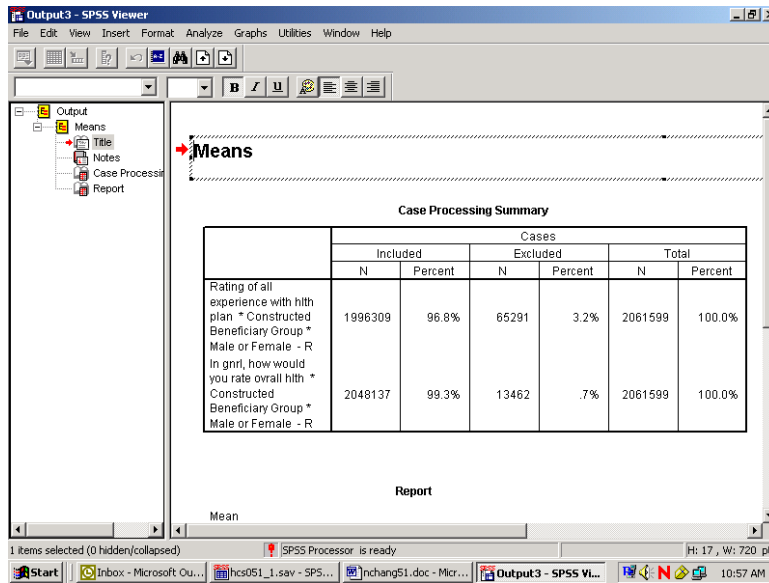

A closer look at the left pane reveals another feature. Hiding underneath the element icons are book icons. The books are either open or closed. If a book is closed, the element is *hidden*. Notice that the book under the **Notes** icon is closed. This is a default SPSS option. Double-clicking the icon will open the book, and the Notes will appear in the output. Double-clicking an **open** book will close it, and the physical element will *disappear* from the output. Closing a book and hiding the element does *not delete* the element.

It is possible to select elements in the right pane of the output. Simply click anywhere inside of the actual output element, and that element will be selected.

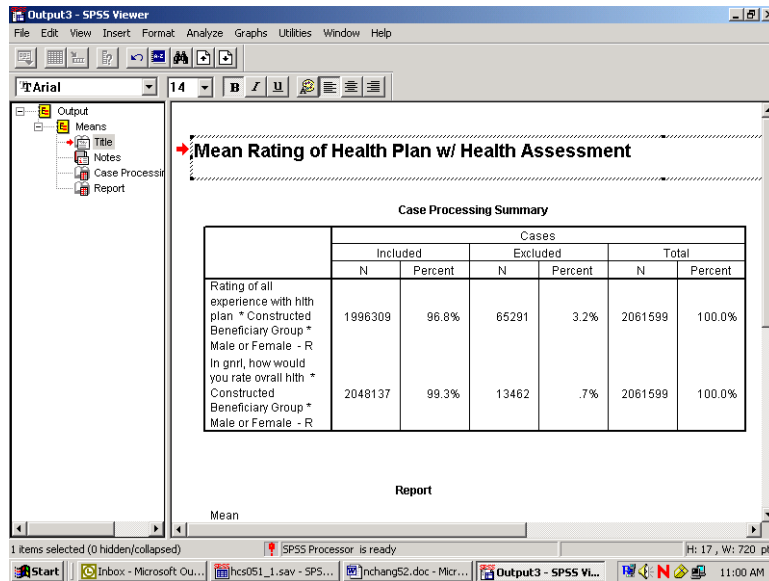

The output may contain many different procedures. The procedure name will be at the top of the list for each section in the left pane. The procedure name does not actually parallel physical output but indicates the category of the output elements.

As you click on each element in the left pane, you will notice that the screen jumps to the actual output of the element, in the right pane. When you click on the procedure name, you jump to the beginning of the next procedure output. This is a quick way to scroll through your output. It also lets you delete, move, and edit selected elements.

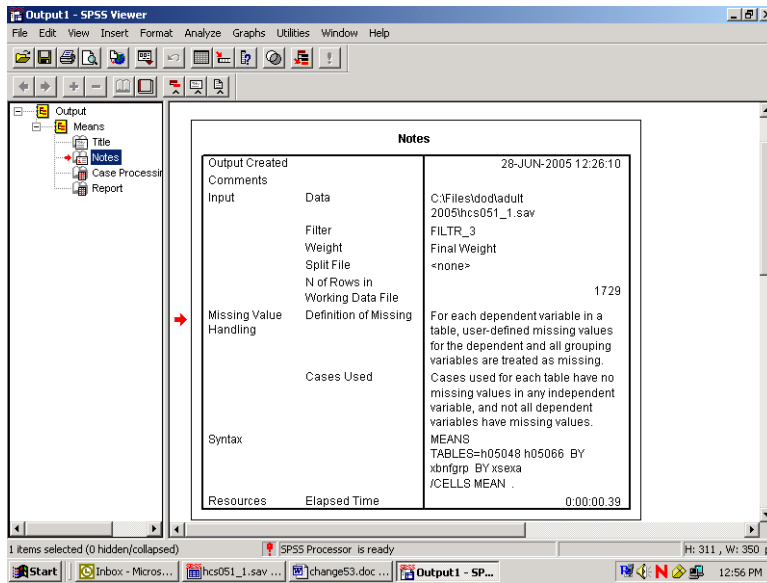

To **Edit** the **Title** element, **Means**, to create a more appropriate title, select the table title by clicking once on the **Title** icon in the left pane. A box now surrounds the title in the right pane. Double-click anywhere within this box, and a box appears around **Means**, as shown in the following screen.

You have entered the **edit** mode for this element, and the cursor appears inside the box. You can delete the word **Means** and write a title that relates to the information in the table. A possible title appears in the next screen. To exit edit mode, click anywhere outside the box. The change you made will be saved.

If you navigate to the next element, **Notes**, you see a closed book. Double-click this item, and the notes will appear as follows:

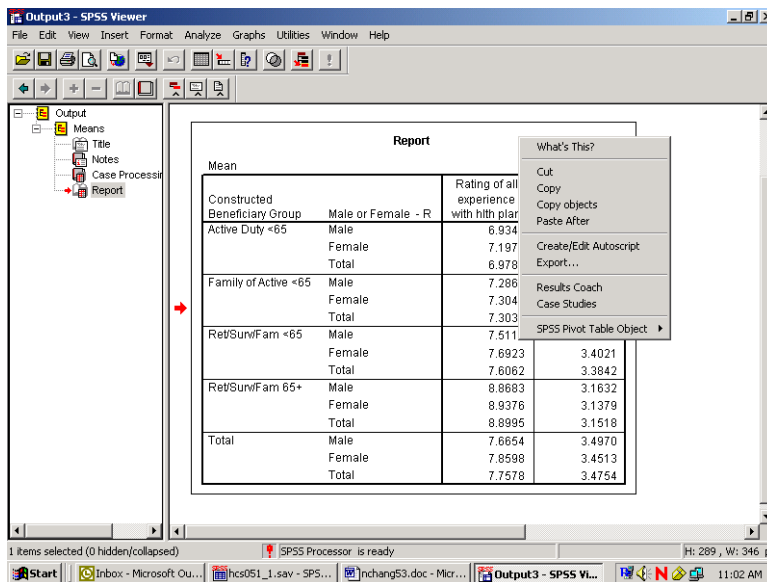

Decide if you want this information to appear in your report. If not, simply double-click the **Notes** icon, and the notes will again become hidden.

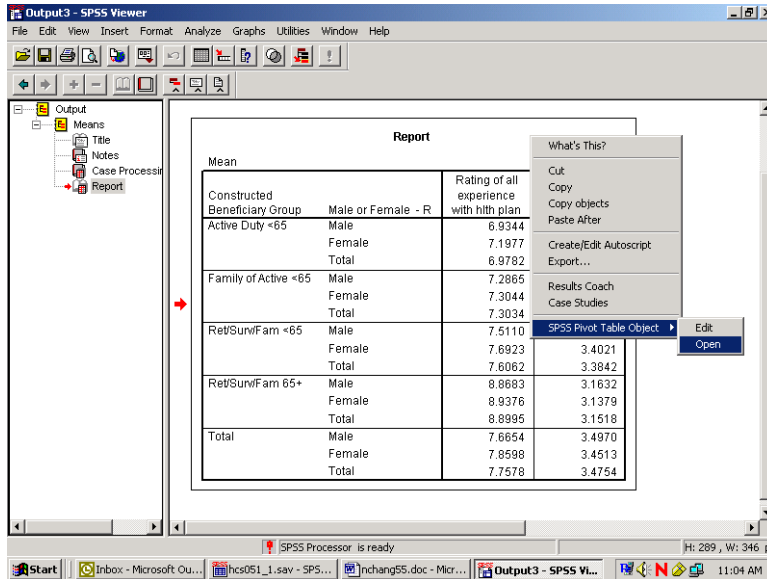

Navigate to **Case Processing Summary**. The table gives useful information about the number of cases included in and the number of cases excluded from a given procedure. This information is important for the researcher but probably not necessary for the report, so you would double click this item to hide it.

Navigate to **Report** to see the actual table output from the procedure **Means**. You can view this table by scrolling through the output. If the table is large, however, scrolling in the output window can be problematic. A better way to review the table is to open it as a **Pivot Table Object** in a special editor.

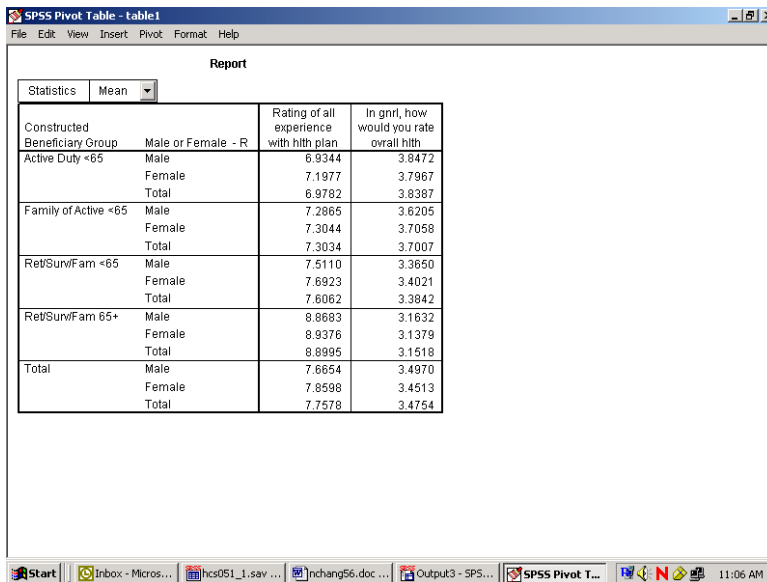

Select the table by clicking the **Report** icon or by clicking inside the table itself. A box will appear around the table. Insert the mouse pointer inside the table and right-click, opening the following dialog box:

Select **SPSS Pivot Table Object** and **Open** as pictured below:

The table will appear in a new screen superimposed on the output. Maximize this screen as shown below.

In this special editor, there are many options for formatting the table.

Suppose you want to change the table format from vertical to horizontal. Open the **Pivot** menu in the tool bar and choose **Transpose Rows and Columns** as shown below:

The rows and columns will be reversed as shown in the following screen. Though the table appears too wide in the viewer, it will fit the page when printed. You can do all the table editing in the left section of the table, and the changes will spread through the entire table.

You would then notice that certain labels are redundant. The labels, **Constructed Beneficiary Group** and **Male or Female - R** are the **Variable Labels** for the variables. The information in these labels is echoed in the **Value Labels**, which are also reproduced in the table. You would delete the Variable Labels as follows.

Click inside the section of the table where the label, **Constructed Beneficiary Group**, appears. Right-click to open a dialog box, choosing **Hide Dimension Label**, as illustrated below.

Statistics	Report									
	Active Duty <65			Family of Active <65			Ret/Surv/Fam <65			Ret/
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Mal
Rating of all experience with hlth plan	6.9344	7.1977	6.9782	7.2865						8
In gnr, how would you rate overall hlth	3.8472	3.7967	3.8387	3.6205						3

Click inside the table section labeled **Male or Female - R** and repeat the above procedure. An improved table is shown in the following screen.

