MDR Competitive Plans Demonstration Clinical File

I.   SOURCE:

Data Capture: The Enrollment, Eligibility and Encounter (EEE) Contractor for the CPD program (MicroHealth) prepares the monthly CPD Clinical file for the MDR, along with the Pharmacy, Provider and Enrollment files.   These source data files are in the same layout as the Designated Provider files

II.   TRANSMISSION (FORMAT AND FREQUENCY)

The data files are sent monthly in accordance with ICD XXXXXX. Batches include new and update records.

III.   ORGANIZATION AND BATCHING

The CPD Clinical file contains all fiscal years of data.

IV.   RECEIVING FILTERS

N/A

V.   UPDATE PROCEDURES

- The raw CPD Clinical file contains new records, updated/corrected records and records that need to be deleted from the monthly MDR file. Records are deleted and corrected according to the following logic:
  - Records in each monthly batch with the Transaction Type Code="D" are used to purge records from the MDR file based on DMISID and Unique Patient Reference Number.
  - Records in each monthly batch with the Transaction Type Code="C" replace any previously received record with the same DMISID and Unique Patient Reference Number.
  - After removing/replacing records per steps above, only the most recent version of a record should be retained, based on DMISID, Unique Patient Reference Number and File Date.
  - Entire duplicate records in each feed should be purged.

VI.   FIELD TRANSFORMATIONS AND DELETIONS FOR MDR CPD CLINICAL FILE

- The table below describes each reference (or data) file being used to append fields to each MDR CPD Clinical data.

Merge	Merge to	Date Matching	Additional Matching
Longitudinal VM6 File	Master	Latest Encounter Date, with begin and end dates for each changeable demographic segment.	PATID if available.
Master Person Index	Master	None	For records with blank PATID, match CPD by sponssn, patsex, dob and grouped member relationship code.

VII. RECORD LAYOUT AND CONTENT

MDR CPD Clinical File: Data are stored as a SAS data set. The table below describes the format, file layout, and field derivation rules for the CPD Clinical Detail data set.