Statistics	Report									
	Active Duty <65			Family of Active <65			Ret/Surv/Fam <65			Ret/
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Mal
Rating of all experience with hlth plan	6.9344	7.1977	6.9782	7.2865	7.3044	7.3034	7.5110	7.6923	7.6062	8
In gnr, how would you rate overall hlth	3.8472	3.7967	3.8387	3.6205	3.7058	3.7007	3.3650	3.4021	3.3842	3

The mean values reported are formatted to allow space for the labels of the satisfaction variables. The spaces between the values are not pleasing to the eye. You can shorten these labels and add the lost information in another place, according to the following procedures:

Double-click on the label for health state. Delete the text, entering only the word, **Health State**. Do the same for the health care label, entering only the words, **Plan Rating**.

Double-click on the word, **Report**, in the center at the top of the table, right-click, and choose **Delete** from the dialog box.

	Active Duty <65			Family of Active <65			Ret/SurvFam <65			Ret/
	Male	Female	Total	Male	Female	Total	Male	Female	Total	M:
Plan Rating	6.9344	7.1977	6.9782	7.2865	7.3044	7.3034	7.5110	7.6923	7.6062	8
Health State	3.8472	3.7967	3.8387	3.6205	3.7058	3.7007	3.3650	3.4021	3.3842	3

The resulting table is much more readable. You can then add the deleted information to clarify the table output. Open the **Insert** menu and choose **Title** as in the following:

	Active Duty <65			Family of Active <65			Ret/SurvFam <65			Ret/
	Male	Female	Total	Male	Female	Total	Male	Female	Total	M:
Plan Rating	6.9344	7.1977	6.9782	7.2865	7.3044	7.3034	7.5110	7.6923	7.6062	8
Health State	3.8472	3.7967	3.8387	3.6205	3.7058	3.7007	3.3650	3.4021	3.3842	3

Type in a new title for the table. The final result appears below.

SPSS Pivot Table - table1

File Edit View Insert Pivot Format Help

Mean Health Status With Mean Rating of Health Plan By Beneficiary Status and Gender

Statistics	Mean	Active Duty <65			Family of Active <65			Ret/SurvFam <65			Ret/
		Male	Female	Total	Male	Female	Total	Male	Female	Total	
Plan Rating		6.9344	7.1977	6.9782	7.2865	7.3044	7.3034	7.5110	7.6923	7.6062	8

Page 1 SPSS Processor is ready

Calculating Percents

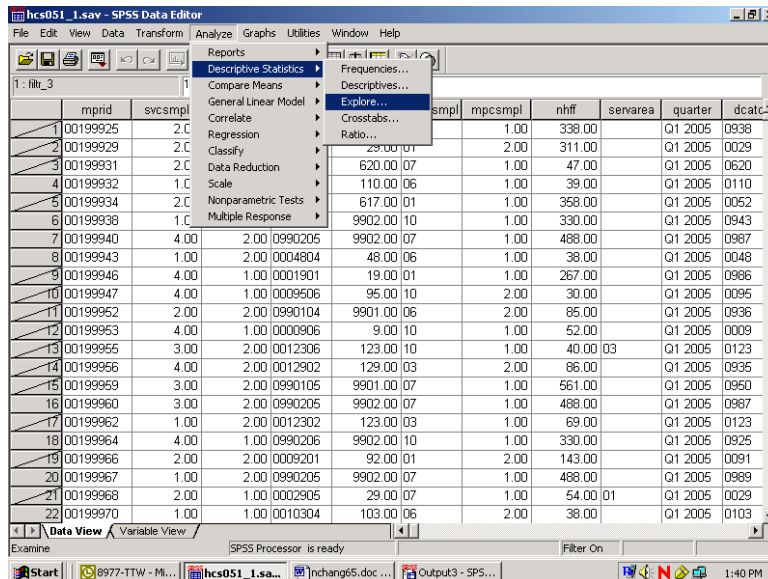

The **Crosstabs** procedure offers many options for analyzing data. The distribution of cases resulting from “crossing” one variable with another is often of interest. The number of cases, row percentages, column percentages, total percentages, and residuals are easily reproduced by **Crosstabs**. A full array of statistics is also available.

The examples given here involve examining relationships between variables, with a view toward the number of cases and the percent of cases in cells produced by “crossing” the variables.

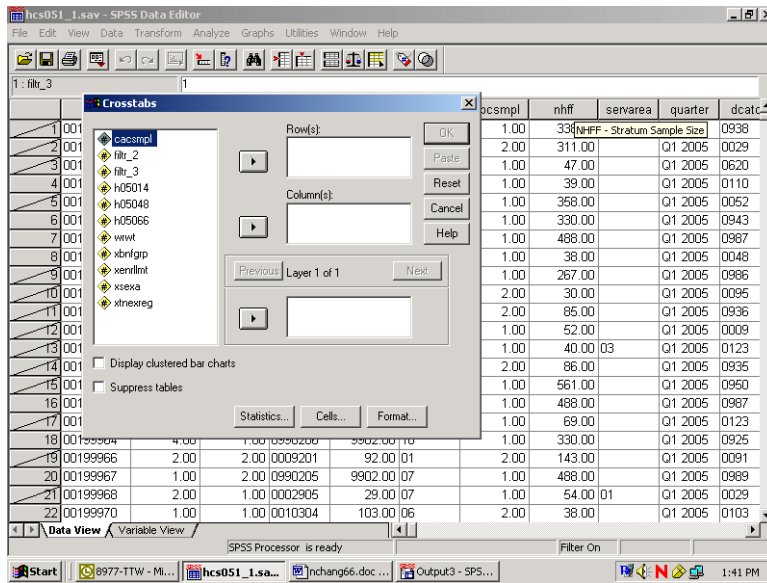

For example, suppose you want to see the percentage of people in the South catchment areas who answered “yes” or “no” to the question, “Did you see a specialist in the last 12 months?” The variables in this analysis are **cacsmpl** – the catchment area, and **H05014** – the question variable. The cases for the analysis are from the South only.

The first task is to build a new filter variable, assigning **1** to the variable when **xtnexreg = 2**. You would call the variable **filtr_2** and build it the same way you built the filter, **filtr_3**. Cases from the South are selected when you activate the filter, and the other cases are filtered out. Check the status line for **Filter On**.

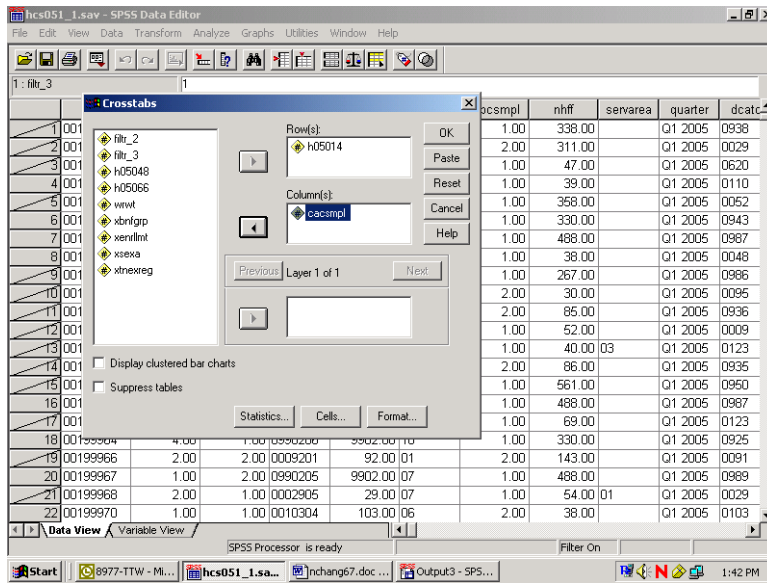

Next, open the **Analyze** menu in the **Data Window**, choosing **Descriptive Statistics** and **Crosstabs**, as shown below.

The **Crosstabs** dialog box will open as follows:

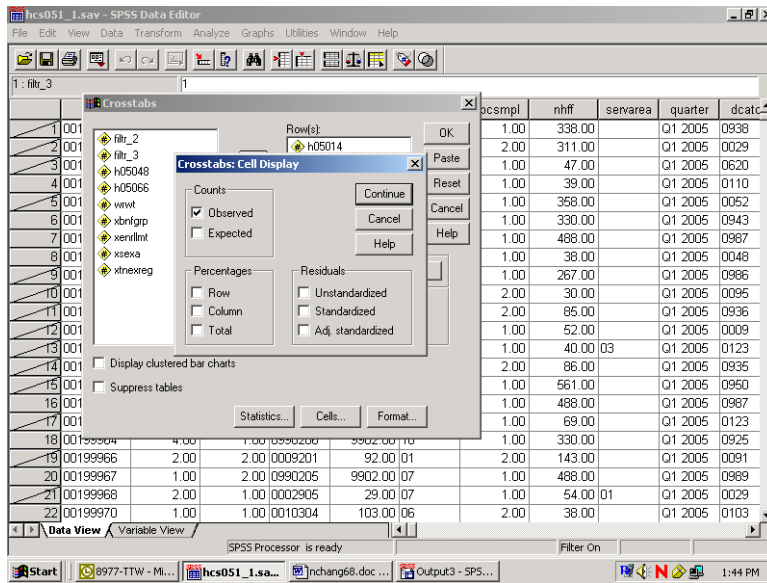

Move **H05014** from the variable list on the left into the box marked **Row(s):**, and move the variable **cacsmp1** into the box marked **Column(s):**. The screen will resemble the following:

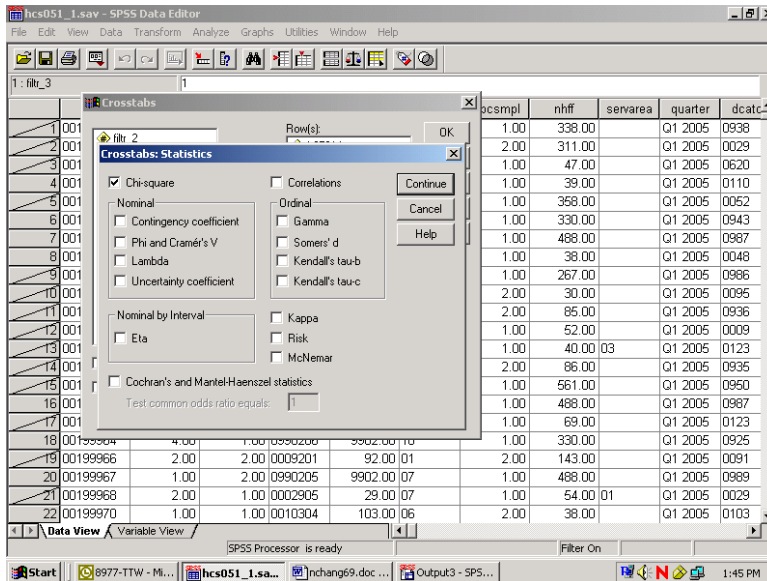

For this analysis, there are no **Layer** variables, so you can proceed to format the table cells.

Click on **Cells...** and open the following dialog box.

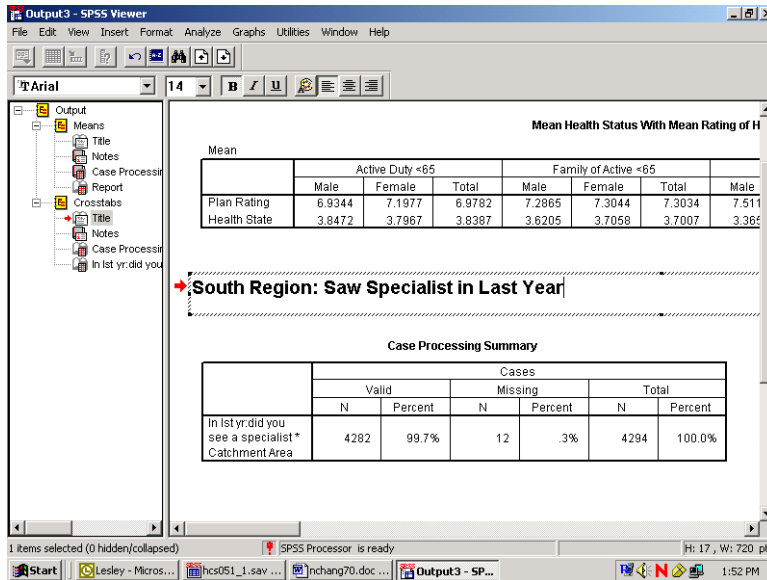

Under **Counts**, **Observed** is checked. This refers to the cell count, a statistic you want to see, so you would leave it checked. Under **Percentages**, check **Column** because you are interested in the percentage of people in each catchment area. Click **Continue** and return to the original screen.

Suppose you also want to see the chi-square statistic. Click on **Statistics**, and the following screen will open:

Check **Chi-square** as in the screen above, click **Continue** to return to the first screen, and click **OK** to run the procedure. **Running Crosstabs** will appear on the status line, together with the case counter.

When the run is completed, the output window will open, and you can proceed to reformat the table. For a given work session, SPSS appends new output to previous output—in our case, the **Means** procedure. As shown in the next screen, a second section now appears in the left pane, headed by the word **Crosstabs**. Navigate to the **Title** section and double-click inside the title box to change the text in the box to fit the table, as in the example below.

As you did for the **Means** procedure, you would again evaluate the **Notes** and examine the **Case Processing Summary**. Hide the **Notes** and the **Case Processing Summary** as you did before.

Navigate to the procedure icon. Follow the procedure for opening an **SPSS Pivot Table Object**, open the table in the special editor and maximize the screen as in the following:

In 1st yr. did you see a specialist * Catchment Area Crosstabulation

		Catchment Area						
		Redstone Ars/Ft McClellan	Fl. Rucker	Maxwell AFB	NH Pensacola	NH Jacksonville Key West	Eglin #	
In 1st yr. did you see a specialist	Yes	Count	63	61	81	86	92	
		% within Catchment Area	51.6%	54.5%	59.6%	58.9%	54.8%	54.
No	Count	59	51	55	60	76		
		% within Catchment Area	48.4%	45.5%	40.4%	41.1%	45.2%	45.
Total	Count	122	112	136	146	168		
		% within Catchment Area	100.0%	100.0%	100.0%	100.0%	100.0%	100.

The information you requested is in the table, but the table is hard to read. The first possibility is to realign the percent statistic, bringing it into the row dimension. To do this, open the **Pivot** menu and choose **Pivoting Trays**, as in the following screen:

In 1st yr. did you see a specialist * Catchment Area Crosstabulation

		Catchment Area						
		Redstone Ars/Ft McClellan	Fl. Rucker	Maxwell AFB	NH Pensacola	NH Jacksonville Key West	Eglin #	
In 1st yr. did you see a specialist	Yes	Count	63	61	81	86	92	
		% within Catchment Area	51.6%	54.5%	59.6%	58.9%	54.8%	54.
No	Count	59	51	55	60	76		
		% within Catchment Area	48.4%	45.5%	40.4%	41.1%	45.2%	45.
Total	Count	122	112	136	146	168		
		% within Catchment Area	100.0%	100.0%	100.0%	100.0%	100.0%	100.

The pivoting tool will appear:

The screenshot shows the SPSS Pivot Table window with a crosstabulation table. The table has 'In 1st yr.did you see a specialist' on the row axis and 'Catchment Area' on the column axis. The Pivoting Trays2 tool is open, showing 'Layers', 'Columns', and 'Rows' dimensions.

		Catchment Area					
		Redstone Ars/Ft McClellan	Ft. Rucker	Maxwell AFB	NH Pensacola	NH Jacksonville KeyWest	Eglin #
In 1st yr.did you see a specialist	Yes	Count 63	61	81	86	92	
		% within Catchment Area 51.6%	54.5%	59.8%	58.9%	54.8%	54
No	Count	59	51	55	60	76	
		% within Catchment Area 48.4%	45.5%	40.4%	41.1%	45.2%	45
Total		Count 122	112	136	146	168	-
		% within Catchment Area 100.0%	100.0%	100.0%	100.0%	100.0%	100

This tool reflects the table structure: rows, columns, and layers. The icons in the margins of the pivoting trays represent the table elements: the variables and the cell statistics. Place the mouse pointer on each icon and notice the element name appear. In this example, on the ROW axis, you would find the variable, **H05014** – saw specialist in the last 12 months, and **Statistics** – the percent of people in each catchment area. On the column axis is the variable, **cacsmp1** – the catchment area.

Place the mouse pointer on the **Statistics** icon. Click and drag the icon from the ROW to the COLUMN dimension. The table immediately reformats as in the following screen:

The screenshot shows the SPSS Pivot Table window with a reformatted crosstabulation table. The table is wider, with 'Count' and '% within Catchment Area' repeated for each catchment area. The Pivoting Trays2 tool is still open.

		Catchment Area					
		Redstone Ars/Ft McClellan		Ft. Rucker		Maxwell AFB	
		Count	% within Catchment Area	Count	% within Catchment Area	Count	% within Cat
In 1st yr.did you see a specialist	Yes	63	51.6%	61	54.5%	81	
	No	59	48.4%	51	45.5%	55	
Total		122	100.0%	112	100.0%	136	

Close the pivoting tool and scroll from side to side in the table. Again, the table appears too wide, but the report will print properly. Notice that the table is much more readable.

The table is now formatted to accommodate the long percent label, creating a lot of wasted space. Double-click this element, delete the text, and replace it with the word, "Percent". The empty space disappears and the table appears as follows:

In 1st yr:did you see a specialist * Catchment Area Crosstabulation

		Catchment Area					
		Redstone Ars/Ft McClellan		Ft. Rucker		Maxwell AFB	
		Count	Percent	Count	Percent	Count	Percent
In 1st yr:did you see a specialist	Yes	63	51.6%	61	54.5%	81	
	No	59	48.4%	51	45.5%	55	
Total		122	100.0%	112	100.0%	136	

Next, notice that the label for **H05014** is awkward. Select and clear it.

Last, edit the text in the table label so that it better expresses the content of the table. The finished table appears as follows:

Saw a Specialist In Last Year: By Catchment Areas

		Catchment Area					
		Redstone Ars/Ft McClellan		Ft. Rucker		Maxwell AFB	
		Count	Percent	Count	Percent	Count	Percent
Yes		63	51.6%	61	54.5%	81	59.6%
No		59	48.4%	51	45.5%	55	40.4%
Total		122	100.0%	112	100.0%	136	100.0%

Check **Print Preview** to see if the table is acceptable.

The last example shows you how to add a **Layer** dimension to a **Crosstabs** analysis. Using the same row variable, **H05014**, suppose you want to look at the percentage of people by their enrollment status in TRICARE Prime, **xenrilm1**, who saw a specialist in the past 12 months. Suppose you are also interested in sex differences, **xsexa**, among the groupings. **Xsexa** is the **Layer** variable. You want to remain in the South region, using **filtr_2** as the filter variable. The cases will be weighted by **WRWT**.

The status line indicates **Weight On** and **Filter On**. Verify that both the weight and the filter variables are appropriate.

Once more, open the **Crosstabs** dialog box, enter the analysis variables, and set the **Cells** options, checking **Column** under **Percentages** until the dialog box looks like the following:

Do the following:

- Run **Crosstabs**.
- Edit the **Title** element in the **Output Navigator**.
- Examine **Notes** and the **Case Processing Summary** to verify that the crosstab ran as expected.
- Open the table as an **SPSS Pivot Table Object**, and the following will appear:

SPSS Pivot Table - table3

In 1st yr:did you see a specialist * Enrollment in TRICARE Prime * Male or Female - R Crosstabulation

Male or Female - R				Enrollment in TRICARE Prime			
				Active Duty - under 65	Enrolled - under 65	Not enrolled - under 65	Not enrolled - 65 or over
Male	In 1st yr:did you see a specialist	Yes	Count 140739 % within Enrollment in TRICARE Prime 39.9%	119981 62.7%	142666 62.5%	259505 76.7%	
		No	Count 211982 % within Enrollment in TRICARE Prime 60.1%	71471 37.3%	85452 37.5%	78666 23.3%	
	Total	Count 352721 % within Enrollment in TRICARE Prime 100.0%	191452 100.0%	228118 100.0%	338171 100.0%		
Female	In 1st yr:did you see a specialist	Yes	Count 50702 % within Enrollment in TRICARE Prime 59.8%	206450 52.3%	179492 63.4%	209999 75.2%	
		No	Count 34094 % within Enrollment in TRICARE Prime 40.2%	188090 47.7%	103717 36.6%	69189 24.8%	
	Total	Count 84796 % within Enrollment in TRICARE Prime 100.0%	394540 100.0%	283209 100.0%	279188 100.0%		

The table is difficult to read, but you can improve it by doing the following.

Select the **Pivot** menu to activate the **Pivoting Trays**. The table structure is reproduced in the tool as follows:

Place the mouse pointer on each small icon to find the second grouping variable, labeled **Male or Female - R**, in the ROW dimension. Move it to the COLUMN dimension, and the table changes to the following:

SPSS Pivot Table - table3

In 1st yr:did you see a specialist * Enrollment in TRICARE Prime * Male or Female - R Crosstabulation

		Enrollment in TRICARE Prime						1 enr Me h	
		Active Duty - under 65		Enrolled - under 65		Not enrolled - under 65			
		Male or Female - R		Male or Female - R		Male or Female - R			
		Male	Female	Male	Female	Male	Female		
In 1st yr:did you see a specialist	Yes	Count	140739	50702	119981	206450	142666	179492	2
		% within Enrollment in TRICARE Prime	39.9%	59.8%	62.7%	52.3%	62.5%	63.4%	
	No	Count	211982	34094	71471	188090	85452	103717	
		% within Enrollment in TRICARE Prime	60.1%	40.2%	37.3%	47.7%	37.5%	36.6%	
Total		Count	352721	84796	191452	394540	228118	283209	3
		% within Enrollment in TRICARE Prime	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	1

Pivoting Trays3

Columns
Rows

Start | Inbox - Micros... | hcs051_1.sav... | hchang79.doc... | Output3 - SPS... | SPSS Pivot T... | 2:12 PM

Then drag the **Statistics** icon to the COLUMN dimension to produce the following change:

SPSS Pivot Table - table3

In 1st yr:did you see a specialist * Enrollment in TRICARE Prime * Male or Female - R Crosstabulation

		Enrollment in TRICARE Prime					
		Active Duty - under 65			Enrolled - under 65		
		Male or Female - R			Male or Female - R		
		Male		Female		Male	
	Count	% within Enrollment in TRICARE Prime	Count	% within Enrollment in TRICARE Prime	Count	% within Enrollment in TRICARE Prime	
In 1st yr:did you see a specialist	Yes	140739	39.9%	50702	59.8%	119981	62.7%
	No	211982	60.1%	34094	40.2%	71471	37.3%
Total		352721	100.0%	84796	100.0%	191452	100.0%

Pivoting Trays3

Layers
Columns
Rows

Start | Inbox - Micros... | hcs051_1.sav... | hchang80.doc... | Output3 - SPS... | SPSS Pivot T... | 2:13 PM

Close the **Pivoting Trays** and hide the dimension label, **Male or Female - R**, in the table. Then, change the percent label to “Percent” and delete the label for **H05014** in the row dimension. Last, revise the label above the table to make it more informative.

The resulting table is both clear and informative.

The screenshot shows the SPSS Pivot Table window with the following data:

South Region: Saw A Specialist In Last Year: Enrollment Status By Gender								
Enrollment in TRICARE Prime								
Active Duty - under 65								
Male			Female			Enrolled - under 65		
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Yes	140739	39.9%	50702	59.8%	119981	62.7%	206450	52.3%
No	211982	60.1%	34094	40.2%	71471	37.3%	188090	47.7%
Total	352721	100.0%	84796	100.0%	191452	100.0%	394540	100.0%

The Print Preview, as in the view below, shows how the report will print.

The screenshot shows the print preview of the pivot table, which is formatted as follows:

South Region: Saw A Specialist In Last Year: Enrollment Status By Gender

Enrollment in TRICARE Prime								
Active Duty - under 65								
Male			Female			Enrolled - under 65		
	Count	Percent	Count	Percent	Count	Percent	Count	Percent
Yes	140739	39.9%	50702	59.8%	119981	62.7%	206450	52.3%
No	211982	60.1%	34094	40.2%	71471	37.3%	188090	47.7%

CALCULATING VARIANCES OF ESTIMATES

Sampling error occurs when estimates are derived from a sample rather than a complete census of the population. The sample used for a particular survey is only one of a large number of possible samples of the same size and design that could have been selected. Even if the same questionnaire and instructions were used, the estimates from each sample would differ from the others. The standard error (or square root of the variance) indicates the magnitude of the sampling error and thus measures the precision expected from a particular sample.

It is desirable to assess the accuracy of an estimate. The standard error of a survey estimate measures the precision with which an estimate from one sample approximates the true population value. The standard error can be used to construct confidence intervals for survey parameters, within which the true parameter lies within a measurable degree of certainty.

This section explains how to estimate standard errors or variances for estimators computed from the 2005 Adult HCSDb. For a full discussion of variance estimation methods, see Wolter (1985) and references cited therein.

Variance Estimation Methods

To account for the sample design,¹ it is customary to use either Taylor series linearization or a resampling method for variance estimation. Neither variance estimation method is, in general, better so the choice of one or the other is largely a matter of convenience. To help users to estimate standard errors using Taylor series linearization or jackknife replication, the public release files for the 2005 Adult HCSDb include the following variables:

- The stratum variable (ADJ_CELL) for the Taylor series linearization method
- Quarterly final weight (WRWT) and jackknife replicate weights (WRWT01 to WRWT60)

Two popular software packages are available for performing Taylor series linearization or the jackknife replication method: SUDAANTM (Shah et al. 1997) and WesVarPC (Brick et al. 1996), respectively.² The discussion below explains how SUDAAN and WesVarPC are used to calculate variance estimates using Taylor series linearization and jackknife replication methods.

Taylor Series Linearization Method

For most sample designs (including the 2005 Adult HCSDb), design-based variance estimates for linear estimators of totals or means can be obtained with explicit formulas. However, nonlinear functions such as ratios do not have exact expressions for the variance. The Taylor series linearization method approximates the variance of a nonlinear estimator with the variances of the linear terms from the Taylor series expansion. Woodruff (1971) presented applications of this technique to sample surveys. Details on this method can also be found in “The 2005 Health Care Survey of DoD Beneficiaries: Adult Technical Manual”.

To calculate variance estimates based on Taylor series linearization method with HCSDb’s stratified sampling design, both the stratum variable (ADJ_CELL) and the final weight (WRWT) specified for each data record are needed.

¹The 2005 HCSDb uses a stratified sampling design. For details, see “Health Care Survey of DoD Beneficiaries: 2005 Adult Sampling Report.” Washington, DC: Mathematica Policy Research, November 2004.

²The latest version for SUDAAN 8.0 can be used for replication methods including jackknife variance estimation. SAS 8.0 also includes procedures for performing Taylor series utilization, but SUDAAN contains more options.

SUDAAN incorporates the final analysis weight and the survey design to obtain estimates and their sampling errors. With a small overall sampling rate of about 1 percent, you can use the with-replacement design procedure (STRWR) in calculating standard errors.

All SUDAAN procedures require the following:

- The specification of sampling designs. The terminology for the stratified with-replacement sample design is DESIGN = STRWR.
- The data file sorted by the variable specified in the NEST statement. For the Quarter I 2005 Adult HCSDB, the data file for adults must be sorted by ADJ_CELL before using any SUDAAN procedure.
- A FILE TYPE appropriate for SUDAAN, if you use a stand-alone SUDAAN program. For example, some SUDAAN PC versions under Windows or MS-DOS accept only V6.02 through V6.04 SAS files, and FILE TYPE must be specified as SAS. SAS-callable SUDAAN is also available and can be invoked directly in a SAS program with any available SAS file as input; FILE TYPE is not needed here.
- The WEIGHT variable is WRWT

The following program is an example of how to use SUDAAN to calculate variance estimates for a mean statistic. Suppose you want to estimate:

- The rating of a specialist (H05015), among all beneficiaries in the past 12 months who saw a specialist (H05014=1) for each region (XTNEXREG)

```
PROC DESCRIPT DATA=HCSDB /*FILETYPE=SAS*/ DESIGN=STRWR;  
WEIGHT          WRWT;  
NEST            ADJ_CELL;  
SUBPOPN        H05014=1;  
SUBGROUP       XTNEXREG;  
LEVELS         16;  
VAR            H05015;
```

The following program is an example of how to use SUDAAN to calculate variance estimates for column percentages or row percentages. Suppose you want to estimate:

- A cross tabulation of respondents in TNEX region 3 who last had a blood pressure reading less than 12 months ago, 1 to 2 years ago, and more than 2 years ago (H05049) by TRICARE enrollment (XENRLLMT).

```
PROC CROSSTAB DATA=HCSDB /*FILETYPE=SAS*/ DESIGN=STRWR;  
WEIGHT          WRWT;  
NEST            ADJ_CELL;  
SUBPOPN        XTNEXREG = 3;  
SUBGROUP       H05049 XENRLLMT;  
LEVELS         3 5;  
TABLES         H05049 *XENRLLMT;
```

From the above examples, users should note that:

- PROC DESCRIPT can be used to compute estimates of means and the corresponding standard errors.

- PROC CROSSTAB can be used to compute estimates of proportions and the corresponding standard errors.

For a more detailed and complete discussion of how to use SUDAAN, see Shah et al. (1997).

Jackknife Replication Method

Another popular way to estimate the variance is to use a resampling method such as jackknife replication, balanced repeated replication, random groups, or the bootstrap method. Like other replication methods, jackknife replication constructs a number of subsamples (replicates) from the full sample and computes the statistics of interest for each replicate (with the same formula as the full sample estimate). The mean square error of the replicate estimates around their corresponding full estimate provides an estimate of the sampling variance of the statistic of interest regardless of the functional form of the statistic.

There are 60 replicate weights (WRWT01-WRWT60) for the 2005 Adult HCSDB in the Quarter I file. Construction of these weights is described in the Adult Technical Manual to be issued February 2006. With the replicate weights, you can produce jackknife standard errors using in-house or custom written software, or you can use a publicly available software package such as WesVarPC or SUDAAN 7.5. Because WesVarPC 2.02 is available as freeware on the World Wide Web (<http://www.westat.com/wesvar/demo/index.html>), the following example explains how it is used to produce jackknife variance estimates for statistics from the 2005 Adult HCSDB.

Suppose you want to estimate the mean rating of specialists (H05015) by beneficiaries who went to a specialist in the past 12 months (H05014=1) for each region (XTNEXREG). You would use WesVarPc as follows.

- **Create a SAS V6.04 file, SAS Transport file, or ASCII file.** WesVarPC has a restriction for the input data format. All files must be converted to one of these three types of files before being imported to WesVarPC.
- **Create a WesVarPC data file.** From the *Prep* menu, choose the *Import Data Files* screen and import all variables for the analysis. For this example, input H05015, and XTNEXREG into the *Variables* box, WRWT01-WRWT60 into the *Replicates* box, and MPRID into the *ID* box. Also specify the replication method as JK1 on this screen.
- Create a data file for the subpopulation. Specify the subpopulation by choosing the *Subpop WesVarPC Data File* from the *Prep* menu: H05014=1.
- **Calculate estimates.** From the *Tables* menu, choose *New* and select the file created from the above procedure. Then, from the *Table Request* screen, specify H05015 as the *Analysis* variable, MEAN (H05015) as the *Compute Statistics*, and XTNEXREG as the *Table*.

The above steps can also be followed to produce standard errors. The WesVarPC user's manual (Brick et al. 1996) provides other possible methods for producing standard errors. The latest WesVarPC 4.0 is no longer freeware and can be purchased from Westat.

Codebook

This chapter describes every variable in the database. This codebook will also be helpful in identifying which data are available for various analyses, and what, if any, recoding of variables will meet your needs. It may also be useful in reviewing output.

The variables are in order based on their order in the database. An alphabetical listing (see Table of Contents) is provided to assist in locating variables.

The codebook contains frequency distributions for both discrete and continuous variables. A discrete variable is one that has only a few values. A continuous variable may have many possible values.

Below are two examples of the presentation of variables in the codebook. For each variable, we include the variable name, definition, weighted and unweighted frequency distributions, and the format value for each value. The first example contains a frequency distribution for a discrete variable.

H05011 - Health plan: problem to get a personal doctor or nurse you are happy with					
Value	Unweighted		Weighted		Formatted Value
	Count	Percent	Count	Percent	
.	600	4.05	274357.00	4.00	Did not answer
C	700	4.72	485809.00	7.08	Should be skipped
N	1112	7.50	732732.40	10.68	Valid skip
1	2061	13.90	827828.40	12.07	A big problem
2	3244	21.88	1304075.00	19.01	A small problem
3	7108	47.95	3236314.00	47.17	Not a problem

The table below contains an example of a frequency distribution for a continuous variable: age. The frequency does not list every possible value of age individually but instead shows several age ranges that together cover all possible values of age. You will notice that the last range representing ages “75 years and older” includes 848 respondents age 75 and older.

DAGEQY - Age at time of data collection					
Value	Unweighted		Weighted		Formatted Value
	Count	Percent	Count	Percent	
018 -- 034	4204	28.36	1493459.00	21.77	018--034
035 -- 044	3370	22.73	1156534.00	16.86	035--044
045 -- 054	2461	16.60	1130291.00	16.47	045--054
055 -- 064	2456	16.57	1334020.00	19.44	055--064
065 -- 074	1486	10.02	1075490.00	15.68	065--074
075 -- 095	848	5.72	671322.20	9.78	075 yrs and older

MPRID - Unique MPR Identifier					
Value	Unweighted		Weighted		Formatted Value
	Count	Percent	Count	Percent	
00199925 -- 09737933	14825	100.00	6861116.00	100.00	00000001--99999999

SVCSMPL - Branch of Service Sampling Variable					
Value	Unweighted		Weighted		Formatted Value
	Count	Percent	Count	Percent	
1	4663	31.45	2450687.00	35.72	Army
2	3651	24.63	1635463.00	23.84	Navy
3	912	6.15	440772.50	6.42	Marine Corps
4	5205	35.11	2142951.00	31.23	Air Force
5	331	2.23	164351.40	2.40	Coast Guard
6	63	0.42	26890.59	0.39	Other/Unknown

SEXSMPL - Sex Sampling Variable					
Value	Unweighted		Weighted		Formatted Value
	Count	Percent	Count	Percent	
1	7544	50.89	3617389.00	52.72	Male
2	7281	49.11	3243727.00	47.28	Female

STRATUM - Sampling STRATUM					
Value	Unweighted		Weighted		Formatted Value

Health Care Survey of DoD Beneficiaries

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

SURVEY INSTRUCTIONS

Answer all the questions by checking the box to the left of your answer. You are sometimes told to skip over some questions in this survey. When this happens you will see an arrow with a note that tells you what question to answer next, like this:

Yes → *Go to Question 1*

No

Please return the completed questionnaire in the enclosed postage-paid envelope within seven days. If you have misplaced the envelope, our address is:

Office of the Assistant Secretary of Defense
(Health Affairs)
c/o Synovate Survey Processing Center
PO Box 5030
Chicago, IL 60680-4138

According to the Privacy Act of 1974 (Public Law 93-579), the Department of Defense is required to inform you of the purposes and use of this survey. Please read it carefully.

Authority: 10 U.S.C., Chapter 55, Section 572, Public Law 102-484, E.O. 9397.

Purpose: This survey helps health policy makers gauge beneficiary satisfaction with the current military health care system and provides valuable input from beneficiaries that will be used to improve the Military Health System.

Routine Uses: None

Disclosure: Voluntary. Failure to respond will not result in any penalty to the respondent. However, maximum participation is encouraged so that data will be as complete and representative as possible.

SURVEY STARTS HERE

This survey is about the health care of the person addressed in the cover letter. The questionnaire should be completed by that person. If you are not the addressee, please give this survey to the person named in the cover letter.

1. Are you the person whose name appears on the mailing label of this envelope?

- Yes → Go to Question 2
 No → Please give this questionnaire to the person addressed on the envelope.

2. By which of the following health plans are you currently covered? **MARK ALL THAT APPLY.**

Military Health Plans

- TRICARE Prime
 TRICARE Extra or Standard (CHAMPUS)
 TRICARE Plus
 TRICARE for Life

Other Health Plans

- Medicare
 Federal Employees Health Benefit Program (FEHBP)
 Medicaid
 A civilian HMO (such as Kaiser)
 Other civilian health insurance (such as Blue Cross)
 Uniformed Services Family Health Plan (USFHP)
 The Veterans Administration (VA)
 Not sure

3. Currently, are you covered by Medicare Part A? Medicare is the federal health insurance program for people aged 65 or older and for certain persons with disabilities. Medicare Part A helps pay for inpatient hospital care.

- Yes, I am now covered by Medicare Part A
 No, I am not covered by Medicare Part A

4. Currently, are you covered by Medicare Part B? Medicare is the federal health insurance program for people aged 65 or older and for certain persons with disabilities. Medicare Part B helps pay for doctor's services, outpatient hospital services, and certain other services.

- Yes, I am now covered by Medicare Part B
 No, I am not covered by Medicare Part B

5. Currently, are you covered by Medicare supplemental insurance? Medicare supplemental insurance, also called Medigap or MediSup, is usually obtained from private insurance companies and covers some of the costs not paid for by Medicare.

- Yes, I am now covered by Medicare supplemental insurance
 No, I am not covered by Medicare supplemental insurance

6. Which health plan did you use for all or most of your health care in the last 12 months? **MARK ONLY ONE.**

- TRICARE Prime
 TRICARE Extra or Standard (CHAMPUS)
 TRICARE Plus
 Medicare
 Federal Employees Health Benefit Program (FEHBP)
 Medicaid
 A civilian HMO (such as Kaiser)
 Other civilian health insurance (such as Blue Cross)
 Uniformed Services Family Health Plan (USFHP)
 The Veterans Administration (VA)
 Not sure
 Did not use any health plan in the last 12 months → Go to Question 8

For the remainder of this questionnaire, the term health plan refers to the plan you indicated in Question 6.

7. How many months or years in a row have you been in this health plan?

- Less than 6 months
- 6 up to 12 months
- 12 up to 24 months
- 2 up to 5 years
- 5 up to 10 years
- 10 or more years

YOUR PERSONAL DOCTOR OR NURSE

The next questions ask about your own health care. Do not include care you got when you stayed overnight in a hospital. Do not include the times you went for dental care visits.

8. A personal doctor or nurse is the health provider who knows you best. This can be a general doctor, a specialist doctor, a nurse practitioner, or a physician assistant. Do you have one person you think of as your personal doctor or nurse?

- Yes
- No → Go to Question 11

9. Using any number from 0 to 10, where 0 is the worst personal doctor or nurse possible and 10 is the best personal doctor or nurse possible, what number would you use to rate your personal doctor or nurse?

- 0 Worst personal doctor or nurse possible
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 Best personal doctor or nurse possible
- I don't have a personal doctor or nurse.

10. Did you have the same personal doctor or nurse before you joined this health plan?

- Yes → Go to Question 12
- No

11. Since you joined your health plan, how much of a problem, if any, was it to get a personal doctor or nurse you are happy with?

- A big problem
- A small problem
- Not a problem

GETTING HEALTH CARE FROM A SPECIALIST

When you answer the next questions, do not include dental visits.

12. Specialists are doctors like surgeons, heart doctors, allergy doctors, skin doctors, and others who specialize in one area of health care.

In the last 12 months, did you or a doctor think you needed to see a specialist?

- Yes
- No → Go to Question 14

13. In the last 12 months, how much of a problem, if any, was it to see a specialist that you needed to see?

- A big problem
- A small problem
- Not a problem
- I didn't need a specialist in the last 12 months.

14. In the last 12 months, did you see a specialist?

- Yes
- No → Go to Question 16

15. We want to know your rating of the specialist you saw most often in the last 12 months. Using any number from 0 to 10 where 0 is the worst specialist possible and 10 is the best specialist possible, what number would you use to rate the specialist?

- 0 Worst specialist possible
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 Best specialist possible
- I didn't see a specialist in the last 12 months.

CALLING DOCTORS' OFFICES

16. In the last 12 months, did you call a doctor's office or clinic during regular office hours to get help or advice for yourself?

- Yes
- No → Go to Question 18

17. In the last 12 months, when you called during regular office hours, how often did you get the help or advice you needed?

- Never
- Sometimes
- Usually
- Always
- I didn't call for help or advice during regular office hours in the last 12 months.

YOUR HEALTH CARE IN THE LAST 12 MONTHS

18. In the last 12 months, did you have an illness, injury, or condition that needed care right away in a clinic, emergency room, or doctor's office?

- Yes
- No → Go to Question 21

19. In the last 12 months, when you needed care right away for an illness, injury, or condition, how often did you get care as soon as you wanted?

- Never
- Sometimes
- Usually
- Always
- I didn't need care right away for an illness, injury or condition in the last 12 months.

20. In the last 12 months, when you needed care right away for an illness, injury, or condition, how long did you usually have to wait between trying to get care and actually seeing a provider?

- Same day
- 1 day
- 2 days
- 3 days
- 4-7 days
- 8-14 days
- 15 days or longer
- I didn't need care right away for an illness, injury or condition in the last 12 months.

21. A health provider could be a general doctor, a specialist doctor, a nurse practitioner, a physician assistant, a nurse, or anyone else you would see for health care.

In the last 12 months, not counting the times you needed health care right away, did you make any appointments with a doctor or other health provider for health care?

- Yes
- No → Go to Question 24

22. In the last 12 months, not counting times you needed health care right away, how often did you get an appointment for health care as soon as you wanted?

- Never
- Sometimes
- Usually
- Always
- I had no appointments in the last 12 months.

23. In the last 12 months, not counting the times you needed health care right away, how many days did you usually have to wait between making an appointment and actually seeing a provider?

- Same day
- 1 day
- 2-3 days
- 4-7 days
- 8-14 days
- 15-30 days
- 31 days or longer
- I had no appointments in the last 12 months.

24. In the last 12 months, how many times did you go to an emergency room to get care for yourself?

- None
- 1
- 2
- 3
- 4
- 5 to 9
- 10 or more

25. In the last 12 months (not counting times you went to an emergency room), how many times did you go to a doctor's office or clinic to get care for yourself?

- None → Go to Question 38
- 1
- 2
- 3
- 4
- 5 to 9
- 10 or more

26. In the last 12 months, did you or a doctor believe you needed any care, tests, or treatment?

- Yes
- No → Go to Question 28

27. In the last 12 months, how much of a problem, if any, was it to get the care, tests or treatment you or a doctor believed necessary?

- A big problem
- A small problem
- Not a problem
- I had no visits in the last 12 months.

28. In the last 12 months, did you need approval from your health plan for any care, tests, or treatment?

- Yes
- No → Go to Question 30

29. In the last 12 months, how much of a problem, if any, were delays in health care while you waited for approval from your health plan?

- A big problem
- A small problem
- Not a problem
- I had no visits in the last 12 months.

30. In the last 12 months, how often were you taken to the exam room within 15 minutes of your appointment?

- Never
- Sometimes
- Usually
- Always
- I had no visits in the last 12 months.

31. In the last 12 months, how often did office staff at a doctor's office or clinic treat you with courtesy and respect?

- Never
- Sometimes
- Usually
- Always
- I had no visits in the last 12 months.

32. In the last 12 months, how often were office staff at a doctor's office or clinic as helpful as you thought they should be?
- Never
 - Sometimes
 - Usually
 - Always
 - I had no visits in the last 12 months.
33. In the last 12 months, how often did doctors or other health providers listen carefully to you?
- Never
 - Sometimes
 - Usually
 - Always
 - I had no visits in the last 12 months.
34. In the last 12 months, how often did doctors or other health providers explain things in a way you could understand?
- Never
 - Sometimes
 - Usually
 - Always
 - I had no visits in the last 12 months.
35. In the last 12 months, how often did doctors or other health providers show respect for what you had to say?
- Never
 - Sometimes
 - Usually
 - Always
 - I had no visits in the last 12 months.
36. In the last 12 months, how often did doctors or other health providers spend enough time with you?
- Never
 - Sometimes
 - Usually
 - Always
 - I had no visits in the last 12 months.

37. Using any number from 0 to 10 where 0 is the worst health care possible and 10 is the best health care possible, what number would you use to rate all your health care in the last 12 months?
- 0 Worst health care possible
 - 1
 - 2
 - 3
 - 4
 - 5
 - 6
 - 7
 - 8
 - 9
 - 10 Best health care possible
 - I had no visits in the last 12 months.
38. In the last 12 months, where did you go most often for your health care? **MARK ONLY ONE ANSWER**
- A military facility – This includes:
 - Military clinic
 - Military hospital
 - PRIMUS clinic
 - NAVCARE clinic
 - A civilian facility – This includes:
 - Doctor's office
 - Clinic
 - Hospital
 - Civilian TRICARE contractor
 - Uniformed Services Family Health Plan facility (USFHP)
 - Veterans Affairs (VA) clinic or hospital
 - I went to none of the listed types of facilities in the last 12 months.

CIVILIAN PROVIDERS

The following questions ask about your experiences with the TRICARE civilian provider network. TRICARE, including TRICARE Prime and Extra, is the health care system of the Department of Defense that provides care for active duty and retired military personnel and their dependents. TRICARE includes the hospitals, clinics and pharmacies of the three services, supplemented by a civilian network. The TRICARE civilian provider network is made up of the doctors, clinics, hospitals and other health care providers who are part of DoD's preferred provider pool. The next five questions refer to health services you received from the civilian network.

39. In the past 12 months, how much of your health care did you receive from the TRICARE civilian provider network?
- All of my health care
 - Most of my health care
 - Some of my health care
 - None of my health care
 - I did not need health care in the past 12 months → Go to Question 47
40. In the past 12 months, how much of a problem was it to get the health care you wanted from the TRICARE civilian provider network?
- A big problem
 - A small problem
 - Not a problem
 - I did not try to get health care from the civilian network.
41. A personal doctor or nurse is the health provider who knows you best. This can be a general doctor, a specialist doctor, a nurse practitioner, or a physician assistant.
- In the past 12 months, how much of a problem was it to find a conveniently located personal doctor or nurse from the TRICARE civilian provider network?
- A big problem
 - A small problem
 - Not a problem
 - I did not try to find a personal doctor from the civilian network.

42. Specialists are doctors like surgeons, heart doctors, allergy doctors, skin doctors, and others who specialize in one area of health care.

In past 12 months, how much of a problem was it to find a conveniently located specialist from the TRICARE civilian provider network?

- A big problem
- A small problem
- Not a problem
- I did not try to find a specialist in the civilian network.

43. In the past 12 months, did you learn that a doctor whom you wanted to see had left the TRICARE civilian provider network?

- Yes
- No
- I did not want to see any network doctors

The following questions ask about your experiences with civilian providers that are not part of TRICARE's network. Under TRICARE Standard, TRICARE pays part of the cost when you see civilian doctors that are not preferred providers.

44. In the last 12 months, have you tried to make an appointment with a civilian doctor who is not part of TRICARE's civilian network?

- Yes
- No → Go to Question 47

45. In the last 12 months, have you been told that a doctor you wanted to see was not seeing TRICARE patients or not seeing new TRICARE patients?

- Yes, not seeing TRICARE patients
- Yes, not seeing new TRICARE patients
- No

46. In the last 12 months, how much of a problem has it been to find doctors who will accept TRICARE?

- A big problem
- A small problem
- Not a problem

YOUR HEALTH PLAN

The next questions ask about your experience with your health plan. By your health plan, we mean the health plan you marked in Question 6.

47. Claims are sent to a health plan for payment. You may send in the claims yourself, or doctors, hospitals, or others may do this for you. In the last 12 months, did you or anyone else send in any claims to your health plan?

- Yes
 No → Go to Question 50
 Don't know → Go to Question 50

48. In the last 12 months, how often did your health plan handle your claims in a reasonable time?

- Never
 Sometimes
 Usually
 Always
 Don't know
 No claims were sent for me in the last 12 months.

49. In the last 12 months, how often did your health plan handle your claims correctly?

- Never
 Sometimes
 Usually
 Always
 Don't know
 No claims were sent for me in the last 12 months.

50. In the last 12 months, did you look for any information about how your health plan works in written material or on the Internet?

- Yes
 No → Go to Question 52

51. In the last 12 months, how much of a problem, if any, was it to find or understand this information?

- A big problem
 A small problem
 Not a problem
 I didn't look for information from my health plan in the last 12 months.

52. In the last 12 months, did you call your health plan's customer service to get information or help?

- Yes
 No → Go to Question 54

53. In the last 12 months, how much of a problem, if any, was it to get the help you needed when you called your health plan's customer service?

- A big problem
 A small problem
 Not a problem
 I didn't call my health plan's customer service in the last 12 months.

54. In the last 12 months, did you have to fill out any paperwork for your health plan?

- Yes
 No → Go to Question 56

55. In the last 12 months, how much of a problem, if any, did you have with paperwork for your health plan?

- A big problem
 A small problem
 Not a problem
 I didn't have any experiences with paperwork for my health plan in the last 12 months.

56. Using any number from 0 to 10 where 0 is the worst health plan possible and 10 is the best health plan possible, what number would you use to rate your health plan?

- 0 Worst health plan possible
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 Best health plan possible

PREVENTIVE CARE

Preventive care is medical care you receive that is intended to maintain your good health or prevent a future medical problem. A physical or a cholesterol screening are examples of preventive care.

57. When did you last have a blood pressure reading?

- Less than 12 months ago
- 1 to 2 years ago
- More than 2 years ago

58. Do you know if your blood pressure is too high?

- Yes, it is too high
- No, it is not too high
- Don't know

59. When did you last have a flu shot?

- Less than 12 months ago
- 1-2 years ago
- More than 2 years ago
- Never had a flu shot

60. Have you ever smoked at least 100 cigarettes in your entire life?

- Yes
- No → Go to Question 66
- Don't know → Go to Question 66

61. Do you now smoke every day, some days or not at all?

- Every day → Go to Question 63
- Some days → Go to Question 63
- Not at all → Go to Question 62
- Don't know → Go to Question 66

62. How long has it been since you quit smoking cigarettes?

- Less than 12 months → Go to Question 63
- 12 months or more → Go to Question 66
- Don't know → Go to Question 66

63. In the last 12 months, on how many visits were you advised to quit smoking by a doctor or other health provider in your plan?

- None
- 1 visit
- 2 to 4 visits
- 5 to 9 visits
- 10 or more visits
- I had no visits in the last 12 months.

64. On how many visits was medication recommended or discussed to assist you with quitting smoking (for example: nicotine gum, patch, nasal spray, inhaler, prescription medication)?

- None
- 1 visit
- 2 to 4 visits
- 5 to 9 visits
- 10 or more visits
- I had no visits in the last 12 months

65. On how many visits did your doctor or health provider recommend or discuss methods and strategies (other than medication) to assist you with quitting smoking?

- None
- 1 visit
- 2 to 4 visits
- 5 to 9 visits
- 10 or more visits
- I had no visits in the last 12 months

66. Are you male or female?
- Male → Go to Question 76
 - Female → Go to Question 67
67. When did you last have a Pap smear test?
- Within the last 12 months
 - 1 to 3 years ago
 - More than 3 but less than 5 years ago
 - 5 or more years ago
 - Never had a Pap smear test
68. Are you under age 40?
- Yes → Go to Question 70
 - No
69. When was the last time your breasts were checked by mammography?
- Within the last 12 months
 - 1 to 2 years ago
 - More than 2 years ago but less than 5 years ago
 - 5 or more years ago
 - Never had a mammogram
70. Have you been pregnant in the last 12 months or are you pregnant now?
- Yes, I am currently pregnant → Go to Question 71
 - No, I am not currently pregnant, but have been pregnant in the past 12 months → Go to Question 72
 - No, I am not currently pregnant, and have not been pregnant in the past 12 months → Go to Question 76
71. In what trimester is your pregnancy?
- First trimester (up to 12 weeks after 1st day of last period) → Go to Question 75
 - Second trimester (13th through 27th week)
 - Third trimester (28th week until delivery)
72. In which trimester did you first receive prenatal care?
- First trimester (up to 12 weeks after 1st day of last period) → Go to Question 75
 - Second trimester (13th through 27th week) → Go to Question 74
 - Third trimester (28th week until delivery) → Go to Question 74
 - Did not receive prenatal care → Go to Question 73
73. What is the most important reason you did not get prenatal care? PLEASE CHOOSE ONE
- Did not carry pregnancy to term
 - Did not know I was pregnant
 - Did not think I needed care
 - I moved too frequently
 - Too difficult to get an appointment
 - Personal reasons
 - Other
- Go to Question 76
74. What is the most important reason you did not get prenatal care earlier? PLEASE CHOOSE ONE
- Did not know I was pregnant
 - Did not think I needed care
 - I was deployed or on an operational exercise
 - Could not get an appointment
 - Personal reasons
 - Other
75. What health care did you receive in your first trimester? PLEASE MARK ALL THAT APPLY
- Visit(s) with a physician
 - Visit(s) with a physician's assistant
 - Visit(s) with corpsman, medic or Independent Duty Corpsman
 - Visit(s) with a nurse practitioner or midwife
 - Visit(s) with a nurse
 - Visit(s) with alternative provider
 - Saw health care provider as part of a group with other pregnant women
 - Did not receive care in first trimester

ABOUT YOU

76. In general, how would you rate your overall health now?

- Excellent
- Very good
- Good
- Fair
- Poor

77. Are you limited in any way in any activities because of any impairment or health problem?

- Yes
- No

For questions 78 and 79, please write your response on the lines provided, then check the matching box below each column. For example in question 78 if you are five feet and six inches tall, you would put a "5" on the first line and a "6" on the second line, and then check the box next to the "5" in the first column and check the box next to the "6" in the second column. For example:

5 Feet	6 Inches
<input type="checkbox"/> 1	<input type="checkbox"/> 0
<input type="checkbox"/> 2	<input type="checkbox"/> 1
<input type="checkbox"/> 3	<input type="checkbox"/> 2
<input type="checkbox"/> 4	<input type="checkbox"/> 3
<input checked="" type="checkbox"/> 5	<input type="checkbox"/> 4
<input type="checkbox"/> 6	<input type="checkbox"/> 5
<input type="checkbox"/> 7	<input checked="" type="checkbox"/> 6
	<input type="checkbox"/> 7
	<input type="checkbox"/> 8
	<input type="checkbox"/> 9
	<input type="checkbox"/> 10
	<input type="checkbox"/> 11

78. How tall are you without your shoes on? Please give your answer in feet and inches.

Feet	Inches
<input type="checkbox"/> 1	<input type="checkbox"/> 0
<input type="checkbox"/> 2	<input type="checkbox"/> 1
<input type="checkbox"/> 3	<input type="checkbox"/> 2
<input type="checkbox"/> 4	<input type="checkbox"/> 3
<input type="checkbox"/> 5	<input type="checkbox"/> 4
<input type="checkbox"/> 6	<input type="checkbox"/> 5
<input type="checkbox"/> 7	<input type="checkbox"/> 6
	<input type="checkbox"/> 7
	<input type="checkbox"/> 8
	<input type="checkbox"/> 9
	<input type="checkbox"/> 10
	<input type="checkbox"/> 11

79. How much do you weigh without your shoes on? Please give your answer in pounds.

		Pounds
<input type="checkbox"/> 0	<input type="checkbox"/> 0	<input type="checkbox"/> 0
<input type="checkbox"/> 1	<input type="checkbox"/> 1	<input type="checkbox"/> 1
<input type="checkbox"/> 2	<input type="checkbox"/> 2	<input type="checkbox"/> 2
<input type="checkbox"/> 3	<input type="checkbox"/> 3	<input type="checkbox"/> 3
	<input type="checkbox"/> 4	<input type="checkbox"/> 4
	<input type="checkbox"/> 5	<input type="checkbox"/> 5
	<input type="checkbox"/> 6	<input type="checkbox"/> 6
	<input type="checkbox"/> 7	<input type="checkbox"/> 7
	<input type="checkbox"/> 8	<input type="checkbox"/> 8
	<input type="checkbox"/> 9	<input type="checkbox"/> 9

80. In the last 12 months, how often have you exercised vigorously for more than 10 minutes? Vigorous exercise is an activity like running, bicycling fast, or swimming, that causes a large increase in your heart rate and heavy sweating.
- Unable to do this activity → Go to Question 82
 - Not at all → Go to Question 82
 - Less than once a week
 - At least once a week but fewer than 3 times a week
 - At least 3 times a week but fewer than 5 times a week
 - 5 times a week or more
81. When you perform these vigorous activities, how long do you usually do them?
- Less than 20 minutes
 - 20 minutes or more
82. In last 12 months, how often have you exercised moderately for more than 10 minutes? Moderate exercise is an activity like mowing the lawn, walking, bicycling slowly, or playing golf.
- Unable to do this activity → Go to Question 84
 - Not at all → Go to Question 84
 - Less than once a week
 - At least once a week but fewer than 3 times a week
 - At least 3 times a week but fewer than 5 times a week
 - 5 times a week or more
83. When you perform these moderate activities, how long do you usually do them?
- Less than 20 minutes
 - 20 minutes or more

84. A drink of alcohol is 1 can or bottle of beer, 1 glass of wine, 1 can or bottle of wine cooler, 1 cocktail, or 1 shot of liquor. During the past 30 days, on how many days per week or per month did you have at least one drink of any alcoholic beverage?
- 28 to 30 days (about every day)
 - 20 to 27 days (5 or 6 days a week, average)
 - 11 to 19 days (3 or 4 days a week, average)
 - 4 to 10 days (1 or 2 days a week, average)
 - 2 to 3 days in the past 30 days
 - Once in the past 30 days
 - I didn't drink any alcoholic beverages → Go to Question 87
85. On the days when you drank, about how many drinks did you drink on average? A drink is 12 ounces of beer, 5 ounces of wine, or 1.5 ounces of liquor.
- 1 drink or less
 - 2 drinks
 - 3 drinks
 - 4 or 5 drinks
 - At least 6 drinks but fewer than 12
 - 12 or more drinks
86. Considering all types of alcoholic beverages, how many times during the past 30 days did you have 5 or more drinks on an occasion?
- Never
 - 1 time
 - 2 times
 - 3 or 4 times
 - At least 5 times but fewer than 10
 - 10 or more times
87. Do you consider yourself to be overweight, underweight or about right?
- Overweight
 - Underweight
 - About right

88. Are you presently trying to lose weight?

- Yes
- No → Go to Question 90

89. Does your weight loss plan include any of the following? MARK ALL THAT APPLY

- Dieting
- Physical exercise
- Eating meal replacements, such as Slim-Fast
- Fasting for 24 hours or longer
- Going to a weight loss program such as Weight Watchers, or a program offered by a physician
- Surgery, such as gastric bypass
- Medication prescribed by a doctor
- Dietary supplements
- Liposuction
- Other, please list _____

90. On average, how many times per week do you eat meals that were prepared in a restaurant? Please include eat-in restaurants, carry-out restaurants and restaurants that deliver food to your house.

- Never
- Less than 1 time per week
- 1 or 2 times per week
- 3 or 4 times per week
- 5 or 6 times per week
- 7 or more times per week

91. On average, how many times per week do you eat fruit, not counting juice?

- Never
- Less than 1 time per week
- 1 or 2 times per week
- 3 or 4 times per week
- 5 or 6 times per week
- 7 or more times per week

92. Not counting green salads, potatoes or carrots, about how many servings of vegetables do you usually eat per day?

- None
- Less than 1 serving per day
- 1 serving per day
- 2 servings per day
- 3 servings per day
- 4 or more servings per day

93. In the last 30 days how many soft drinks did you have? A soft drink is a 12 ounce serving of soda or pop.

- 1 drink or less per month → Go to Question 95
- 2 or 3 drinks per month
- 1 or 2 drinks per week
- 3 or 4 drinks per week
- 5 or 6 drinks per week
- 1 drink per day
- 2 or 3 drinks per day
- 4 or 5 drinks per day
- 6 or more drinks per day

94. How often were these soft drinks sugar-free?

- Always or almost always
- About $\frac{3}{4}$ of the time
- About $\frac{1}{2}$ of the time
- About $\frac{1}{4}$ of the time
- Never or almost never

95. In the last 30 days how often did you have milk to drink or on your cereal? Please include chocolate or flavored milk as well as cocoa made with milk.

- Never → Go to Question 97
- Less than once per week
- Once per week or more, but less than once per day
- Once per day or more

96. What type of milk did you use most often?

- Whole milk
- 2% fat milk
- 1% fat milk
- Skim, nonfat or powdered milk
- Evaporated milk, goat's milk or buttermilk
- Soy or imitation milk
- Another type of milk

97. What is the highest grade or level of school that you have completed?

- 8th grade or less
- Some high school, but did not graduate
- High school graduate or GED
- Some college or 2-year degree
- 4-year college graduate
- More than 4-year college degree

98. Are you of Hispanic or Latino origin or descent? (Mark "NO" if not Spanish/Hispanic/Latino.)

- No, not Spanish, Hispanic, or Latino
- Yes, Mexican, Mexican American, Chicano
- Yes, Puerto Rican
- Yes, Cuban
- Yes, other Spanish, Hispanic, or Latino

99. What is your race? (Mark ONE OR MORE races to indicate what you consider yourself to be.)

- White
- Black or African American
- American Indian or Alaska Native
- Asian (e.g., Asian Indian, Chinese, Filipino, Japanese, Korean, Vietnamese)
- Native Hawaiian or other Pacific Islander (e.g., Samoan, Guamanian or Chamorro)

100. What is your age now?

- 18 to 24
- 25 to 34
- 35 to 44
- 45 to 54
- 55 to 64
- 65 to 74
- 75 or older

If you have any suggestions or comments that you would like to add, please neatly print your comments in question 101 on the lines provided.

101. SUGGESTIONS AND COMMENTS:

THANK YOU FOR TAKING THE TIME TO COMPLETE THIS SURVEY! Your generous contribution will greatly aid efforts to improve the health of our military community.

Return your survey in the postage-paid envelope. If the envelope is missing, please send to:

Synovate
PO Box 5030
Chicago, IL 60680-4138

CODING SCHEME AND CODING TABLES

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

QUARTER I

2005 HEALTH CARE SURVEY OF DOD BENEFICIARIES (HCSDB) CODING SCHEME AND CODING TABLES

BASIC SAS AND ASCII/EBCDIC MISSING DATA AND NOT APPLICABLE CODES

SAS		ASCII/EBCDIC	Description
Numeric		Numeric	
.		-9	No response
.O		-7	Out of range error
.N		-6	Not Applicable or valid skip
.D		-5	Scalable response of "Don't know" or "not sure"
.I		-4	Incomplete grid error
.C		-1	Question should have been skipped.

Missing values '.', and incomplete grids '.I' are encoded prior to implementation of the Coding Scheme Notes (see below).

**Coding Table for Note 1:
H05006, H05007**

N1	H05006 is:	H05007 is:	H05006 is coded as:	H05007 is coded as:	*
1	1-11, health plan, -5, not sure	Marked, or missing response	Stands as original value	Stands as original value	
2	-6, no usage in past 12 months	Marked response	Stands as original value	.C, question should be skipped	F
3	-6, no usage in past 12 months	Missing response	Stands as original value	.N, valid skip	F
4	Missing response	Marked or missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 2:
H05008, H05009, H05010, H05011**

N2	H05008 is:	H05009 Is:	H05010 Is:	H05011 Is:	H05008 is coded as:	H05009 is coded as:	H05010 is coded as:	H05011 is coded as:	*
1	1: yes, or missing response	-6: Don't have a personal Dr	Any Value	Any Value	2: no	.C, question should be skipped	.N, valid skip if missing; .C, question should be skipped, if marked	Stands as original value	B F
2	1: yes	0-10 or missing response	1: yes	1-3	Stands as original value	Stands as original value	Stands as original value	.C, question should be skipped	F
3	1: yes	0-10 or missing response	Missing response	1-3	Stands as original value	Stands as original value	2: no	Stands as original value	B
4	1: yes	0-10 or missing response	1: yes	Missing response	Stands as original value	Stands as original value	Stands as original value	.N, valid skip if missing	F

13	2: no	Missing response	Missing response	Any value	Stands as original value	.N, valid skip if missing	.N, valid skip	Stands as original value	F
14	Missing response	Missing response	Missing response	Any value	Stands as original value	Stands as original value	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 3:
H05012, H05013**

N3	H05012 is:	H05013 is:	H05012 is coded as:	H05013 is coded as:	*
1	1: yes	1, 2, 3, or missing response	Stands as original value	Stands as original value	
2	1: yes, or missing response	-6: didn't need to see a specialist	2: No	.C question should be skipped	B F
3	2: no or missing response	1, 2, 3	1: yes	Stands as original value	B
4	2: no	Missing, or -6: didn't need to see a specialist	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 4:
H05014, H05015**

N4	H05014 is:	H05015 is:	H05014 is coded as:	H05015 is coded as:	*
1	1: yes	0-10, or missing response	Stands as original value	Stands as original value	
2	1: yes, or missing response	-6: didn't need to see a specialist	2: No	.C question should be skipped	B F
3	2: no, or missing response	0-10	1: yes	Stands as original value	B
4	2: no	Missing, or -6: didn't need to see a specialist	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 5:
H05016, H05017**

N5	H05016 is:	H05017 is:	H05016 is coded as:	H05017 is coded as:	*
1	1: yes	1-4: how often, or missing response	Stands as original value	Stands as original value	
2	1: yes or missing response	-6: no calls	2: no	.C, question should be skipped	B F
3	2: no, or missing response	1-4: how often	1: yes	Stands as original value	B
4	2: no	-6: no calls or missing	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 6:
H05018, H05019, H05020**

N6	H05018 is:	H05019-H05020 are:	H05018 is coded as:	H05019-H05020 are coded as:	*
1	1: yes	“All are blank”	Stands as original value	Stands as original value otherwise	
2	1:yes, or missing response	“Blank or NA”	2: no	.N, valid skip if missing, .C, question should be skipped if marked	B F
3	1: yes	“One marked, and one NA”	Stands as original value	., missing if -6, stands as original value otherwise	F
4	1: yes	At least one is “marked”	Stands as original value	Stands as original value otherwise	
5	2: no	“One marked, and one NA”	Stands as original value	.C, question should be skipped if marked	F
6	2: no, or missing response	At least one is “marked”	1: yes	., missing if -6, stands as original value otherwise	B F
7	2: no	“All are blank” or “Blank or NA”	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
8	Missing	“One marked, and one NA”	2: no	.C, question should be skipped if marked	B F
9	Missing response	Missing	Stands as original value	Stand as original value	

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 6:
Responses to H0519-H05020 are all missing.

Definition of “Blank or NA” in Coding Table for Note 6:
All of the following are true: H0519-H05020 are a combination of not applicable (-6) or missing.

Definition of “marked” in Coding Table for Note 6:
Any pattern of marks outside the definitions “all are blank” and “Blank or NA.”

Definition of “One marked and one NA” in Coding Table for Note 6:
All of the following are true: H0519-H05020 are a combination of not applicable (-6) or marked.

**Coding Table for Note 7:
H05021, H05022, H05023**

N7	H05021 is:	H05022-H05023 are:	H05021 is coded as:	H05022-H05023 are coded as:	*
1	1: yes	“All are blank”	Stands as original value	Stands as original value otherwise	
2	1:yes, or missing response	“Blank or NA”	2: no	.N, valid skip if missing, .C, question should be skipped if marked	B F
3	1: yes	“One marked, and one NA”	Stands as original value	., missing if -6, stands as original value otherwise	F
4	1: yes	At least one is “marked”	Stands as original value	Stands as original value otherwise	
5	2: no	“One marked, and one NA”	Stands as original value	.C, question should be skipped if marked	F
6	2: no, or missing response	At least one is “marked”	1: yes	., missing if -6, stands as original value otherwise	B
7	2: no	“All are blank” or “Blank or NA”	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	B F
8	Missing	“One marked, and one NA”	2: no	.C, question should be skipped if marked	B F
9	Missing response	Missing	Stands as original value	Stand as original value	

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 7:
Responses to H05022-H05023 are all missing.

Definition of “Blank or NA” in Coding Table for Note 7:
All of the following are true: H05022-H05023 are a combination of not applicable (-6) or missing.

Definition of “marked” in Coding Table for Note 7:
Any pattern of marks outside the definitions “all are blank” and “Blank or NA.”

Definition of “One marked and one NA” in Coding Table for Note 7:
All of the following are true: H05022-H05023 are a combination of not applicable (-6) or marked.

**Coding Table for Note 8:
H05025, H05026-H05037**

N8	H05025 is:	H05026-H05037 are:	H05025 is coded as:	H05026-H05037 are coded as:	*
1	1: None	At least one is “marked”, “All are blank”, or “blank or NA”	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
2	2-7, or missing response	“Blank or NA”	1: None	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2-7	At least one is “marked” or “all are blank”	Stands as original value	., missing if -6, stands as original value otherwise	F
4	Missing response	“All are blank”	Stands as original value	Stand as original value	
5	Missing Response	At least one is “Marked”	Stands as original value	Stand as original value	

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 8:
Responses to H05026-H05037 are all missing.

Definition of “Blank or NA” in Coding Table for Note 8:
All of the following are true: H05026-H05037 are a combination of not applicable (-6) or missing.

Definition of “marked” in Coding Table for Note 8:
Any pattern of marks outside the definitions “all are blank” and “Blank or NA.”

**Coding Table for Note 9:
H05026, H05027**

N9	H05026 is:	H05027 is:	H05026 is coded as:	H05027 is coded as:	*
1	.N, valid skip, or .C, question should be skipped	.N, valid skip, or .C, question should be skipped	Stands as original value	Stands as original value	
2	1: yes	1-3: how much of a problem, missing response	Stands as original value	Stands as original value	
3	1: yes, missing response	-6: No visits	2: no	.C, question should be skipped	B F
4	2: no, missing response	1-3: how much of a problem	1: yes	Stands as original value	B
5	2: no	-6: No visits or missing response	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
6	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 10:
H05028, H05029**

N10	H05028 is:	H05029 is:	H05028 is coded as:	H05029 is coded as:	*
1	.N, valid skip, or .C, question should be skipped	.N, valid skip, or .C, question should be skipped	Stands as original value	Stands as original value	
2	1: yes	1-3: how much of a problem, missing response	Stands as original value	Stands as original value	
3	1: yes, missing response	-6: No visits	2: no	.C, question should be skipped	B F
4	2: no, missing response	1-3: how much of a problem	1: yes	Stands as original value	B
5	2: no	-6: No visits or missing	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
6	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 11:
S05V01, S05V02, S05V05-S05V10**

N11	S05V01 is:	S05V02, S05V05-S05V10 Are:	S05V01 is coded as:	S05V02, S05V05-S05V10 Are coded as:	*
1	1,2,3,4: some or no healthcare	“All are blank” or at least one is “marked”	Stands as original value	Stand as original value	F
2	1,2,3: at least some healthcare or missing response	“Blank or NA”	-6: didn’t need healthcare in past 12 months	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	4: no healthcare	“Blank or NA”	Stands as original value	Stands as original value	
4	-6: didn’t need healthcare in past 12 months	Any value	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	Missing response	Any value	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 11:
S05V02, S05V05-S05V10 are all missing.

Definition of “blank or NA” in Coding Table for Note 11:
S05V02, S05V05-S05V10 are either not applicable (-6), or a combination of not applicable (-6) and missing.

Definition of “marked” in Coding Table for Note 11:
Any pattern of marks outside the definitions “all are blank” and “blank or NA.”

**Coding Table for Note 12:
S05V08, S05V09-S05V10**

N12	S05V08 is:	S05V09-S04V10 Are:	S05V08 is coded as:	S05V09-S05V10 Are coded as:	*
1	.N, valid skip, or .C, question should be skipped	.N, valid skip, or .C, question should be skipped	Stands as original value	Stands as original value	
2	1: yes, missing response	Any value	Stands as original value	Stand as original value	
3	2: no	Any value	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 13:
H05039, H05040-H05041**

N13	H05039 is:	H05040-H05041 are:	H05039 is coded as:	H05040-H05041 are coded as:	*
1	1: yes	At least one is “marked”, “all are blank” or “blank or don’t know”	Stands as original value	Stand as original value ., missing if -6	F
2	1: yes, -5: don’t know, missing	“Blank or NA”	2: no	.N, valid skip if missing; .C, question should be skipped if marked	B F
3	2: no, -5: don’t know, missing	At least one is “marked” or “blank or don’t know”	1: yes	., missing if -6, stands as original value otherwise	B F
4	2: no	“Blank or NA” or “all are blank”	Stands as original value	.N, valid skip if missing; .C, question should be skipped if marked	F
5	-5: don’t know	“All are blank”	Stands as original value	.N, valid skip if missing	F
6	Missing response	“All are blank”	Stands as original value	Stand as original value	

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 13:

Responses to H05040-H05041 are all missing.

Definition of “blank or NA” in Coding Table for Note 13:

Responses to H05040-H05041 are either all not applicable (-6) or a combination of missing and not applicable (-6).

Definition of “blank or don’t know” in Coding Table for Note 13:

Responses to H05040-H05041 are either all don’t know (-5) or a combination of missing and don’t know (-5).

Definition of “marked” in Coding Table for Note 13:

Any pattern of marks outside the definitions “all are blank,” “blank or NA,” or “blank or don’t know.”

**Table for Note 14:
H05042, H05043**

N14	H05042 is:	H05043 is:	H05042 is coded as:	H05043 is coded as:	*
1	1: yes	1, 2, 3: how much of a problem, missing response	Stands as original value	Stands as original value	
2	1: yes, or missing response	-6: didn't look for information in health plan	2: No	.C question should be skipped	B F
3	2: no, or missing response	1, 2, 3: how much of a problem	1: yes	Stands as original value	B
4	2: no	Missing, or -6: didn't look for information in health plan	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 15:
H05044, H05045**

N15	H05044 is:	H05045 is:	H05044 is coded as:	H05045 is coded as:	*
1	1: yes	1-3: how much of a problem, missing response	Stands as original value	Stands as original value	
2	1: yes, missing response	-6: didn't call health plan	2: No	.C question should be skipped	B F
3	2: no, missing, response	1-3: how much of a problem	1: yes	Stands as original value	B
4	2: no	Missing, or -6: didn't call health plan	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 16:
H05046, H05047**

N16	H05046 is:	H05047 is:	H05046 is coded as:	H05047 is coded as:	*
1	1: yes	1-3: how much of a problem, missing response	Stands as original value	Stands as original value	
2	1: yes, or missing response	-6: didn't have any experience	2: No	.C question should be skipped	B F
3	2: no, or missing response	1-3: how much of a problem	1: yes	Stands as original value	B
4	2: no	Missing, or -6: didn't have any experience	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
5	Missing response	Missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 17:
H05052--H05057**

N17	H05052 Is:	H05053 is:	H05054 is:	H05055- H05057 are:	H05052 is coded as:	H05053 is coded as:	H05054 is coded as:	H05055- H05057 are coded as:	*
1	1: ever smoked	3 or 4: still smoke	Any value	Any value	Stands as original value	Stands as original value	.C, question should be skipped if marked, .N, valid skip if missing	Stands as original value	F
2	1: ever smoked	2: quit	2: quit >1 year ago or -5: don't know	Any value	Stands as original value	Stands as original value	Stands as original value	.C, question should be skipped if marked, .N, valid skip if missing	F
3	1: ever smoked	2: quit	3: quit <1 year ago, missing response	Any value	Stands as original value	Stands as original value	Stands as original value	Stands as original value	
4	1: ever smoked	-5: don't know, missing response	2: quit >1 year ago	Any value	Stands as original value	2: quit	Stands as original value	.C, question should be skipped if marked, .N, valid skip if missing	F B
5	1: ever smoked	-5: don't know, missing response	3: quit <1 year ago	Any value	Stands as original value	2: quit	Stands as original value	Stands as original value	B
6	1: ever smoked	-5: don't know	-5: don't know, missing response	Any value	Stands as original value	Stands as original value	.C, question should be skipped if marked, .N, valid skip if missing	.C, question should be skipped if marked, .N, valid skip if missing	F
7	1: ever smoked	missing response	-5: don't know	Any value	Stands as original value	Stands as original value	Stands as original value	.C, question should be skipped if marked, .N, valid skip if missing	F

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 17 continued:

15	Missing response	-5: don't know	Any value	Any value	Stands as original value	Stands as original value	.C, question should be skipped if marked, .N, valid skip if missing	.C, question should be skipped if marked, .N, valid skip if missing	F

* Indication of backward coding (B) or forward coding (F).

Coding Table for Note 18:

Note 18 (Part a)

H05058, SEX, XSEXA, H05059-H05065, S05O01-S05O03H

N18A	H05058 is :	SEX is:	H05059--H05065, S05O01-S05O03H are:	XSEXA is coded as:
1	Missing response	F	Any marked	2, female
2	Missing response	F	All missing	2, female
3	Missing response	M	Any marked	1, male
4	Missing response	M	All missing	1, male
5	Missing response	Z, missing	Any marked	2, female
6	Missing response	Z	All missing	., missing value
7	Missing response	Missing	All missing	., missing value
8	1, male	Any value	All missing	1, male
9	1, male	F	Any marked	2, female
10	1, male	M or Z	Any marked	1, male
11	2, female	Any value	Any marked	2, female
12	2, female	M	All missing	1, male
13	2, female	F, Z, or missing	All missing	2, female

SEX (PNSEXCD) is the gender from the DEERS file. This variable is not used to override questionnaire responses, but to clear up any omissions or discrepancies in the responses.

XSEXA is the recoded gender variable after taking into account the self-reported response (H05058), any responses to gender-specific questions, and the gender of the sample beneficiary from DEERS.

Note 18 (Part B):

XSEXA, H05059 - H05065, S05O01-S05O03H

N18B	XSEXA is:	H05059--H05065, S05O01-S05O03H are:	H05059--H05065, S05O01-S05O03H are coded as:	*
1	1: Male	“All are blank”	.N, valid skip	F
2	1: Male	At least one is “marked”	.N, valid skip if missing; .C, question should be skipped if marked	F
3	2: Female	“All are blank” or at least one is “marked”	Stands as original value	
4	Missing	“All are blank” or at least one is “marked”	Missing value	F

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 18b:

All variables H05059--H05065, S05O01-S05O03H are missing.

Definition of “marked” in Coding Table for Note 18b:

Any pattern of marks outside the definition “all are blank.”

Coding Table for Note 19
XSEXA, AGE, H05060, H05061

N19	XSEXA is:	AGE is:	H05060 is:	H05061 is:	H05060 is coded as:	H05061 is coded as:	*
1	1: Male	Any value	.C, question should be skipped, or .N, valid skip	C, question should be skipped, or .N, valid skip	Stands as original value	Stands as original value

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 22:
S05H03, S05H04**

N22	S05H03 is:	S05H04 is:	S05H03 is coded as:	S05H04 is coded as:	*
1	1-2	Marked response	Stands as original value	.C, question should be skipped	F
2	1-2	Missing response	Stands as original value	.N, valid skip	F
3	3-6	Marked, or missing response	Stands as original value	Stands as original value	
4	Missing response	Marked or missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 23:
S05H05, S05H06**

N23	S05H05 is:	S05H06 is:	S05H05 is coded as:	S05H06 is coded as:	*
1	1-2	Marked response	Stands as original value	.C, question should be skipped	F
2	1-2	Missing response	Stands as original value	.N, valid skip	F
3	3-6	Marked, or missing response	Stands as original value	Stands as original value	
4	Missing response	Marked or missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 24:
S05H07, S05H08-S05H09**

N24	S05H07 is:	S05H08-S05H09 are:	S05H07 is coded as:	S05H08-S05H09 are coded as:	*
1	1-6	Any value	Stands as original value	., missing if marked, stand as original value otherwise	
2	7: Didn't drink any beverages	Any value	Stands as original value	.N, valid skip if missing, .C, question should be skipped if marked	F
3	Missing response	Any value	Stands as original value	Stand as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 25:
S05H11, S05H12A-S05H12J**

N25	S05H11 is:	S05H12A-S05H12J are:	S05H11 is coded as:	S05H12A-S05H12J are coded as:	*
1	1: yes	At least one is “marked” or “all are blank”	Stands as original value	Stands as original value	
2	2: no or missing response	At least one is “marked”	1: yes	Stands as original value	B
3	2: no	“all are blank”	Stands as original value	.N, valid skip if missing	F
4	Missing response	“all are blank”	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

Definition of “all are blank” in Coding Table for Note 25:
Responses to S05H12A-S05H12J are all missing.

Definition of “marked” in Coding Table for Note 25:
Any pattern of marks outside the definitions “all are blank”

**Coding Table for Note 26:
S05H16, S05H17**

N26	S05H16 is:	S05H17 is:	S05H16 is coded as:	S05H17 is coded as:	*
1	1: 1 drink or less per month	Marked response	Stands as original value	.C, question should be skipped	F
2	1: 1 drink or less per month	Missing response	Stands as original value	.N, valid skip	F
3	2-9: more than one drink per month	Marked, or missing response	Stands as original value	Stands as original value	
4	Missing response	Marked or missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

**Coding Table for Note 27:
S05H18, S05H19**

N27	S05H18 is:	S05H19 is:	S05H18 is coded as:	S05H19 is coded as:	*
1	1: Never	Marked response	Stands as original value	.C, question should be skipped	F
2	1: Never	Missing response	Stands as original value	.N, valid skip	F
3	2-4: Drunk milk	Marked, or missing response	Stands as original value	Stands as original value	
4	Missing response	Marked or missing response	Stands as original value	Stands as original value	

* Indication of backward coding (B) or forward coding (F).

RESPONSE RATE TABLES

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

TABLE F.1

RESPONSE RATES BY ENROLLEE AND BENEFICIARY – QUARTER I, 2005

	RR Unweighted Response Rate	RR ^w Weighted Response Rate
Active duty	19.4	18.6
Active duty family member,prime enrollee	30.0	29.8
Active duty family member,nonenrollee	22.1	23.0
Retired/fmly mbr of rtree,<65,prm enrlee	54.1	55.5
Retired/fmly mbr of rtree,<65,nonenrolle	46.0	50.2
Retired/fmly mbr of rtree, 65/older	73.1	75.3

TABLE F.2

RESPONSE RATES BY SEX – QUARTER I, 2005

	Q2 2005	
	RR Unweighted Response Rate	RR _w Weighted Response Rate
Male	27.3	44.1
Female	36.0	48.9

TABLE F.3

RESPONSE RATES BY CONUS/OCONUS INDICATOR – QUARTER I, 2005

	Q2 2005	
	RR Unweighted Response Rate	RR _w Weighted Response Rate
Invalid/Missing	24.9	34.5
Not in Conus	19.1	20.4
In Conus	33.0	48.1

TABLE F.4

RESPONSE RATES BY BENEFICIARY CATEGORY – QUARTER I, 2005

	RR Unweighted Response Rate	RR _w Weighted Response Rate
Active Duty and Guard/Reserve	19.4	18.6
Dependent of Active Duty & Guard/Reserve	27.5	28.2
Retiree/Depend of Retir/Surviv/Other 65+	73.1	75.3
Retiree/Depend of Retir/Surviv/Other <65	50.0	52.3

TABLE F.5

RESPONSE RATES BY CATCHMENT AREA - QUARTER I, 2005

	Rr Unweighted Response Rate	RR ^w Weighted Response Rate
